

# TABLE OF CONTENTS

## **1 Introduction**

Reasons to provide regional anesthesia

Equipment

Complications and contraindications

Species differences and considerations

Safe practice

References

Further reading

## **2 Cutaneous Innervation Index**

Cutaneous innervation index

Canine dermatomes

## **3 Infiltration Blocks**

Infiltration for mass removal

Block of the surgical incision

Intercostal blocks

Interpleural block (also known as intrapleural or pleural)

Intraperitoneal block

References

## **4 Blocks of the Head**

Retrobulbar

Maxillary

Infraorbital

Mandibular (or inferior alveolar)

Mental (or middle mental)

Auriculotemporal and great auricular

References

## **5 Regional Anesthetic Blocks of the Limbs**

Thoracic limb regional anesthetic blocks

Pelvic limb

References

## **6 Epidurals and Spinals**

Lumbosacral epidural and spinal in dogs

Lumbosacral epidural in cats

Caudal epidural in dogs and cats

References

## **7 Emergency Procedures**

Complications associated with local anesthetic techniques

Complications associated with local anesthetic drugs

References
