

TABLE OF CONTENTS

- Dedication
- Quotations
- Foreword
- Preface
- Acknowledgements
- About the Authors
- About the Contributors
- List of Abbreviations

- **Part I: Gorilla Pathology and Health**
 - 1. The Genus *Gorilla* – Morphology, Anatomy and the Path to Pathology
 - Abstract
 - Introduction
 - Primate and Comparative Anatomy
 - The Current Status of Anatomy
 - Terminology
 - Conclusions
 - 2. The Growth of Studies on Primate Pathology
 - Abstract
 - Introduction – The Growth of Pathology
 - Studies on the Pathology of Primates
 - African Studies
 - The Importance of Comparative Pathology
 - Primates in Biomedical Research
 - Studies on Microscopic Anatomy and Cellular Pathology
 - The Continuing Relevance of Studies on Pathology
 - The Advantages and Dangers of Extrapolation
 - Access to Data
 - The Relevance of Pathology to Health
 - 3. Infectious Disease and Host Responses
 - Abstract
 - Introduction
 - Disease and Death in Gorillas
 - The Aetiology of Disease
 - What Is ‘Pathology’?
 - Understanding Host Responses – A Comparative Approach
 - Endogenous Factors Influencing Host Responses
 - Discussion of Infectious and Noninfectious Diseases

- Bacteria
- Viruses
- Parasites (By Ian Redmond)
- Microbiota, Microbiome and Normal Flora
- Emerging Diseases
- 4. Noninfectious Disease and Host Responses
 - Abstract
 - Introduction – Noninfectious Conditions
 - Trauma – Causes and Pathogenesis
 - Specific Responses – Trauma
 - Fighting
 - Infected Wounds
 - Attacks on Humans
 - Wounds – General
 - Ageing of Wounds
 - Healing and Regeneration
 - Sepsis
 - Snares
 - Firearms, Exposure to Blasts, Explosions and Unexploded Ordnance
 - Predation
 - Exposure to Temperature Changes
 - Stress and Stressors
- 5. Methods of Investigation – Observation, Clinical Examination and Health Monitoring
 - Abstract
 - Introduction
 - Surveillance of Syndromes
 - Clinical Work With Gorillas
 - The Importance of Observation
 - Indicators of Ill Health
 - Restraint and Handling
 - Clinical Examination
 - Anaesthesia
 - Medical and Surgical Treatment
 - The Importance of Multidisciplinary Collaboration
 - Health Monitoring of Gorillas
 - Why Is Health Monitoring Important?
 - Health Monitoring Techniques
 - Some Conclusions
- 6. Methods of Investigation – Postmortem Examination
 - Abstract
 - Introduction

- The Nature and Role of the Postmortem Examination
- Before Embarking on a Necropsy
- Personnel and Training
- Interdisciplinary Studies
- Access to Material for Postmortem Examination
- Postmortem Procedures
- Equipment
- Recording of Findings
- Performance
- External Examination and Sampling
- Internal Examination and Sampling
- Description of Lesions
- Forensic Postmortem Examinations
- Postmortem Changes and Determination of Time of Death/PMI
- Causes of Death Diagnosis
- 7. Methods of Investigation – Sampling and Laboratory Tests
 - Abstract
 - Introduction
 - Sampling
 - Methods
 - Environmental Testing
 - Quality Control
 - Recording and Reporting of Findings
 - Personnel and Equipment
 - Safety in Laboratory Work
 - Storage of Samples and Reference Collections
- 8. Nonspecific Pathology
 - Abstract
 - Introduction
 - General Considerations in Pathology, Not Related to Organ Systems
 - Age-Related Changes
 - Developmental Abnormalities
 - Genetic Anomalies
 - Behavioural Pathology
 - Aggression
 - Effects of Capture, Transportation and Captivity
 - Welfare
 - Pain
 - Neoplasia
 - Poisoning
- 9. Skin and Integument

