

- Heart murmurs and gallop heart sounds
- Exercise intolerance and syncope
- Pleural effusion
- Dyspnea and cough
- Cardiopulmonary arrest and cardiopulmonary cerebral resuscitation
- Radiography
- Echocardiography
- Cardiac biomarkers
- Electrocardiography
- Congenital heart malformations
- Hypertrophic cardiomyopathy
- Restrictive/unclassified cardiomyopathy
- Dilated cardiomyopathy
- Arrhythmogenic right ventricular cardiomyopathy
- Acquired valvular disease
- Cardiac neoplasia
- Miscellaneous myocardial disease
- Arrhythmias and other electrocardiographic abnormalities
- Congestive heart failure
- Arterial thromboembolism
- Systemic hypertension
- Pericardial effusion and other disorders of the pericardium
- Heartworm disease
- Comorbidities : managing cats that have coexistent cardiac disease and extracardiac disorders
- Pulmonary thromboembolism and pulmonary hypertension
- Endocrine diseases affecting the heart
- Anesthesia in the patient with cardiac disease
- Cardiac screening programs
- Which drug for which disease?
- Drug formulary
