TABLE OF CONTENTS

Handbook of Laboratory Animal Management and Welfare
4th Edition

Acknowledgements

1 Education and Training for the Personal Licence Holder 1

Introduction 1

Framework for Education and Training of Licence Holders 2

Core modules 4

Prerequisite and additional modules 4

Education and training in the UK 4

Aims of Accredited Training 4

Continuing Professional Development and Reflective Practice 5

Summary 5

References 6

2 Ethical Considerations around using Animals in Research 7

History of the Use of Animals in Research 7

The Ethics of Using Animals in Experiments 9

The Local Ethical Review Process 12

Measuring harms and benefits 12

The Principles of the Three RS 13

Replacement 13

Reduction 14

Refinement 15

Prospective, ongoing and retrospective review: reflective practice and the refinement loop 15

Public Perceptions 17

Transparency and freedom of information 18

References 18

3 The Regulatory Framework 21

Introduction to Legislation Regulating the Use of Animals in Research 21

European legislation 22

The Animals (Scientific Procedures) Act 1986 22Protected animals 23

Regulated procedures 23

Exemptions 24

Licensing of places 24

The personal licence 25

Project licences 28

The Section 2C licence 30

Additional controls 32

Administration of the Act 33

Assessment of licences and inspection of premises 33

Offences and infringements 33

Communication 34

Statistics of Animal Usage 34

Other Relevant Legislation 34

References 36

4 Balancing Animal Welfare with Science 37

Welfare versus Science? 37

What is Welfare? 37

Quality of life 38

Why assess welfare? 39

Who should assess welfare? 40

How to assess welfare 40

Development of welfare assessment systems 44

Consideration of cumulative suffering 46

References 48

5 Animal Husbandry, Environmental Enrichment and Occupational Health and Safety 51

Animal Husbandry 51

Types of housing 52

Bedding and nesting materials 54

Nutrition 54

Environment 55

Handling techniques 56

Environmental Enrichment 56

Evaluation of enrichment and other refinements to housing and care 58

Evaluating the effect of a potential refinement on animals 58

Evaluating the effect of a potential refinement on science 61

Evaluating the effect of a potential refinement on animal house management 62

Supply and Transport 63

Aspects of Health, Safety and Security Affecting Animal Care 64

COSHH, CLP and REACH 65

Genetically modified organisms 66

Health and safety in animal facilities 67

Miscellaneous health and safety hazards and risks 71

Acknowledgements 74

References and Further Reading 74

6 Principles of Animal Use and Experimental Design 77

Principles of Experimental Design 77

Minimising variation 78

Selection of animals: species, strain, genetically altered animals 79

Genetic and Welfare Monitoring of GA and HM Animals 81

Background health status 82

Sources of infection 83

Health monitoring 84

Biosecurity and containment for rodents 86

References 87

7 Handling and Techniques 89

Prior Considerations 89

Training and competence of operator 89

Acclimatisation 90

Training of animals 90

Restraint of animals 90

Equipment 91

Administration of Substances 91

ADME 91

Administration volumes 93

Administration techniques 93

Legal considerations 103

Removal of Blood 104

Quality of samples 104

Technique for venipuncture 105

Methods of venipuncture in different species 108

Placement and Maintenance of Indwelling Cannulae 111

Withdrawal of blood 112

Long-term cannulation 112

Removal of cannulae 112

Potential sequelae 112

Arterial Sampling and Arterial Loops 113

Needle puncture 113

Arterial cannulae 113

Arterial loops 113

Miscellaneous Procedures 113

Creation and maintenance of fistulae 113

Administration techniques 114

Sampling 115

Antibody production 116

Equipment for Blood Collection and Administration of Substances 119

Over-the-needle cannulae 119

Evacuated blood-collection tubes 119

Butterfly needles 120

Tourniquets 120

Vasodilating agents 120

References 120

8 Humane Methods of Killing 123

Ethical Considerations in Killing Animals 123

Legal constraints 123

When to kill an animal 123

Preparation for humane killing 125

Methods of Euthanasia 127

Chemical methods of euthanasia 127

Physical methods of euthanasia 130

Other methods of euthanasia 131

Schedule 1 methods 132

References 133

9 Anaesthesia and Analgesia 137

Introduction 137

Pre-Anaesthetic Care and Evaluation 138

Acclimatisation 138

Training 138

Fasting 138

Handling 139

Health status 139

Local anaesthetics 139

Premedication 139

General Anaesthesia 142

General principles 142

Balanced anaesthesia 142

Administration of anaesthetics 143

Inhalation anaesthesia 144

Injectable anaesthesia 151

Long-term and non-recovery anaesthesia 164

Recovery and post-anaesthetic care 165

Local anaesthetics 166

Anaesthetic Management 167

Physiological stability 167

Depth of anaesthesia 170

Equipment monitoring 171

Anaesthetic Emergencies 171

Muscle Relaxation During Anaesthesia 172

Monitoring anaesthesia under neuromuscular blocking agents 173

Neuromuscular blocking agents 173

References 174

10 Introduction to Surgery and Surgical Techniques 177

Pre-Surgical Preparation 177

Animal 177

Instruments and equipment 178

Facilities 178

Personnel 178

Principles of Aseptic Technique 179

Atmosphere 180

Surgical team 180

Instruments 181

Methods of sterilisation 181

Preparation of the animal 183

Summary of Lasa Guidelines on Rodent Surgery 184

Conduct of Surgical Procedures 184

Inflammation and wound healing 184

Types of healing 185

Factors affecting healing 186

Performance of surgical procedures 187

Surgical Instruments 189

Skin incision 190

Dissection 191

Haemostasis 191

Wound closure 193

Other instruments 193

Suturing Techniques and Materials 195

Suture needles 196

Suture placement 197

Surgical knots 197

Suture patterns 198

Suture materials 201

Sizes of suture 206

Packaging 206

Summary 207

References 207

11 Small Laboratory Animals 209

Rodents 209

Dentition 209

Nutrition and digestion 210

Water 210

Behaviour 211

Senses and communication 211

Housing 211

Environment 211

Anaesthesia 212

Mouse 212

Behaviour 212

Communication 213

Feeding 214

Environment 215

Breeding 215

Growth 215

Handling 216

Pain and stress recognition 217

Common diseases and health monitoring 218

Biological data and useful reference data 218

Rat 218

Behaviour 219

Housing 219

Feeding 220

Water 220

Environment 220

Breeding 220

Growth and development 221

Handling 221

Pain and stress recognition 222

Common diseases and health monitoring 223

Biological data and useful reference data 223

Hamster 223

Behaviour 224

Housing 224

Feeding 225

Water 225

Environment 226

Breeding 226

Handling 227

Pain and stress recognition 227

Common diseases and health monitoring 227

Biological data and useful reference data 227

Gerbil 227

Behaviour 228

Housing 229

Feeding 229

Water 230

Environment 230

Breeding 230

Handling 230

Pain and stress recognition 231

Common diseases and health monitoring 231

Biological data and useful reference data 231

Guinea Pig 232

Behaviour 232

Housing 233

Feeding and water 233

Environment 234

Breeding 234

Growth 234

Handling 235

Recognition of pain and stress 235

Common diseases and health monitoring 235

Anaesthesia 236

Biological data and useful reference data 236

Rabbit 237

Behaviour 237

Housing 238

Feeding 239

Water 240

Environment 240

Breeding 241

Growth 241

Handling 242

Pain and stress recognition 242

Common diseases and health monitoring 243

Biological data and useful reference data 243

Anaesthesia in the rabbit 243
