Preface

## **Section I. Introduction and Physics**

1. Introduction to Diagnostic Imaging
2. Physics of Diagnostic Imaging
3. CT and MRI Physics
4. US Physics
5. Nuclear Medicine Physics

## **Section II. Musculoskeletal**

6. Normal Anatomic Variants
7. Developmental Orthopedic Disease
8. Joint Disease
9. Fracture and Fracture Healing Nelson
10. Aggressive Bone Disease
11. Head Imaging
12. Spine Imaging

## **Section III. Thorax**

13. Anatomy, Variants, and Interpretation Paradigm
14. Extrathoracic Structures Grosso
15. Pleural Space
16. Pulmonary Parenchyma
17. Mediastinum

- 18. Cardiovascular
- 19. Feline Thorax

#### **Section IV. Abdomen**

- 20. Anatomy, Variants, and Interpretation Paradigm
- 21. Extra-Abdominal and Body Wall
- 22. Peritoneal and Retroperitoneal
- 23. Liver and Biliary
- 24. Spleen
- 25. Gastrointestinal Tract
- 26. Pancreas
- 27. Urogenital
- 28. Adrenal Glands and Lymph Nodes.

#### **Index.**
