

# TABLE OF CONTENTS

- ☐ Restraint, handling and administration of medicines
- ☐ Routine surgical procedures eg. neutering, caesarean section, cat bite abscesses, aural haematoma, removal of grass seeds, dental scaling and extractions. In many cases detailed illustrations and photographs will facilitate understanding.
- ☐ Suturing techniques – all types
- ☐ Laboratory procedures
- ☐ Bandaging techniques – veterinary surgeons often leave this to the nurses but should be able to perform the techniques themselves.
- ☐ Diagnostic imaging – mainly covering radiographical positioning and use of ultrasound.
- ☐ Anaesthesia – type and choice of circuits, regional anaesthesia
- ☐ Basic procedures used in the consulting room eg. squeezing anal glands, clipping nails, clipping beaks, examination of ears and eyes.
