

TABLE OF CONTENTS – Induced Fish Breeding :

A Practical Guide for Hatcheries

- Preface
- Introduction: Preexisting (Traditional) and Modern Fish Breeding Methods in Practice Among Fish Farmers
 - Bundh Breeding in Captivity
 - What Is a Bundh?
 - Area of Bundh
 - Different Parts of a Typical Bundh
 - Topography of a Bundh
 - Types of Soil
 - Impact of Regional Soil on Hydrobiological Parameters of Breeding and Hatching Bundh
 - Slope
 - Catchment Area
 - Bundh Proper (Deepest Area)
 - Size and Height of Embankment
 - Breeding Environment
 - Types of Bundh
 - Operation Technique of a Dry Bundh for Production of Spawn
 - Improved Methods for Bundh Breeding
 - Spawning
 - Modern Technique for Bundh Breeding in Nonlaterite Belt
 - Hybridization in Bundhs
 - References
- **Part I: Induced Breeding—A Scientific Approach Towards Modern Fish Breeding Procedure**
 - **Part I. Induced Breeding—A Scientific Approach Towards Modern Fish Breeding Procedure**
 - **1. Eco-Hatchery for Fish Breeding of Carps in Captivity**
 - Abstract
 - 1.1 Overhead Tank
 - 1.2 Spawning Pool
 - 1.3 Incubation or Hatching Pools
 - 1.4 Breeding Technique
 - 1.5 Spawn Collection Tank
 - 1.6 Breeding Protocols
 - 1.7 Brood Stock Collection and Development

- References
- **2. Reproductive Cycle, Maturation, and Spawning**
 - Abstract
 - 2.1 Collection and Preservation of Pituitary Gland
 - 2.2 Identification of Male and Female Breeders
 - 2.3 Selection of Breeders
 - 2.4 Mode of Injection/Dosage Administration
 - 2.5 Injection and Dosage for Indian Carp and Exotic Carp
 - 2.6 Three Doses of Injection Instead of the Usual Two Doses
 - 2.7 Calculation of Dose for Purposes of a Batch of Fish
 - 2.8 Inducing Agents
 - 2.9 Environmental Influence on Dose
 - 2.10 Application of Terramycin With Extract
 - 2.11 Methods of Injections
 - 2.12 Breeding Practices
 - 2.13 Identification of Fertilized Egg
 - 2.14 Characteristics of Carp Eggs
 - 2.15 Development of Egg and Spawn With Special Reference to Indian Major Carp
 - 2.16 Larval Rearing
 - References
- **3. Hybridization**
 - Abstract
 - 3.1 Natural Hybridization
 - 3.2 Artificial Hybridization
 - References
- **4. Selective Breeding**
 - Abstract
 - 4.1 Genetic Improvement of Farmed Fish
 - 4.2 Deformities as Observed in Different Hatcheries
 - 4.3 Interaction Studies
 - 4.4 Conclusions/Implications: Preservation of Biodiversity
 - 4.5 Genetic Concerns With Stock Transfers
 - 4.6 Differences Between Populations
 - 4.7 Population Fitness
 - 4.8 Effect of Stock Transfer on Fish Biodiversity
 - 4.9 Possible Impact of the Hatchery-Raised Fish in Wild
 - 4.10 Final Impact
 - 4.11 Extract
 - 4.12 Genetic Variance and Breeding
 - 4.13 Genetic Improvement Programs
 - 4.14 Molecular Genetics and Genomics
 - 4.15 The PCR
 - 4.16 Genomic Mapping
 - 4.17 Gene Expression Studies
 - References
- **5. Negative Aspects of Breeding Practice**
 - Abstract
 - 5.1 Use of Impotent Pituitary Gland
 - 5.2 Restocking of Brooders

- 5.3 Genetic Appraisal of Improper Fish Breeding Practices
- 5.4 Genetic Drift
- 5.5 Sampling Error
- 5.6 Why Does This Error Occur?
- 5.7 Sample Size and Sampling Error
- 5.8 Standard Deviation and Sampling Error
- 5.9 Random Genetic Drift
- 5.10 Ways to Eliminate Sampling Error
- 5.11 Simple Measures to Avoid Improper Breeding Practices in the Hatchery
- References
- **6. Influence of Ecological Factors on Maturation, Spawning, and Hatching of Carps**
 - Abstract
 - 6.1 Abiotic Factors
 - References

□ Part II: Case Studies

- **7. Current Status of Hatchery Operations in Some Leading Seed-Producing States of India and Its Impact on Aquaculture**
 - Abstract
 - 7.1 Three Eastern States of India
 - 7.2 Categorization of Hatcheries
 - 7.3 Temporal Trends in Hatchery Establishment
 - 7.4 Ownership Status and Educational Profile of the Hatchery Owners
 - 7.5 Size of the Hatcheries and Their Modes of Operation
 - 7.6 Pond Status, Water Source, and Manpower
 - 7.7 Breeding Season and Price Variation
 - 7.8 Breeding Program
 - 7.9 Brood Stock Management
 - 7.10 Breeding Practice
 - 7.11 Spawn Yield With CPE and Ovaprim
 - 7.12 Brood Stock Management
 - 7.13 Fish Disease
 - 7.14 Deformities
 - 7.15 Inbreeding
 - 7.16 Genetic Drift
 - 7.17 Hybridization
 - 7.18 Impact on Wild Fish
 - 7.19 Innovative Technology Developed by Scientists and Fish Breeders of Bengal by Modifying Glass Jar Hatcheries
 - 7.20 New Dimension in Common Carp Breeding
 - 7.21 Captive Breeding of Two Recently Introduced Carnivorous Fish Species in West Bengal
 - 7.22 Innovative Technology Developed by Fish Breeders
 - References
- **8. Seed Resources and Supply Chain in Some Asian Countries**
 - Abstract
 - 8.1 Seed Management

- 8.2 Seed Production Facilities and Seed Technology
- 8.3 Fish Seed Quality
- 8.4 Institutional Support and Seed Certification
- 8.5 Fish Seed Marketing
- 8.6 Economics of Seed Production
- 8.7 Information and Knowledge Gaps
- 8.8 Future Prospects and Recommendations
- References
- **9. Review of Freshwater Prawn Hatchery Operation in Some Asian Countries**
 - Abstract
 - 9.1 Introduction
 - 9.2 Results
 - 9.3 Discussion
 - 9.4 Conclusion
 - References
- **10. Genetic Variation and Phylogenetic Relationship Among the Two Different Stocks of Catla (*Catla catla*) in the Indian State of Orissa Based on RAPD Profiles**
 - Abstract
 - 10.1 Introduction
 - 10.2 Materials and Methods
 - 10.3 Results
 - References

□ **Part III: Innovations**

- **11. Approaches to Genetic Improvement**
 - Abstract
 - 11.1 Different Approaches of Selection Program
 - References
- **12. Conservation Hatchery and Supplementation—A Recent Approach to Sustainable Aquaculture**
 - Abstract
 - 12.1 History of the Conservation Hatchery Concept
 - 12.2 Conclusion and Recommendation
 - 12.3 Recovery of Threatened and Endangered Species
 - References

□ Index.
