

TABLE OF CONTENTS

- American College of Laboratory Animal Medicine Series
- Preface
- Acknowledgments
- Reviewers
- Contributors
- Chapter 1. Viral Diseases of Nonhuman Primates**
- Introduction
- Enveloped DNA Viruses
- Nonenveloped DNA-Containing Viruses
- Enveloped RNA-Containing Viruses
- Nonenveloped RNA-Containing Viruses
- Chapter 2. Bacterial and Mycotic Diseases of Nonhuman Primates**
- Introduction
- Bacterial Diseases
- Mycotic Diseases
- Chapter 3. Tuberculosis Research using Nonhuman Primates**
- Introduction
- Human Tuberculosis
- Pathobiology of Human Disease: Natural History of Tuberculosis
- Primate Models of Tuberculosis
- Pathological Features of Model
- Statistical Considerations
- Occupational Health and Safety Considerations: Biosafety Level 3 Pathogen

Specific Areas of Research that Benefit from the Nonhuman Primate Model of Tuberculosis

Alternative Animal Models, In Silico Models, and In Vitro Systems

Summary

Acknowledgments

Chapter 4. Parasitic Diseases of Nonhuman Primates

Introduction

Protozoan Parasites

Metazoan Parasites

Acknowledgments

Chapter 5. Nonhuman Primate Models for Human Malaria Research

Introduction

Human Malaria

Life Cycle of Primate Malaria Parasites

Clinical Malaria and Pathology

Nonhuman Primate Models of Human Malaria (Biology, Disease Pathogenesis, Immunity, and Testing of Vaccines or Drugs)

Some Methods and Considerations for Investigations of Malaria Biology and Vaccines

Chapter 6. Neoplasia and Proliferative Disorders of Nonhuman Primates

Introduction

Characterization of Neoplasia

Mechanisms of Cancer Development

System Specific Neoplasia

Treatment and Prognosis

Chapter 7. Hematopoietic, Cardiovascular, Lymphoid and Mononuclear Phagocyte Systems of Nonhuman Primates

Introduction

Hematology

The Heart and Vasculature

Lymphoid and Mononuclear Phagocyte Systems

Chapter 8. Nonhuman Primate Models of Atherosclerosis

Introduction

Pathobiology of Human Atherosclerosis

Advantages of a Nonhuman Primate Model

Introduction to Primate Models

New World Monkeys

Old World Monkeys

Summary Assessment

Acknowledgements

Chapter 9. Respiratory System Diseases of Nonhuman Primates

Introduction

Respiratory System Structure and Function

Approach to the Patient with Respiratory Disease

Upper Airway Diseases

Lower Respiratory Tract Diseases

Disorders of the Diaphragm, Pleura, and Mediastinum

Viral Diseases

Bacterial Diseases and Agents

Mycotic Diseases

Protozoan Diseases

Metazoan Parasites

Acknowledgment

Chapter 10. Urogenital System

Part A. Urinary System

Urinary System

Part B. Genital System: Female

Genital System: Female

Part C. Genital System: Male

Genital System: Male

Chapter 11. Integumentary System Diseases of Nonhuman Primates

Introduction

Structure and Function of the Skin

Definitions and Descriptions of Skin Lesions

Examination of the Skin

Diseases of the Skin

Chapter 12. Digestive System Diseases of Nonhuman Primates

Introduction

Oral Cavity

Stomach and Intestine

Liver

Exocrine Pancreas

Acknowledgments

Chapter 13. Arthritis, Muscle, Adipose Tissue, and Bone Diseases of Nonhuman Primates

Introduction

Arthritis

Connective Tissue Disorders

Skeletal Muscle Diseases

Adipose Tissue Disorders

Bone Diseases

Nutritional Disorders

Musculoskeletal Neoplasia

Acknowledgments

Chapter 14. Diabetes and Obesity Research using Nonhuman Primates

Review of Diabetes in Humans

Review of Diabetes in Nonhuman Primates

Methods for Evaluating Diabetes in Nonhuman Primates

Nonhuman Primate Models of Diabetes

Pathologic Changes in Islets in Diabetic Monkeys

Co-Morbid Conditions in Diabetes

Sex Hormones and Effects on Insulin Resistance and Diabetes

Effects of Stress, Diet, and Caloric Restriction on Insulin Resistance and Diabetes

Pharmacologic Interventions to Treat Diabetes and Obesity

Conclusions and Future Directions

Acknowledgments

Chapter 15. Nervous System Disorders of Nonhuman Primates and Research Models

Clinical and Diagnostic Approaches

Specific Procedures

Naturally Occurring Infectious Diseases

Congenital and Developmental Conditions

Age-Related Changes in the CNS

Nutritional and Metabolic Disorders

Miscellaneous Conditions

Neoplasia of the Nervous System

Important Nonhuman Primate Models of Human Neurologic Diseases

Chapter 16. Nonhuman Primate Models of the Motor System

Introduction

The Rationale for Using Nonhuman Primates in Research Focused on the Motor System

Nonhuman Primate Models and Research on the Motor System

The 3RS and Nonhuman Primate Research on the Motor System

Acknowledgments

Chapter 17. Imaging in Research Using Nonhuman Primates

Introduction

Animal Preparation

Advanced Imaging Techniques

Chapter 18. Nonhuman Primate Models of Drug and Alcohol Addiction

Introduction

The Self-Administration Model

Addiction as a Disease of the Brain

Pharmacokinetic Factors Important for Addiction Research

Behavioral Similarities Important for Addiction Research

Genetic Factors Important for Addiction Research

Conclusions.
