- List of contributors
- About the editors
- Foreword
- Preface
- Acknowledgments
  
- **Chapter 1. Aquatic pollution and marine ecosystems**
- Abstract
- 1.1 Background
- 1.2 Sources of contamination in aquatic ecosystems
- 1.3 Causes of aquatic ecosystem pollution by hydrocarbons
- 1.4 The effects of water pollution
- 1.5 The repercussions of pollution of aquatic ecosystems with hydrocarbons
- 1.6 Other sources of water pollution spread
- 1.7 Conclusions and recommendations
- References
  
- **Chapter 2. Heavy metals as pollutants in the aquatic Black Sea ecosystem**
- Abstract
- 2.1 Background
- 2.2 Heavy metal poisoning
- 2.3 The role of heavy metals as pollutants
- 2.4 Bioavailability of heavy metals for aquatic organisms
- 2.5 Effects of heavy metal pollution on aquatic ecosystems
- 2.6 Methods of taking heavy metals from the bodies of organisms
- 2.7 Methods of accumulation and disposal of metals
- 2.8 Identification and adjustment of concentrations of metals in tissue
- 2.9 Conclusions
- References
  
- **Chapter 3. Effects of heavy metals and pesticides on fish**
- Abstract
- 3.1 Introduction
- 3.2 Toxicity due to pesticides in fish
- 3.3 Disadvantages of pesticides
- 3.4 Routes of pesticide exposure in fish
- 3.5 Effects of pesticides on fish
- 3.6 Acute toxicity of insecticides
- 3.7 Chronic toxicity of insecticides
- 3.8 Reproductive dysfunction

- 3.9 Developmental disorders
- 3.10 Toxicity due to heavy metals in fish
- References
  
- **Chapter 4. Pesticide toxicity and bacterial diseases in fishes**
- Abstract
- 4.1 Introduction
- 4.2 Fish: an important resource
- 4.3 Fish as indicators of pollution
- 4.4 The impact of pesticides on fish
- 4.5 Mitigation of the impact of pesticides
- 4.6 Bacterial diseases in fishes
- 4.7 Major bacterial diseases in fish
- 4.8 Control of bacterial fish diseases
- 4.9 Conclusion
- References
  
- **Chapter 5. Impact of aquatic pollution on fish fauna**
- Abstract
- 5.1 Introduction
- 5.2 Sources of pollution
- 5.3 Impacts of heavy metal pollution on fish health
- 5.4 Heavy metal hazards
- 5.5 Fishes as biomarkers
- 5.6 Impact on fish reproduction
- 5.7 Effects of pollution on disease outbreak
- 5.8 Role of heavy metals
- 5.9 Role of hydrocarbons and nitrogenous compounds
- 5.10 Role of pesticides
- 5.11 Conclusion
- References
  
- **Chapter 6. Bacterial diseases in fish with relation to pollution and their consequences—A Global Scenario**
- Abstract
- 6.1 Introduction
- 6.2 The major sources of marine pollution
- 6.3 Bacterial pathologic processes in fish fauna
- 6.4 Impacts of pollution and act
- 6.5 Contaminants in the marine environment
- 6.6 Symbiotic microflora in fish
- 6.7 The marine environment and its issues in India
- 6.8 The outcomes of pollution and bacterial infection in fish fauna
- 6.9 Bacterial pathogens causing diseases in fish due to the effect of marine pollution
- 6.10 Immune responses in fish
- 6.11 Fish diseases and their consequences
- 6.12 Pathogenomics
- 6.13 Plastic pollution cause adverse effects in the marine environment
- 6.14 The impact of plastic pollution in urban India

- 6.15 Substitutive uses
- 6.16 The Gulf of Mannar
- 6.17 Impact on marine environment: pollution in the Bay of Bengal
- 6.18 Interaction between pathogens and aquatic environment
- 6.19 Bacterial fish diseases and their control
- 6.20 Conclusion
- References
- Further reading
  
- **Chapter 7. Common bacterial infections affecting freshwater fish fauna and impact of pollution and water quality characteristics on bacterial pathogenicity**
  - Abstract
  - 7.1 Introduction
  - 7.2 Pollution: impact on bacterial infection in fish populations
  - 7.3 Water quality attributes: impact on bacterial pathogenicity in fish populations
  - 7.4 Common bacteria causing infections in freshwater fish
  - 7.5 Conclusion
  - References
  
- **Chapter 8. Global status of bacterial fish diseases in relation to aquatic pollution**
  - Abstract
  - 8.1 Introduction
  - 8.2 Acidification of bacteria in water
  - 8.3 Impact on fish from pollution
  - 8.4 Impact on fish populations from bacterial diseases
  - 8.5 Consequences of bacterial diseases in fish
  - 8.6 Global status of bacterial disease in fishes
  - 8.7 Toxic bacteria in fishes and their occurrence
  - 8.8 Adverse effects on human health caused by bacterial fish diseases
  - 8.9 Conclusion
  - References
  
