

TABLE OF CONTENTS

Case Studies in Cardiothoracic Medicine

1. CARDIAC CASE STUDIES

Acquired heart disease

Case 1. Myxomatous mitral valve disease

Case 2. Dilated cardiomyopathy

Case 3. Hypertrophic cardiomyopathy

Case 4. Arrhythmogenic right ventricular cardiomyopathy

Case 5. Cardiac haemangiosarcoma

Case 6. Heart base tumour

Case 7. Infective endocarditis

Arrhythmias

Case 8. Ventricular tachycardia

Case 9. Supraventricular tachycardia

Case 10. Third-degree atrioventricular block

Case 11. Sick sinus syndrome

Congenital heart disease

Case 12. Pulmonic stenosis

Case 13. Subaortic stenosis

Case 14. Patent ductus arteriosus

Case 15. Ventricular septal defect

Case 16. Tricuspid valve dysplasia

Case 17. Mitral valve dysplasia

Case 18. Tetralogy of Fallot

Case 19. Atrioventricular septal defect

Case 20. Cor triatriatum dexter

Case 21. Divided left atrium

2. RESPIRATORY CASE STUDIES

Pulmonary disease

Case 22. Feline asthma

Case 23. Bronchial foreign body

Case 24. Aspiration pneumonia

Case 25. Eosinophilic bronchopneumopathy

Case 26. Idiopathic pulmonary fibrosis

Case 27. Pneumocystic pneumonia. *Pneumocystis carinii*

Case 28. Parasitic pneumonia. *Angiostrongylus vasorum*

Pleural disease

Case 29. Spontaneous pneumothorax

Case 30. Idiopathic chylothorax

Mediastinal disease

Case 31. Thymoma

Case 32. Vascular ring anomalies. Persistent right aortic arch
