

# TABLE OF CONTENTS

## Section 1 Understanding clinical reasoning

1. Clinical reasoning: Challenges of interpretation and practice in the 21st century
2. Re-interpreting clinical reasoning: A model of encultured decision making practice capabilities
3. Multiple spaces of choice, engagement and influence in clinical decision making
4. Clinical reasoning and models of practice
5. The development of clinical reasoning expertise
6. Expertise and clinical reasoning

## **Section 2 The changing context of clinical reasoning and practice**

7. The context of clinical reasoning across the health professions in the 21st century
8. Changing demographic and cultural dimensions of populations: Implications for healthcare and decision making
9. Clinical thinking, client expectations and patient-centred care
10. Next generation clinical practice guidelines
11. Action and narrative: Two dynamics of clinical reasoning
12. The language of clinical reasoning
13. Evidence-based practice and clinical reasoning: In tension, tandem or two sides of the same coin?
14. Methods in the study of clinical reasoning

## **Section 3 Collaborative and transdisciplinary reasoning**

15. Collaborative decision making in liquid times
16. Ethical reasoning
17. Shared decision making in practice
18. Using decision aids to involve clients in clinical decision making
19. Clinical decision making, social justice and client empowerment
20. Clinical decision making across orthodox and complementary medicine fields

## **Section 4 Clinical reasoning and the professions**

21. Clinical reasoning in medicine
22. Clinical reasoning in nursing
23. Clinical reasoning in physiotherapy
24. Clinical reasoning in dentistry
25. Clinical reasoning in occupational therapy
26. Clinical decision making in emergency medicine
27. Clinical decision making in paramedicine
28. Clinical decision making in optometry
29. Clinical reasoning in dietetics

30. Clinical reasoning in pharmacy

### **Section 5 Teaching clinical reasoning**

- 31. Pedagogies for teaching and learning clinical reasoning
- 32. Teaching clinical reasoning in medical education courses
- 33. Teaching clinical reasoning in nursing education
- 34. Speech-language pathology students: Learning clinical reasoning
- 35. Clinical reasoning and biomedical knowledge: Implications for teaching
- 36. Cultivating a thinking surgeon, using a Clinical Thinking Pathway as a learning and assessment process: ten years on
- 37. Interprofessional programs to develop clinical reasoning
- 38. Assessing clinical reasoning

### **Section 6 Learning clinical reasoning+**

- 39. Learning to communicate clinical reasoning
- 40. Developing clinical reasoning capability
- 41. Remediating learning and performance of clinical reasoning in medicine
- 42. Learning about factors influencing clinical decision making
- 43. Learning reasoning using simulation
- 44. Learning to use evidence to support decision making
- 45. Learning to research clinical reasoning
- 46. Learning clinical reasoning across cultural contexts
- 47. Peer learning to develop clinical reasoning abilities
