

TABLE OF CONTENTS

Marinne Mammals : Evolutionary Biology, 3rd Edition

Chapter 1. Introduction

- 1.1. Marine Mammals—“What Are They?”
- 1.2. Adaptations for Aquatic Life
- 1.3. Scope and Use of this Book
- 1.4. Time Scale
- 1.5. Early Observations of Marine Mammals
- 1.6. Emergence of Marine Mammal Science
- 1.7. Further Reading and Resources

Part 1. Evolutionary History

Chapter 2. Phylogeny, Taxonomy, and Classification

- 2.1. Introduction: Investigating Evolutionary Histories
- 2.2. Some Basic Terminology and Concepts
- 2.3. How Do You Build a Phylogenetic Tree?
- 2.4. Testing Phylogenetic Hypotheses
- 2.5. Applying Phylogenies: Elucidating Evolutionary and Ecological Patterns
- 2.6. Taxonomy and Classification
- 2.7. Summary and Conclusions
- 2.8. Further Reading and Resources

Chapter 3. Pinniped Evolution and Systematics

- 3.1. Introduction
- 3.2. Origin and Evolution
- 3.3. Summary and Conclusions
- 3.4. Further Reading and Resources

Chapter 4. Cetacean Evolution and Systematics

- 4.1. Introduction
- 4.2. Origin and Evolution
- 4.3. Summary and Conclusions
- 4.4. Further Reading and Resources

Chapter 5. Sirenians and Other Marine Mammals: Evolution and Systematics

- 5.1. Introduction
- 5.2. Origin and Evolution of Sirenians
- 5.3. The Extinct Sirenian Relatives—Desmostylia
- 5.4. The Extinct Marine Bear-Like Carnivoran, *Kolponomos*

- 5.5. The Extinct Aquatic Sloth, *Thalassocnus natans*
- 5.6. Marine Otters
- 5.7. The Polar Bear, *Ursus maritimus*
- 5.8. Summary and Conclusions
- 5.9. Further Reading and Resources

Chapter 6. Evolution and Geography

- 6.1. Introduction
- 6.2. Species Identity
- 6.3. Speciation
- 6.4. Ecological Factors Affecting Distributions of Marine Mammals
- 6.5. Present Patterns of Distribution
- 6.6. Reconstructing Biogeographic Patterns
- 6.7. Past Patterns of Distribution
- 6.8. Summary and Conclusions
- 6.9. Further Reading and Resources

Part 2. Evolutionary Biology, Ecology, and Behavior

Chapter 7. Integumentary and Sensory Systems

- 7.1. Introduction
- 7.2. Integumentary System
- 7.3. Nerves and Sense Organs
- 7.4. Summary and Conclusions
- 7.5. Further Reading and Resources

Chapter 8. Musculoskeletal System and Locomotion

- 8.1. Introduction
- 8.2. Pinnipeds
- 8.3. Cetaceans
- 8.4. Sirenians
- 8.5. Sea Otter
- 8.6. Polar Bear
- 8.7. Summary and Conclusions
- 8.8. Further Reading and Resources

Chapter 9. Energetics

- 9.1. Introduction
- 9.2. Metabolic Rates
- 9.3. Thermoregulation
- 9.4. Energetics of Locomotion
- 9.5. Osmoregulation
- 9.6. Summary and Conclusions
- 9.7. Further Reading and Resources

Chapter 10. Respiration and Diving Physiology

- 10.1. Introduction
- 10.2. Challenges of Deep and Prolonged Dives for Breath-Holders
- 10.3. Pulmonary and Circulatory Adaptations to Diving
- 10.4. Diving Response
- 10.5. Diving Behavior and Phylogenetic Patterns
- 10.6. Summary and Conclusions
- 10.7. Further Reading and Resources

Chapter 11. Sound Production for Communication, Echolocation, and Prey Capture

- 11.1. Introduction
- 11.2. Sound Propagation in Air and Water
- 11.3. Anatomy and Physiology of Sound Production and Reception
- 11.4. Functions of Intentionally Produced Sounds
- 11.5. Acoustic Thermometry of Ocean Climate and Low-Frequency Military Sonars
- 11.6. Summary and Conclusions
- 11.7. Further Reading and Resources

Chapter 12. Diet, Foraging Structures, and Strategies

- 12.1. Introduction
- 12.2. Seasonal and Geographical Patterns of Prey Abundance
- 12.3. Adaptations for Foraging in Pinnipeds
- 12.4. Feeding Specializations of Cetaceans
- 12.5. Feeding Specializations of Sirenians
- 12.6. Feeding Specializations of Other Marine Mammals
- 12.7. Summary and Conclusions
- 12.8. Further Reading and Resources

Chapter 13. Reproductive Structures, Strategies, and Patterns

- 13.1. Introduction
- 13.2. Anatomy and Physiology of the Reproductive System
- 13.3. Mating Systems
- 13.4. Lactation Strategies
- 13.5. Reproductive Patterns
- 13.6. Summary and Conclusions
- 13.7. Further Reading and Resources

Chapter 14. Population Structure and Dynamics

- 14.1. Introduction
- 14.2. Abundance and Its Determination in Marine Mammals
- 14.3. Techniques for Monitoring Populations
- 14.4. Population Structure and Dynamics
- 14.5. Summary and Conclusions

- 14.6. Further Reading and Resources

Part 3. Exploitation, Conservation, and Management

Chapter 15. Exploitation and Conservation

- 15.1. Introduction
- 15.2. Exploitation of Marine Mammals
- 15.3. Marine Mammal Conservation and Protection
- 15.4. Progress and the Future
- 15.5. Summary and Conclusions
- 15.6. Further Reading and Resources.
