

Table of contents

List of Contributors xiii

Preface xv

1 Introduction 1

Brian Austin and Aweeda Newaj-Fyzul

Conclusion 3

References 3

2 Bacterial Diagnosis and Control in Fish and Shellfish 5

Mags Crumlish

Introduction 5

Bacterial Infections in Aquaculture 5

Bacterial Disease Diagnostics and Control of Infections 6

Modern Approaches in Bacterial Diagnostics 9

Control Strategies Against Bacterial Diseases 10

Emerging Bacterial Diseases 11

Climate Change and Aquatic Bacterial Disease 12

Polymicrobial and Concurrent Infections 13

Public Health and Aquaculture 13

Conclusion 14

References 14

3 Complexities of Diagnostics of Viruses Affecting Farmed Aquatic Species 19

Manfred Weidmann

References 29

4 Parasitic Diseases in Aquaculture: Their Biology, Diagnosis and Control 37

Giuseppe Paladini, Matt Longshaw, Andrea Gustinelli, and Andrew P. Shinn

Introduction 37

Protista 38

Biology and Taxonomy	38
Life-Cycle	38
Public Health	38
Significant Pathogens within the Group	40
Reviews	40
Identification	41
Diagnostic Methods	41
Myxozoa	42
Biology and Taxonomy	42
Life-Cycle	42
Public Health	43
Significant Pathogens within the Group	43
Reviews	43
Identification	43
Diagnostic Methods	43
Mesomycetozoea, Fungi and Fungal-Like Organisms	44
Biology and Taxonomy	44
Life-Cycle	44
Public Health	45
Significant Pathogens within the Group	45
Reviews	46
Identification	46
Diagnostic Methods	46
Monogenea	46
Biology and Taxonomy	46

Life-Cycle	48
Public Health	48
Significant Pathogens within the Group	49
Reviews	49
Identification	49
Diagnostic Methods	49
Digenea	50
Biology and Taxonomy	50
Life-Cycle	52
Public Health	52
Significant Pathogens within the Group	53
Reviews	54
Identification	54
Diagnostic Methods	54
Cestoda	55
Biology and Taxonomy	55
Life-Cycle	55
Public Health	56
Significant Pathogens within the Group	57
Reviews	57
Identification	57
Diagnostic Methods	57
Nematoda	58
Biology and Taxonomy	58
Life-Cycle	58

Public Health 59

Significant Pathogens within the Group 59

Reviews 60

Identification 60

Diagnostic Methods 60

Acanthocephala 60

Biology and Taxonomy 60

Life-Cycle 61

Public Health 62

Significant Pathogens within the Group 62

Reviews 62

Identification 62

Diagnostic Methods 63

Arthropoda 63

Biology and Taxonomy 63

Life-Cycles 63

Parasitic Copepods 63

Isopods 65

Branchiurans 65

Public Health 65

Significant Pathogens within the Group 66

Reviews 66

Taxonomy and Systematics 66

Identification 67

Diagnostic Methods 68

Treatment, Prophylaxis and Farm Management Practices 69

Chemical Approaches 69

Reviews 70

Parasiticide Mode of Action 71

Non-Chemical Approaches in Parasite Control 72

Biosecurity 72

Farm Infrastructure 72

Husbandry-Based Practices 73

Diet 74

Biological Interventions 74

Genetic Breeding Programmes 74

Physical Measures 75

Mechanical Measures 75

Conclusion 76

References 77

5 Modern Methods of Diagnosis 109

Ahran Kim, Thanh Luan Nguyen, and Do-Hyung Kim

Introduction 109

Diagnostic Methods for Aquatic Diseases 110

Conventional Methods 110

Histopathology 110

Parasitology 110

Bacteriology 111

Virology 111

Immunoserological Methods 112

Monoclonal and Polyclonal Antibodies 112

Enzyme-linked Immunosorbent Assay	114
Immunofluorescence Test	114
Immunohistochemistry (IHC)	117
Lateral Flow Immunoassay	119
Molecular Methods	121
Hybridization Methods	121
Nucleic Acid Amplification Methods	123
Molecular Typing Methods	128
Future Diagnostic Methods	129
Nanotechnology-based Strategies for Rapid Detection of Fish Pathogens	129
MALDI-TOF Mass Spectrometry for Microbial Identification	130
High-throughput Sequencing Technologies	132
Whole-genome Sequencing of Bacterial Pathogens	132
Metagenomics Approaches for Pathogen Detection	134
Conclusion	135
References	137

6 Immunostimulant Diets and Oral Vaccination In Fish 147

Eva Vallejos-Vidal, Felipe Reyes-López, and Simon MacKenzie

Introduction	147
Commonly Measured Immunological Parameters	148
Plant, Herbal and Algal Extracts	150
Plant and Herb Extracts	151
Andrographis paniculata	151
Aloe barbadensis	151
Chinese Herbs	152
Azadirachta indica	152

