

TABLE OF CONTENTS – General Animal Surgery and Anesthesiology : (With Theory and Practicals)

Section I. Theory.

A. General Surgery

1. Historical aspects and introduction
2. Pre-operative, intra-operative and post-operative consideration of a surgical patient
3. Sterilization
4. Suture materials and suture patterns
5. Fluid therapy
6. Shock
7. Fracture
8. Wound
9. Burn
10. Hernia (Dr. A.K. Sharma)
11. Inflammation
12. Sprain, strain and bursitis
13. Arthritis
14. Luxation subluxation and dislocation
15. Diseases of arteries and veins.

B. Anesthesiology

16. Historical aspects and general considerations
17. Preanesthetic agents
18. General anesthesia
19. Injectable anesthetics and their combinations used for general Anesthesia (Dr. Adarsh Kumar)
20. Inhalant anesthetics
21. Anesthetic emergencies and their management
22. Endotracheal intubation (Adarsh Kumar)
23. Muscle relaxants
24. Local anesthetics
25. Local anesthetics techniques
26. Acupuncture

Section II. Objective

1. General consideration for set up of an operation theatre (OT)
2. Preparation of general surgical pack
3. Familiarization with udder and teat instruments
4. Familiarization with orthopedic instruments

5. Familiarization with ophthalmic instruments
6. Familiarization with Hoof instruments
7. Familiarization with Dental instruments
8. To study different types of catheters and their applications
9. Restraining and positioning of animals for surgical interventions
10. Familiarization with different apparatuses used for general anesthesia
11. Preparation, calculation and induction of general anesthesia
12. Demonstration monitoring of general anesthesia and management of anesthetic emergencies
13. Hemorrhage and hemostasis
14. Bandages and slings
15. Demonstration of monitoring of general anesthesia
16. Anesthesia for laboratory and wild animals
17. Restraining of animals
18. Miscellaneous instruments.
