

TABLE OF CONTENTS

Food Animal Practice : Volume 5 in the Series Current Therapy

SECTION 1: DIGESTIVE SYSTEM

1. Pharyngeal lacerations and retropharyngeal abscesses in cattle
2. Vesicular diseases of ruminants
3. Actinomycosis and actinobacillosis
4. Esophageal obstruction (choke)
5. Bloat or ruminal tympany
6. Function and dysfunction of the ruminant forestomach
7. Simple indigestion and secondary indigestion
8. Ruminal acidosis and rumenitis
9. Rumenotomy and rumenostomy
10. Abomasal ulcers
11. Abomasal emptying defect in sheep
12. Pathophysiology of displacement of the abomasum in cattle

13. Surgical considerations for management of displacement of the abomasum in cattle
14. Prognostic indicators and comparison of corrective fixation techniques for displacement of the abomasum in dairy cattle
15. Laparoscopic abomasopexy for correction of left displaced abomasum
16. Hepatotoxicities of ruminants
17. Hemorrhagic bowel syndrome
18. *Clostridium novyi* (myonecrosis, black disease, and bacillary hemoglobinuria) and *Clostridium septicum* (braxy) infections
19. Clostridial Enterotoxemia (*Clostridium perfringens*)
20. Johne's disease (paratuberculosis)
21. Neonatal calf diarrhea
22. Helminth parasites of the ruminant gastrointestinal tract
23. Gastrointestinal protozoal infections in ruminants
24. Bovine viral diarrhea virus
25. Salmonellosis
26. Winter dysentery
27. Duodenal obstruction

28. Trichobezoars

29. Intussusception

30. Intestinal volvulus

31. Intestinal atresia

32. Rectal prolapse

SECTION 2: METABOLIC SYSTEM

33. Milk fever (parturient paresis) in cows, ewes, and doe goats

34. Phosphorus deficiency

35. Ruminant hypomagnesemic tetanies

36. Ketosis

37. Pregnancy toxemia of ewes

38. Fatty liver in dairy cattle

39. Clinical use of ultrasound for subcutaneous fat thickness measurements in dairy cattle

40. Metabolic profile testing in dairy cattle

SECTION 3: RESPIRATORY SYSTEM

41. Mannheimia haemolytica– and Pasteurella multocida–induced bovine pneumonia

42. Bovine respiratory disease virology

43. Mycoplasmas in bovine respiratory disease

44. Sheep and goat respiratory disease

45. Diseases of the upper respiratory system in cattle, sheep, and goats

46. Surgery of the upper respiratory tract

47. Surgery of the thorax

SECTION 4: CARDIOVASCULAR SYSTEM

48. Examination of the bovine patient with heart disease

49. Congenital heart disease in cattle

50. Acquired heart diseases in cattle

SECTION 5: MUSCULOSKELETAL SYSTEM

51. Noninfectious disorders of the foot

52. Infectious disorders of the foot skin

53. Surgery of the bovine digit

54. Small ruminant infectious disease of the foot

55. Fracture management in cattle

56. Septic arthritis in cattle

57. Osteochondrosis in cattle

58. Ligament injuries of the stifle

59. Coxofemoral luxation

60. Hygroma of the carpus and tarsus

SECTION 6: NEUROLOGICAL SYSTEM

61. Clinical examination

62. Ancillary tests

63. Muscular tone and gait abnormalities

64. Cranial nerve abnormalities

65. Mentation abnormality, depression, and cortical blindness

66. Central nervous system infection and infestation

SECTION 7: URINARY SYSTEM

67. Urolithiasis

68. Urinary tract infection in food animals

69. Neonatal urinary disorders

70. Ulcerative posthitis

71. Bovine enzootic hematuria

72. Surgery of the urinary tract

SECTION 8: GENITAL SURGERY – MALE

73. Diagnosis and management of juvenile anomalies of the penis and prepuce

74. Diagnosis and management of penile deviations

75. Diagnosis and management of injuries to the penis and prepuce of bulls

76. Diagnosis and management of inguinal hernia in bulls

77. Diagnosis and management of conditions of the scrotum and testes

78. Preparation of teaser bulls, rams, and bucks

SECTION 9: GENITAL SURGERY – FEMALE

79. Bovine cesarean sections: risk factors and outcomes

80. Surgery of the vagina and nonpregnant uterus

81. Umbilical surgery in calves

82. Diagnosis and management of teat injury

83. Laparoscopy in large animal surgery

SECTION 10: OPHTHALMOLOGY

- 84. Ophthalmic examination techniques for production animals
- 85. Selected eye diseases of cattle
- 86. Selected eye diseases of sheep and goats
- 87. Ophthalmology of South American camelids: llamas, alpacas, guanacos, and vicunas
- 88. Selected eye diseases of swine
- 89. Food animal ocular neoplasia
- 90. Neurogenic vision loss
- 91. Ophthalmic therapeutics
- 92. Enucleation in the bovine

SECTION 11: PHARMACOLOGY AND THERAPEUTICS

- 93. Ethical responsibilities of bovine veterinarians in selecting and using therapeutic drugs
- 94. Ethical responsibilities of small ruminant veterinarians in selecting and using therapeutics
- 95. Practical pharmacokinetics for the food animal practitioner
- 96. The Food Animal Residue Avoidance Databank (FARAD) and related drug regulations

97. Anthelmintic therapy in an era of resistance

98. Antimicrobial resistance in human pathogens and the use of antimicrobials in food animals: challenges in food animal veterinary practice

99. Evidence-based veterinary medicine – therapeutic considerations

100. Therapeutic options in organic livestock medicine

101. Decision making in mastitis therapy

102. Respiratory disease treatment considerations in feedyards

103. Antibiotic treatment of diarrhea in preweaned calves

104. Fluid therapy, transfusion, and shock therapy

105. Pain management in cattle and small ruminants

SECTION 12: CHEMICAL RESTRAINT, GENERAL ANESTHESIA, AND PAIN MANAGEMENT

106. Chemical restraint in ruminants

107. General anesthesia in ruminants

108. Managing severe pain in ruminants

SECTION 13: COW-CALF/SMALL RUMINANT PRODUCTION MEDICINE

109. Marketing beef cow-calf production medicine in private practice

110. Economic analysis techniques for the cow-calf practitioner

- 111. Cow-calf operation beef quality assurance (BQA)
- 112. Biosecurity for cow-calf enterprises
- 113. Management of neonatal diarrhea in cow-calf herds
- 114. Calf preweaning immunity and impact on vaccine schedules
- 115. Beef heifer development
- 116. Investigation and abortion and fetal loss in the beef herd
- 117. Addressing high dystocia incidence in cow-calf herds
- 118. Carcass ultrasound uses in beef cattle production settings

SECTION 14: FEEDLOT PRODUCTION MEDICINE

- 119. Preconditioned calves in the feedyard
- 120. Low stress livestock handling
- 121. Biosecurity for feedlot enterprises
- 122. Use of statistical process control in feedlot practice
- 123. Growth promotants
- 124. Feedlot vaccination protocols
- 125. An economic risk assessment model for management of pregnant feeder heifers

126. Investigation of lameness outbreaks in feedlot cattle

127. Investigating a respiratory disease outbreak

128. Feedlot therapeutic protocols

129. Managing hospital pen systems

130. No loose parts necropsy procedure for the feedyard.
