

TABLE OF CONTENTS

Ecotoxicology of Marine Organisms

Environmental Disturbance Caused by Stressors: Changing the Focus from Individuals to Habitats.

Toxicity of Rare Earth Elements to Marine Organisms.

Chemical Contaminants in a Changing Ocean.

Effects of Harmful Algal Bloom Toxins on Marine Organisms.

Overview of Phytoplankton Indicators and Biomarkers as Key-Tools for Trace Element Contamination Assessment in Estuaries.

Phytoremediation and Removal of Contaminants by Algae and Seagrasses.

Ecotoxicology of Pharmaceuticals in Coastal and Marine Organisms.

Mercury Exposure, Fish Consumption and Provisional Tolerable Weekly Intake: An Overview.

Contaminants Impact on Marine Turtle Populations Development: An Overview.
