

TABLE OF CONTENTS

Genetics Improvement of Farmed Animals

- 1: The origins and roles of today's livestock breeds
- 2: Genes, genetic codes and genetic variation
- 3: Strategies for genetic improvement
- 4: What affects response to selection within breeds?
- 5: Tools and technologies in animal breeding
- 6: Analysing genetic variation in farm animals
- 7: Predicting breeding values
- 8: Dairy cattle breeding
- 9: Beef cattle breeding
- 10: Sheep and goat breeding
- 11: Poultry breeding
- 12: Pig breeding
- 13: Aquaculture breeding
- 14: Future directions.
