

TABLE OF CONTENTS – Molecular and Cellular Biology of Viruses

Preface

Acknowledgments

Author

1. The Fundamentals of Molecular and Cellular Virology
2. The Virus Replication Cycle
3. Attachment, Penetration, and Uncoating
4. Gene Expression and Genome Replication in Model Bacteriophages
5. Gene Expression and Genome Replication in the Positive-Strand RNA Viruses
6. Gene Expression and Genome Replication in the Negative-Strand RNA Viruses
7. Gene Expression and Genome Replication in the Double-Stranded RNA Viruses
8. Gene Expression and Genome Replication in the Double-Stranded DNA Viruses
9. Gene Expression and Genome Replication in the Single-Stranded DNA Viruses
10. Gene Expression and Genome Replication in the Retroviruses and Hepadnaviruses
11. Assembly, Release, and Maturation
12. Virus–Host Interactions during Lytic Growth
13. Persistent Viral Infections
14. Viral Evasion of Innate Host Defenses
15. Viral Evasion of Adaptive Host Defenses
16. Medical Applications of Molecular and Cellular Virology
17. Viral Diversity, Origins, and Evolution
