

# TABLE OF CONTENTS

## PART I: NORMAL ECHOCARDIOGRAPHIC EXAMINATION

### **Chapter 1:** Normal Views: 2D, TM, Spectral and Color Doppler Modes

Eric de Madron

- The different modes
- General considerations
- Normal bi-dimensional views
- Normal spectral Doppler examination
- Color Doppler

### **Chapter 2:** Normal Echocardiographic Values: 2D, TM and Spectral Doppler Modes

Eric de Madron

- Normal TM and 2D values
- Normal spectral Doppler values

### **Chapter 3:** Intraoperator and Interoperator Variability

Valerie Chetboul

- Repeatability, reproducibility and operator performance
- Operator effect on the variability of echocardiographic measurements
- Practical implications

## PART II: NEW TECHNIQUES OF ULTRASONOGRAPHIC CARDIAC IMAGING

### **Chapter 4:** Myocardial Tissue Doppler, Derived Techniques and Speckle Tracking Imaging

Valerie Chetboul

- Normal myocardial kinetics
- Myocardial Tissue Doppler or Tissue Doppler imaging (TDI)
- Derived techniques from TDI: tissue tracking imaging, strain and strain rate imaging
- Speckle tracking imaging

### **Chapter 5:** Trans-Esophageal Echocardiography

Claudio Bussadori

- Introduction and technical aspects
- Considerations with respect to the echocardiographer
- ETO examination protocol
- Indications and applications of ETO

### **Chapter 6:** Veterinary Applications of Three-Dimensional Echocardiography

Claudio Bussadori

- 3D echocardiography technology
- The different modes of 3D echocardiography
- 3D echocardiography in veterinary medicine
- Patent ductus arteriosus
- Pulmonic valve valvuloplasty

## **PART III: HEMODYNAMIC EVALUATION**

### **Chapter 7: Global Left Ventricular Systolic Function Evaluation**

Eric de Madron

- Left ventricular anatomy
- Radial systolic function: shortening fraction
- Systolic indices derived from ventricular volumes
- Longitudinal systolic function evaluation
- Spectral Doppler indices: systolic time intervals and index of myocardial performance (Tei index)

### **Chapter 8: Diastolic Function Evaluation**

Eric de Madron

- Phases of diastole and its determinants
- Types of diastolic dysfunctions
- Echocardiographic indices of diastolic function

### **Chapter 9: Echocardiographic Assessment of the Left Ventricular Filling Pressure**

Eric de Madron

- Left atrial pressure curve
- Echocardiographic indices of the left ventricular filling pressure
- Other echocardiographic criteria

### **Chapter 10: Right Ventricular Systolic Function Evaluation**

Eric de Madron

- Radial right ventricular systolic function: right ventricular shortening fractions
- Longitudinal right ventricular systolic function assessment
- Systolic time intervals and index of myocardial performance (Tei index)
- Spectral Doppler indices

## **PART IV: ECHOCARDIOGRAPHY OF ACQUIRED HEART DISEASES**

### **Chapter 11: Evaluation and Quantification of Acquired Valvular Regurgitations in the Dog**

Eric de Madron

- Mitral regurgitation
- Tricuspid regurgitation
- Aortic regurgitation
- Pulmonic regurgitation

### **Chapter 12: Canine Dilated Cardiomyopathy and Other Cardiomyopathies**

Valerie Chetboul

- Primary dilated cardiomyopathy
- Other cardiomyopathies

### **Chapter 13: Feline Cardiomyopathies Assessment**

Eric de Madron

- Hypertrophic cardiomyopathies
- Restrictive cardiomyopathies
- Dilated cardiomyopathies
- Atypical cardiomyopathies

- Thrombotic risk evaluation

#### **Chapter 14: Pulmonary Hypertension**

Valerie Chetboul

- Review of pulmonary arterial hypertension (PAH)
- Conventional echocardiography and PAH
- Conventional Doppler and PAH
- New imaging modalities and PAH

#### **Chapter 15: Dirofilariosis: Specific Bi-Dimensional Findings**

Eric de Madron

- Echocardiographic characteristics of dirofilaria
- Other echocardiographic anomalies associated with dirofilariosis

#### **Chapter 16: Cardiac Manifestations of Systemic Diseases**

Valerie Chetboul, Eric de Madron

- Systemic arterial hypertension
- Hyperthyroid cardiopathy
- Anemia

#### **Chapter 17: Pericardial Diseases**

Eric de Madron

- Pericardial anatomy and function
- Pericardial effusions
- Constrictive pericarditis
- Congenital pericardial defects

#### **Chapter 18: Cardiac Tumors**

Claudio Bussadori

- Types of tumors and prevalence
- Goals of echocardiography in the assessment of cardiac tumors
- Specific echocardiographic presentation

### **PART V: CONGENITAL CARDIOPATHIES**

#### **Chapter 19: Congenital Cardiopathies**

Claudio Bussadori

- Aortic stenosis
- Pulmonic stenosis
- Patent ductus arteriosus
- Ventricular septal defects
- Atrial septal defects
- Mitral valve dysplasia
- Tricuspid valve dysplasia
- Tetralogy of Fallot
- Cor triatriatum
- Endocardial cushion defects

**Chapter 20: Echocardiographic Assessment of Congenital Cardiopathies Before and After Intervention**

Claudio Bussadori

- Valvular pulmonic stenosis
- Patent ductus arteriosus
- Ventricular septum defects
- Atrial septal defects.
