

TABLE OF CONTENTS

Canine and Feline Epilepsy Diagnosis and Management

Chapter: 1 Pathophysiology of seizure activity.

Chapter: 2 Pathophysiology of pharmacoresistant epilepsy.

Chapter: 3 Classification of seizures and epilepsies.

Chapter: 4 Reactive seizures.

Chapter: 5 Structural epilepsy.

Chapter: 6 Idiopathic epilepsy and genetics.

Chapter: 7 Epidemiology of canine seizures.

Chapter: 8 Epidemiology of feline seizures.

Chapter: 9 Mimics of seizure activity: disorders confused with epilepsy.

Chapter: 10 Clinical and diagnostic investigation of the seizure patient.

Chapter: 11 Introduction to electroencephalography.

Chapter: 12 Principles of anti-epileptic treatment.

Chapter: 13 Phenobarbital.

Chapter: 14 Bromide.

Chapter: 15 Zonisamide.

Chapter: 16 Levetiracetam.

Chapter: 17 Gabapentin and pregabalin.

Chapter: 18 Felbamate.

Chapter: 19 Topiramate.

Chapter: 20 The new additions: lacosamide, brivaracetam and rufinamide.

Chapter: 21 Benzodiazepines.

Chapter: 22 Imepitoin (Pexion®).

Chapter: 23 Pathophysiology and management of cluster seizures.

Chapter: 24 Pathophysiology and management of status epilepticus.

Chapter: 25 Novel and adjunctive treatments.
