

TABLE OF CONTENTS – Microbiology: A Laboratory Manual, 12th Edition

Part 1 Basic Laboratory Techniques for Isolation, Cultivation, and Cultural

- Experiment 1: Effectiveness of Hand Washing
- Experiment 2: Culture Transfer Techniques
- Experiment 3: Techniques for Isolation of Pure Cultures
- Experiment 4: *Cultural Characteristics of Microorganisms*

Part 2 Microscopy

- Experiment 5: Microscopic Examination of Stained Cell Preparations
- Experiment 6: Microscopic Examination of Living Microorganisms Using a Hanging-Drop Preparation or a Wet Mount

Part 3 Bacterial Staining

- Experiment 7: Preparation of Bacterial Smears
- Experiment 8: Simple Staining
- Experiment 9: Negative Staining
- Experiment 10: Gram Stain
- Experiment 11: Acid-Fast Stain
- Experiment 12: Differential Staining for Visualization of Bacterial Cell Structures

Part 4 Cultivation of Microorganisms: Nutritional and Physical Requirements, and Enumeration of Microbial Populations

- Experiment 13: Nutritional Requirements: Media for the Routine Cultivation of Bacteria
- Experiment 14: Use of Differential, Selective, and Enriched Media
- Experiment 15: Physical Factors: Temperature
- Experiment 16: Physical Factors: pH of the Extracellular Environment
- Experiment 17: Physical Factors: Atmospheric Oxygen Requirements
- Experiment 18: Techniques for the Cultivation of Anaerobic Microorganisms
- Experiment 19: Serial Dilution–Agar Plate Procedure to Quantitate Viable Cells
- Experiment 20: The Bacterial Growth Curve

Part 5 Biochemical Activities of Microorganisms

- Experiment 21: Extracellular Enzymatic Activities of Microorganisms
- Experiment 22: Carbohydrate Fermentation
- Experiment 23: Triple Sugar–Iron Agar Test
- Experiment 24: IMViC Test
- Experiment 25: Hydrogen Sulfide Test
- Experiment 26: Urease Test

- Experiment 27: Litmus–Milk Reactions
- Experiment 28: Nitrate Reduction Test
- Experiment 29: Catalase Test
- Experiment 30: Oxidase Test
- Experiment 31: Utilization of Amino Acids
- Experiment 32: Genus Identification of Unknown Bacterial Cultures

Part 6 The Protozoa

- Experiment 33: Free-Living Protozoa
- Experiment 34: Parasitic Protozoa

Part 7 The Fungi

- Experiment 35: Cultivation and Morphology of Molds
- Experiment 36: Isolation of a Soil Fungal Species
- Experiment 37: Morphology, Cultural Characteristics and Reproduction

Part 8 The Viruses

- Experiment 38: Cultivation and Enumeration of Bacteriophages
- Experiment 39: Isolation of Coliphages from Raw Sewage
- Experiment 40: Propagation of Isolated Bacteriophage Cultures

Part 9 Physical and Chemical Agents for the Control of Microbial Growth

- Experiment 41: Physical Agents of Control: Moist Heat
- Experiment 42: Chemical Agents of Control: Chemotherapeutic Agents
- Experiment 43: Determination of Penicillin Activity in the Presence and Absence of Penicillinase
- Experiment 44: Chemical Agents of Control: Disinfectants and Antiseptics

Part 10 Microbiology of Food

- Experiment 45: Microbiological Analysis of Food Products: Bacterial Count
- Experiment 46: Isolation of Salmonella from Raw Meat
- Experiment 47: Microbial Fermentation

PART 11 Microbiology of Water

- Experiment 48: Standard Qualitative Analysis of Water
- Experiment 49: Quantitative Analysis of Water: Membrane Filter Method

PART 12 Microbiology of Soil

- Experiment 50: Microbial Populations in Soil: Enumeration
- Experiment 51: Isolation of Antibiotic-Producing Microorganisms and Determination of Antimicrobial Spectrum of Isolates
- Experiment 52: Isolation of Pseudomonas Species by Means of the Enrichment Culture Technique

PART 13 Bacterial Genetics

- Experiment 53: Enzyme Induction
- Experiment 54: Bacterial Conjugation
- Experiment 55: Isolation of a Streptomycin-Resistant Mutant
- Experiment 56: The Ames Test: A Bacterial Test System for Chemical Carcinogenicity
- Experiment 57: Utilization of Bacterial Plasmids
- Experiment 58: Restriction Analysis and Electrophoretic Separation of Bacteriophage Lambda DNA

PART 14 Medical Microbiology

- Experiment 59: Microbial Flora of the Mouth: Determination of Susceptibility to Dental Caries
- Experiment 60: Normal Microbial Flora of the Throat and Skin
- Experiment 61: Identification of Human Staphylococcal Pathogens
- Experiment 62: Identification of Human Streptococcal Pathogens
- Experiment 63: Identification of Streptococcus pneumoniae
- Experiment 64: Identification of Enteric Microorganisms Using Computer-Assisted Multitest Microsystems
- Experiment 65: Isolation and Presumptive Identification of Campylobacter
- Experiment 66: Microbiological Analysis of Urine Specimens
- Experiment 67: Microbiological Analysis of Blood Specimens
- Experiment 68: Species Identification of Unknown Bacterial Cultures

PART 15 Immunology

- Experiment 69: Precipitin Reaction: The Ring Test
- Experiment 70: Agglutination Reaction: The Febrile Antibody Test
- Experiment 71: Enzyme-Linked Immunosorbent Assay
- Experiment 72: Sexually Transmitted Diseases: Rapid Immunodiagnostic Procedures.