- Camellia sinensis* 152
Cedrus deodara 153
Citrus sinensis 153
Coffea arabica 153
Echinacea 153
Eclipta alba 154
Mentha piperita 154
Ocimum sanctum (Tulsi, Queen of Plants) 154
Psidium guajava L 154
Rehmannia glutinosa 154
Rhizophora apiculata 155
Cotinus coggyria 155
Urtica dioica 155
Viscum album coloratum 155
Zingiber officinale 156
Algae and Fungi Extracts 156
Astaxanthin 156
Navicula 156
Porphyridium cruentum 157
Spirulina platensis 157
Ganoderma lucidum 158
Lentinula edodes 158
Diets Containing Pathogen-Associated Molecular Patterns 158
Beta-Glucan 158
Saccharomyces cerevisiae 161

Chitin	162
Receptors Mediating Immunostimulation Via PAMPs	162
Oral Vaccination	164
Gut Immunity	165
Non-encapsulated Vaccines	166
Encapsulated Oral Vaccines	166
Future Perspectives	167
References	168

7 Prebiotics and Synbiotics 185

Seyed Hossein Hoseinifar, Yun-Zhang Sun, and Zhigzhang Zhou

The Interactions between Feed Additives and Diseases of Fish and Shellfish	185
Prebiotics and Synbiotics: Definition and History	185
Mode of Actions on Disease Resistance	186
Strengthening the Immune Response	186
Conclusion	187
References	187

8 Probiotics for Disease Control in Aquaculture 189

S.M. Sharifuzzaman and Brian Austin

Introduction	189
Definition of Probiotics	190
Source of Probiotics	191
Application Methods and Options	192
Delivery Method	192
Dosage, Frequency and Duration of Administration	193
Use of Single Strain or Combinations	194
Dead, Inactivated or Cell Component	194

Range of Probiotics and their Efficacy 195

Modes of Action 204

Example of Commercial-Scale Application 207

Safety and Regulatory Issues 208

Conclusion 208

References 209

9 Use of Medicinal Plants in Aquaculture 223

Mirian Reverter, Nathalie Tapissier-Bontemps, Pierre Sasal, and Denis Saulnier

Introduction 223

Medicinal Plants in Aquaculture 224

Biological Activity of Medicinal Plants in Aquaculture 224

Application of Medicinal Plants in Aquaculture 225

Analysis of Plants Used in Aquaculture 227

Plant Orders Most Frequently Used in Aquaculture 239

Lamiales 239

Fabales 241

Asterales 241

Malpighiales 242

Plant Species Most Widely Used in Aquaculture 242

Analysis of Plant Bioactivity 243

Analysis of Plant Parts Used in Aquaculture 244

Other Plants and Perspectives 244

Conclusion 245

References 246

10 Antibiotics and Disinfectants 263

Brian Austin

Introduction	263
Antibiotics	264
Chemotherapy Regimes	264
Bacterial Kidney Disease (BKD)	264
<i>Chryseobacterium scophthalmum</i>	267
Cold-Water Disease/Rainbow Trout Fry Syndrome (RTFS)	267
Cold-Water Vibriosis	267
Columnaris	267
Edwardsiellosis (<i>Edwardsiella ictaluri</i>)	267
Edwardsiellosis (<i>E. tarda</i>)	267
Enteric Redmouth (ERM)	267
Flavobacteriosis	268
<i>Flavobacterium johnsoniae</i>	268
Francisellosis	268
Furunculosis; Carp Erythrodermatitis; Goldfish Ulcer Disease	268
Gaffkemia	268
Lactococcosis and Streptococcosis	268
Motile Aeromonas Septicaemia (<i>Aeromonas hydrophila</i>)	269
Mycobacteriosis	269
Nocardiosis	269
Pasteurellosis	269
<i>Plesiomonas shigelloides</i>	269
Rickettsiosis	269
Sekiten byo; Red Spot	269
<i>Sporocytophaga</i> sp.	269

- Staphylococcus aureus 269
- Staphylococcus epidermidis 269
- Tenacibaculum maritimum 269
- Vibriosis (*Vibrio anguillarum*; *V. ordalii*) 270
- Vibrio alginolyticus* 270
- Vibrio harveyi* 270
- Vibrio pelagius* 270
- Vibrio splendidus* 270
- Disinfectants 270
- Disinfectant Regimes 271
- Aeromonas* Septicaemia; Fin/Tail Rot 271
- Amoebic Gill Disease (AGD) and Sea Lice 271
- Bacterial Gill Disease 271
- Bacterial Kidney Disease 271
- Botulism 271
- Citrobacter freundii* 271
- Cold-Water Disease 271
- Columnaris 271
- Columnaris and *Ichthyobodo necator* – Concurrent Infections 272
- Crayfish Plague 272
- Flavobacterium johnsoniae* 272
- Gyrodactylus salaris* 272
- Infectious Haematopoietic Necrosis (IHN) 272
- Infectious Pancreatic Necrosis (IPN) 272
- Mycobacteriosis 272

Pseudomonas fluorescens 272

Sporocytophaga sp. 273

Conclusion 273

References 273

11 Management Techniques and Disease Control 279

Aweeda Newaj-Fyzul and Brian Austin

Introduction 279

Disinfection 279

Hygiene 280

Acquisition of New Stock 280

Stocking Levels 280

Water Flow and Aeration 280

Feed/Feeding Regimes 281

Vermin 281

References 281

12 Conclusions 283
