

TABLE OF CONTENTS

Avian Influenza: Etiology, Pathogenesis and Interventions

Interspecies transmission of avian influenza virus (H3N2) to dogs

Conventional and experimental vaccines against avian influenza

Worldwide preparedness to prevent eruption of pandemic flu and to control pandemic spread after its emergence

Molecular pathogenesis of avian influenza and prospect of therapy using small interfering RNA

Avian influenza : intervention and therapy

Infection control for avian influenza (H5N1) in healthcare settings

U.S. and international responses to the global spread of avian flu

Avian influenza : agricultural issues

Potential risks of vaccination against avian flu epidemics

Preparation and production of pre-pandemic and pandemic influenza vaccine.
