

# **TABLE OF CONTENTS – de Lahunta's Veterinary Neuroanatomy and Clinical Neurology, 5th Edition**

- Front Cover
- Title page
- Table of Contents
- Copyright
- Videos Online
- Preface
- Dedication
  
- **1. Introduction**
  - Objective
  - Accurate Diagnosis
  - Neuron
  - Functional Systems
  - Further Reading
  
- **2. Neuroanatomy Gross Description and Atlas of Transverse Sections and Magnetic Resonance Images**
  - Neuroanatomy Gross Description
  - Meninges
  - Arteries
  - Veins
  - Brain
  - Spinal Cord
  - Atlas of Transverse Sections and Magnetic Resonance Images
  
- **3. Development of the Nervous System: Malformations**
  - Neural Tube
  - Neurogenesis
  - Medulla Spinalis: Spinal Cord
  - Myelencephalon: Medulla Oblongata
  - Metencephalon: Cerebellum and Pons
  - Mesencephalon: Midbrain
  - Diencephalon: Interbrain
  - Telencephalon: Cerebrum
  - Malformations
  
- **4. Cerebrospinal Fluid and Hydrocephalus**
  - Production
  - Meninges: Subarachnoid Space
  - Circulation
  - Absorption
  - Fluid Compartments
  - Function
  - Clinical Application of Cerebrospinal Fluid

- Cerebellomedullary Cistern Cerebrospinal Fluid Collection
  - Lumbosacral Cerebrospinal Fluid Collection in Large Animals
  - Myelography
  - Hydrocephalus
- **5. Lower Motor Neuron: Spinal Nerve, General Somatic Efferent System**
  - Lower Motor Neuron
  - Spinal Nerve: General Somatic Efferent–Lower Motor Neuron
  - Spinal Cord Segments: Vertebral Column
  - Function
  - Pelvic Limb and Perineal Reflexes
  - Thoracic Limb Reflexes
  - Lower Motor Neuron Disease: Neuromuscular Disease
  - Neuromuscular Disease: Diseases of the General Somatic Efferent–Lower Motor Neuron
- **6. Lower Motor Neuron: General Somatic Efferent System, Cranial Nerve**
  - Cranial Nerve III: Oculomotor Neurons
  - Cranial Nerve IV: Trochlear Neurons
  - Cranial Nerve VI: Abducent Neurons
  - Function of Cranial Nerves III, IV, and VI
  - Cranial Nerve V: Trigeminal Neurons
  - Cranial Nerve VII: Facial Neurons
  - Cranial Nerves IX, X, and XI: Glossopharyngeal, Vagal, and Accessory Neurons
  - Cranial Nerve XII: Hypoglossal Neurons
- **7. Lower Motor Neuron: General Visceral Efferent System**
  - General Anatomy
  - Control of the Pupils
  - Control of Micturition
  - Control of Defecation
  - Parasympathetic General Visceral Efferent–Lower Motor Neuron of the Medulla: Facial, Glossopharyngeal, Vagus, and Accessory Neurons
  - Dysautonomia
  - Complex Regional Pain Syndrome, Reflex Sympathetic Dystrophy
- **8. Upper Motor Neuron**
  - Pyramidal System
  - Histology of the Cerebral Cortex
  - Extraparamidal System
  - Upper Motor Neuron Function
  - Clinical Signs of Upper Motor Neuron Disease
- **9. General Sensory Systems: General Proprioception and General Somatic Afferent**
  - Sensory Systems
  - General Proprioception
  - General Somatic Afferent System
  - Summary of Spinal Cord Pathways

- **10. Small Animal Spinal Cord Disease**
- Neurologic Examination
- Summary of Possible Clinical Signs Related to Spinal Cord Lesions
- Paraplegia (Upper Motor Neuron)
- Pelvic Limb Monoplegia (Upper Motor Neuron)
- Paraparesis and Pelvic Limb Ataxia (Upper Motor Neuron–General Proprioception)
- Tetraplegia (Upper Motor Neuron)
- Tetraparesis and Ataxia (Upper Motor Neuron–General Proprioception)
- Hemiparesis and Ataxia (Upper Motor Neuron–General Proprioceptive)
- Tetraparesis and Ataxia (Lower Motor Neuron Thoracic Limb, Upper Motor Neuron–General Proprioception Pelvic Limb: “Two Engine”)
- Hemiplegia, Hemiparesis, and Ataxia (Lower Motor Neuron Thoracic Limb, Upper Motor Neuron–General Proprioception Pelvic Limb: “Two Engine”)
- Monoparesis, Pelvic Limb
- Multifocal or Diffuse Paresis and Ataxia
- Neck Discomfort
  
- **11. Large Animal Spinal Cord Disease**
- Neurologic Examination
- Summary of Clinical Signs at Specific Areas of the Spinal Cord
- Equine Spinal Cord Disease
- Farm Animal Spinal Cord Disease
  
- **12. Vestibular System: Special Proprioception**
- Anatomy and Physiology
- Clinical Signs of Vestibular System Disease
- Vestibular System Diseases
- **13. Cerebellum**
- Development
- Anatomy
- Function
- Clinical Signs of Cerebellar Disease
- Cerebellar Diseases
- Acknowledgments
  
- **14. Visual System**
- Embryology of the Eyeball
- Histology of the Pars Optica Retina
- Central Visual Pathway
- Clinical Evaluation
- Diseases of the Visual System: Abnormal Pupils
- Microphthalmia
- Optic Nerve Hypoplasia
- Optic Nerve Injury
- Vitamin A Deficiency
- Retinal Detachment
- Diseases of the Visual System: Normal Pupils
- Adult Cheetah Leukoencephalopathy
- Storage Diseases

- **15. Auditory System: Special Somatic Afferent System**
- Anatomy
- Deafness
  
- **16. Visceral Afferent Systems**
- General Visceral Afferent System
- Anatomy
- Special Visceral Afferent System: Taste
- Special Visceral Afferent System: Olfaction
  
- **17. Nonolfactory Rhinencephalon: Limbic System**
- Anatomy
- Function
  
- **18. Seizure Disorders and Narcolepsy**
- Definition
- Terminology
- Classification
- Pathogenesis
- Examination
- Physical Examination
- Cases
- Generalized and Focal Seizures
- Incidence
- Treatment
- Narcolepsy and Cataplexy
- Sleep-Associated Movement Disorder
  
- **19. Diencephalon**
- Diencephalon
- Thalamus
- Hypothalamus
  
- **20. Uncontrolled Involuntary Skeletal Muscle Contractions**
- Muscle
- Nervous System
  
- **21. The Neurologic Examination**
- Neurologic Examination: Overview
- Physical Examination
- Neurologic Examination: Specifics
- Summary of Clinical Signs at Specific Central Nervous System Locations
- Conclusion
  
- **22. Case Descriptions**
- Index.
