

TABLE OF CONTENTS

Current Therapy in Equine Reproduction

Section I — The Normal Female Reproductive System

1. Ovulation and Corpus Luteum Development
2. The Follicle: Practical Aspects of Follicle Control
3. Estrus Synchronization
4. Estrus Suppression
5. The Normal Uterus in Estrus
6. Intrauterine Diagnostic Procedures
7. Uterine Contractility

Section II — Female Reproductive Problems: Diagnosis and Management

8. Fertility Expectations and Management of Optimal Fertility
9. Endocrine Tests
10. Cytogenic Evaluation
11. Diagnosis of Oviductal Disorders and Diagnostic Techniques
12. Ovulation Failure
13. Ovarian Abnormalities

14. Uterine Therapy for Mares with Fluid
15. Uterine Therapy for Mares with Bacterial Infections
16. Treatment of Fungal Endometritis
17. Management Regimens for Uterine Cysts
18. Some Unusual Conditions of the Uterus
19. Congenital Abnormalities Involving the Cervix and Uterus
20. Cervical Tears
21. Cervical Failure to Dilate
22. Cervical Adhesions
23. Vulvar Conformation
24. Selective Reproductive Surgery of the Broodmare
25. Infectious and Neoplastic Conditions of the Vulva and Perineum

Section III — The Normal Male Reproductive System

26. Anatomy and Examination of the Normal Testicle
27. The Epididymis
28. Behavior of the Normal Stallion

Section IV — Male Reproductive Problems: Diagnosis and Management

- 29. Testicular Descent and Cryptorchidism
- 30. Testicular Abnormalities
- 31. Testicular Biopsy
- 32. Spermatogenic Arrest (Testicular Degeneration)
- 33. Endoscopy of the Reproductive Tract in the Stallion
- 34. Penile Abnormalities
- 35. Penile Infections
- 36. Trauma to the Penis
- 37. Significance of Bacteria Affecting the Stallion's Reproductive System
- 38. The Subfertile Stallion
- 39. Endocrine Diagnostics and Therapeutics for the Stallion with Declining Fertility

Section V — Semen Collection and Evaluation

- 40. Evaluation of Raw Semen
- 41. Urospermia and Hemospermia
- 42. Transmission of Diseases Through Semen
- 43. Advanced Semen Test for Stallions

44. Preservation of Genetics from Dead and Dying Stallions

45. Insemination with Frozen Semen: Some Management Considerations for Stallions

Section VI — Assisted Reproductive Techniques

46. Collection and Transfer of Oocytes in Mares

47. Intracytoplasmic Sperm Injection

48. In Vitro Fertilization

49. In Vitro Oocyte Maturation

50. Low-Dose Insemination Techniques

51. Embryo Transfer and Related Technologies

Section VII — The Pregnant Mare: Diagnosis and Management

52. Pregnancy Diagnosis in the Mare

53. Fetal Sex Determination

54. Twin Reduction Techniques

55. Early Embryonic Loss

56. Mare Reproductive Loss Syndrome

57. Maintenance of Pregnancy

58. Late Term Pregnancy Monitoring

59. Dystocia and Fetotomy

60. Premature Lactation in Mares

61. Mastitis

62. Normal Prefoaling Mammary Secretions

63. Colostrum

Section VIII — The Post-Foaling Mare

64. The Postpartum Mare

65. Prefoaling and Postfoaling Complications

66. Postparturient Abnormalities.
