

TABLE OF CONTENTS – Haschek and Rousseaux's Handbook of Toxicologic Pathology, Volume 2

Part 1. Product Discovery and Development

1. Overview of Drug Development
2. Overview of the Role of Pathology in Product Discovery and Development
3. Discovery Toxicology and Discovery Pathology
4. Pathology in Nonclinical Drug Safety Assessment
5. Carcinogenicity Assessment

Part 2. Product-Specific Practices for Safety Assessment

6. Protein Therapeutics
7. Nucleic Acid Pharmaceutical Agents
8. Gene Therapy and Gene Editing
9. Vaccines
10. Stem Cells and Other Cell Therapies

Part 3: Data Interpretation and Communication

11. Biomedical Materials and Devices
12. Safety Assessment of Agricultural and Bulk Chemicals
13. Preparation of the Anatomic Pathology Report for Toxicity Studies
14. Interpretation of Clinical Pathology Results in Nonclinical Toxicity Testing
15. Assigning Adversity to Toxicologic Outcomes
16. Risk Assessment
17. Risk Management and Communication: Building Trust and Credibility with the Public