- Abstract
- Introduction
- Biology of the Skin
- Investigative Methods
- Diseases and Pathology of the Skin – General
- Noninfectious Causes
- Infectious Causes
- Ectoparasites (By Ian Redmond)
- Diseases of Uncertain Aetiology
- Conclusions
- 10. Respiratory and Cardiovascular Systems
 - Abstract
 - Introduction
 - Respiratory System
 - Lung Parasites (By Ian Redmond)
 - Investigation of the Respiratory Tract
 - Cardiovascular System
 - Investigation of the Cardiovascular System
 - Cardiovascular Disease
 - Research on Heart Disease in Great Apes, Including Gorillas
 - Pathogenesis of Cardiovascular Disease
 - Other Pathology of the Vascular System
- 11. Alimentary Tract and Associated Organs
 - Abstract
 - Introduction
 - Oral Cavity
 - Dental Disease and Pathology
 - Some Specific Conditions and Their Pathogenesis
 - The Gastrointestinal Tract
 - Investigation of the Liver
 - Pathology and Pathogenesis of Hepatic Disorders
 - Investigation of the Biliary System
 - Investigation of the Exocrine Pancreas
- 12. Lymphoreticular and Haemopoietic Systems and Allergic Conditions
 - Abstract
 - Introduction
 - The Lymphoreticular System
 - Immunity
 - Immunological Disorders
 - Hypersensitivities and Allergies

- Immunodeficiency (by Geoffrey Pearson and John E. Cooper)
- Blood and Bone Marrow
- Blood Parasites (by Ian Redmond and John E. Cooper)
- Neoplasia
- 13. Urinary and Reproductive Systems
 - Abstract
 - Introduction
 - Urinary System
 - Reproductive System
- 14. Musculoskeletal System
 - Abstract
 - Introduction
 - Movement Disorders
 - The Pathology of Bone
 - The Importance of the Skeleton
 - Skull
 - Vertebral Column
 - Joints
 - Investigation of Bones
 - Skeletal Disease and Pathology
 - Fractures and Their Repair
 - Specific Diagnosis of Diseases of the Skeleton
 - Muscle
 - Connective Tissue
 - Adipose Tissue
- 15. Nervous System and Special Senses
 - Abstract
 - Introduction
 - Psychological Studies on Gorillas
 - Studies on the Brain of Gorillas
 - Investigation of the Nervous System
 - Pathology and Diseases of the Nervous System
 - The Special Senses
- 16. Endocrinological and Associated Conditions
 - Abstract
 - Introduction
 - The Endocrine System
 - Sleep
 - Stress
- 17. Field Studies in Pathology and Health Monitoring
 - Abstract
 - Introduction

- Pre-release Health Considerations for Gorillas
- Quarantine
- Setting-Up Long-Term Health Monitoring Systems for Mountain Gorillas Using a One Health Approach
- *Cryptosporidium*, *Giardia* and Helminths of Habituated Nyakagezi Mountain Gorilla Group in Mgahinga Gorilla National Park
- Working With Great Apes During an Ebola Outbreak
- 18. Legal Considerations
 - Abstract
 - Introduction
 - General
 - Free-Living Gorillas
 - Gorillas in Captivity
 - Other Relevant Law
- 19. Pathology, Health and Conservation – The Way Forward
 - Abstract
 - Introduction
 - Knowledge of the Genus and Its Biology
 - Threats to Survival
 - The Implications and Importance of Studies on Pathology and Health
 - Advances in Health Care
 - Collaboration and Sharing of Information
 - A Greater Role for Africa
 - Involvement of African Academic Institutions
 - Scientific Advances
 - Human Health
 - Attention to Welfare
 - Continued Search for Gorilla Material
 - Greater Dissemination of Information
 - Broadening the Holistic Approach
 - Concluding Remarks
- **Part II: A Catalogue of Preserved Materials**
 - Introduction to the Catalogue
 - Scope and Method of Compilation
 - Layout
 - *Gorilla* History, Taxonomy and Synonymy
 - Hanno's *gorillai*
 - Etymological Considerations
 - Behavioural Considerations
 - Correspondents