- **Chapter 9. Understanding the pathogenesis of important bacterial diseases of fish**
  - Abstract
  - 9.1 Introduction
  - 9.2 Main pathogenesis of bacterial diseases in fish
  - 9.3 Conclusions
  - 9.4 Future perspectives
  - References
  
- **Chapter 10. Evaluation of the Fish Invasiveness Scoring Kit (FISK v2) for pleco fish or devil fish**
  - Abstract
  - 10.1 Introduction
  - 10.2 Invasive risk analysis
  - 10.3 Zone of study

- 10.4 Pleco fish or devil fish (Loricariidae)
- 10.5 Evaluation of the fish Invasiveness Screening Kit (FISK v2)
- 10.6 Conclusions
- Acknowledgments
- References
  
- **Chapter 11. Profiling of common bacterial pathogens in fish**
- Abstract
- 11.1 Introduction
- 11.2 Fish production in Nigeria
- 11.3 Impact of practice
- 11.4 Selected common pathogens of fish in Nigeria
- 11.5 Conclusion
- References
  
- **Chapter 12. Status of furunculosis in fish fauna**
- Abstract
- 12.1 Introduction
- 12.2 Signs of infection
- 12.3 Diagnosis
- 12.4 Transmission
- 12.5 Control of infection
- 12.6 Selection and breeding
- 12.7 Immunization
- 12.8 Treatment
- 12.9 Conclusion and future prospects
- References
  
- **Chapter 13. Bacterial gill disease and aquatic pollution: a serious concern for the aquaculture industry**
- Abstract
- 13.1 Introduction
- 13.2 Bacterial gill disease
- 13.3 History and geographical range
- 13.4 Causative agents
- 13.5 Host species of the disease
- 13.6 Pathology and symptoms
- 13.7 Diagnosis
- 13.8 Control methods
- 13.9 Prophylactic measures
- 13.10 Chemical treatment
- 13.11 Conclusion
- Acknowledgements
- References
  
- **Chapter 14. Common bacterial pathogens in fish: An overview**
- Abstract
- 14.1 Introduction
- 14.2 Gram-negative bacterial pathogens
- 14.3 Gram-positive bacterial pathogens

- 14.4 Conclusion
- Acknowledgement
- References
  
- **Chapter 15. Bacterial diseases in cultured fishes: an update of advances in control measures**
- Abstract
- 15.1 Introduction
- 15.2 Preventive measures against diseases: possible outlook
- 15.3 Conclusion
- References
  
- **Chapter 16. Ulceration in fish: causes, diagnosis and prevention**
- Abstract
- 16.1 Introduction
- 16.2 Ulceration and its causes in different fish species
- 16.3 Diagnostic methods
- 16.4 Preventive measures
- 16.5 Conclusion
- Acknowledgements
- Funding
- Competing interest
- Conflict of interest
- Data availability statement
- References
  
- **Chapter 17. Application of probiotic bacteria for the management of fish health in aquaculture**
- Abstract
- 17.1 Introduction
- 17.2 Probiotics definition
- 17.3 Routes of administration
- 17.4 Significant factors governing the advantages of probiotic form of administration
- 17.5 Rationale for use of probiotics in aquaculture
- 17.6 Selection criteria for probiotics
- 17.7 Probiotics formulation and commercialization
- 17.8 Classification of probiotics in aquaculture
- 17.9 Use of probiotics
- 17.10 Safety and evaluation of probiotics
- 17.11 Research gaps and future research plans
- 17.12 Conclusion
- References
  
- **Chapter 18. Efficacy of different treatments available against bacterial pathogens in fish**
- Abstract
- 18.1 Introduction
- 18.2 Bacterial infections occurring in freshwater fish
- 18.3 Emerging potential pathogens of freshwater fish

- 18.4 Treatment of bacterial pathogens in fish
- 18.5 Treatment with beneficial gram-negative and gram-positive bacteria
- 18.6 Bioremediation (improving water quality)
- 18.7 Vaccination
- 18.8 Immunomodulation
- 18.9 Bacteriophage therapy
- 18.10 Phage therapy dosage
- References
  
- **Chapter 19. Summary of economic losses due to bacterial pathogens in aquaculture industry**
- Abstract
- 19.1 Introduction
- 19.2 Principal fish species produced in the aquaculture industry worldwide
- 19.3 Principal causes of economic loss in the aquaculture industry
- 19.4 Pathogens that causes economic loss in the aquaculture industry
- 19.5 Identification of bacterial diseases in fish farms
- 19.6 Analysis of a fish farm system in Huasteca Potosina, Mexico
- 19.7 Conclusions
  
- References
  
- **Index.**
