

TABLE OF CONTENTS

Biotechnologies Applied to Animal Reproduction: Current Trends and Practical Applications for Reproductive Management

Part 1: Bovine

1. Bovine Reproductive Management

José Javier De La Mata and Gabriel A. Bó

2. Ultrasonography in Bovine Gynecology

Giovanni Gnemmi, Juan Carlos Gardón, and Cristina Maraboli

3. Ultrasonography of the Bovine Reproductive System: Ultrasound Management of the Male Reproductive System

Giovanni Gnemmi, Juan Carlos Gardón, and Cristina Maraboli

4. Postpartum Management in Dairy Cows

Giovanni Gnemmi, Juan Carlos Gardón, and Cristina Maraboli

5. Reproductive Efficiency in Dairy Cows: Changing Trends!!

Ana Heras-Molina, José Luis Pesantez Pacheco, and Susana Astiz

6. Ovum Pick-Up (OPU) in Cattle: An Update

Salvador Ruiz López

Part 2: Equine

7. Clinical Endocrinology of Pregnant Mares

Katy Satué and María Marcilla

8. Equine Semen Preservation: Current and Future Trends

Lydia Gil Huerta, Cristina Álvarez, and Victoria Luño Lázaro

Part 3: Porcine

9. The Journey of the Porcine Spermatozoa from Its Origin to the Fertilization Site:
The Road in vivo Vs.in vitro

Cristina Soriano-Úbeda, Francisco Alberto García-Vázquez, and Carmen Matás

10. Reproductive Biotechnologies Applied to Artificial Insemination in Swine

Francisco Alberto García-Vázquez et al.