- Catalogue of Preserved Gorilla Materials
 - Argentine Republic
 - Australia
 - Austria
 - Belgium
 - Brazil
 - Bulgaria
 - Canada
 - Central African Republic
 - Channel Islands
 - Chile
 - Cuba
 - Czech Republic
 - Denmark
 - Egypt
 - Finland
 - France
 - Germany
 - Hungary
 - India
 - Ireland
 - Israel
 - Italy
 - Japan
 - Kenya
 - Kuwait
 - Morocco
 - Netherlands
 - New Zealand
 - Norway
 - Poland
 - Portugal
 - Romania
 - Russian Federation
 - Slovenia
 - South Africa
 - Spain
 - Sweden
 - Switzerland
 - Uganda
 - United Kingdom
 - United States of America
 - Uruguay

- Zimbabwe
- **Appendix 1. Glossary of Terms**
 - Introduction
 - List of Terms and Meanings
- **Appendix 2. Protocols and Reports**
 - Introduction
 - Postmortem Examination of Gorillas – Some Basic Rules
 - Nonhuman Primate Postmortem Examination
 - Cardiac Examination for Great Apes (and Other Primates In Which Cardiac Disease Is Present)
 - Postmortem Examination of Nonhuman Primate Fetuses and Neonates
 - Postmortem Examination of the Air Sacs of Orangutans and Other Nonhuman Primates
 - Gorilla Postmortem Examination
 - Cardiac Examination for Apes and Other Primates
 - Postmortem Examination of Primate Fetuses, Neonates and Placentas
 - Postmortem Examination of the Air Sacs of Gorillas and Other Apes
 - CNS/Musculoskeletal/Other
 - Guide to the Nonhuman Primate Postmortem Examination
Tips for Tissue Collection During the Necropsy Examination
 - Great Ape Tag Placental Examination
 - Postmortem Examination of the Air Sacs of Apes
 - GAHP Recommended Cardiac Necropsy Prosection Guide
 - Ape Cardiac Necropsy Protocol
 - Decision Point
 - GAHP Recommended Cardiac Trimming Protocol for Pathologists
 - GAHP Cardiac Necropsy Check Sheet (Fillable PDF) – Pathologists: Please Submit With Report, Slide Key and Images
 - Skeletal Examination Form
- **Appendix 3. Field Pathology**
 - Introduction
- **Appendix 4. Hazards, Including Zoonoses**
 - Introduction

- **Appendix 5. Case Studies – Museums and Zoological Collections**
 - Introduction
 - Studies on the Skeleton of ‘Guy’ at the NHM
 - Studies on Three Skeletons in the Osman Hill Collection
 - The Research Proposal
 - Initial Observations on the Specimens
 - Sampling
 - Processing the Samples for Histological Examination
 - Processing of Samples for DNA Testing
 - Results
 - Acknowledgements
 - Student Projects, Bristol, United Kingdom, 2015
 - Project 1: A Review of the Data Relating to the Animal Management and Welfare of Gorillas at Bristol Zoo Gardens From 1930 to 2015
 - Project 2: The Development of Osteoarthritis in Captive Primates
 - Acknowledgements

- **Appendix 6. Scientific Names of Species and Taxa Mentioned in Text**
- References and Further Reading
 - References

- **Appendix CA1. Use of Collections and Handling of Biological Material**
 - Introduction
 - The Needs Pertaining to Museums and Collections
 - The Rise and Fall of Collections
 - The Need for Pathology-Based Studies
 - Working in Collaboration With Museums
 - Making Maximum Use of Material in Museums
 - Handling Preserved Material

- **Appendix CA2. Retrieval, Preparation and Storage of Skeletal and Other Material**
 - Introduction
 - Skeleton
 - Soft Tissue Preservation
 - Skins
 - The Recovery and Preparation of Skeletal Remains

- Invited Contribution – Skeletal Remains: Recovery, Preparation and Preservation
 - Purposes of Recovery and Preservation of Skeletons
 - Recovery of Skeletons From Fleshed Animals
 - Preparation, Preservation and Storage of Recovered Skeletons
 - Factors Affecting the Preservation of Material
 - Comments on Postmortem Change
- **Index**
