

# • TABLE OF CONTENTS

Foreword

Introduction

## **1 Cellular biology and cytological interpretation: the philosophy behind the system**

Shape and observation

Morphology, identity and behaviour

Identity and interpretation

Behaviour and interpretation

Knowledge and interpretation

Cellular morphologies

Nuclear morphologies

Cytoplasmic morphologies

Supercellular morphologies

## **2 Distribution of cells in tissues and organs**

Introduction

Distribution of cells in normal tissues and organs

### **3 Cytotypes**

Introduction

Activated mesothelial cell

Adipocyte

Adipophage

Adrenal cell

Alveolar macrophage

Anal sac apocrine cell

Apocrine cell  
Astrocyte  
Band cell  
Basal cell  
Basophil  
Basophilic rubricyte  
Biliary cell  
Cardiomyocyte  
Cell• ]laden macrophage  
Centroblast  
Centrocyte  
Ceroid• ]laden macrophage  
Chondroblast  
Ciliated epithelial cell  
Conjunctival columnar cell  
Conjunctival goblet cell  
Conjunctival squamous cell  
Endocrine pancreas cell  
Endotheliocyte  
Enterocyte  
Eosinophil  
Ependymal cell  
Epididymal cell  
Epithelioid macrophage  
Erythrocyte

Exocrine pancreas cell  
Fibroblast  
Fibrocyte  
Flame cell  
Gastric chief cell  
Gastric mucous surface cel  
Gastric parietal cell  
Goblet cell  
Granular lymphocyte  
Granulosa cell  
Haemosiderophage  
Hepatocyte  
Hepatoid cell  
Immunoblast  
Inflammatory giant cell  
Intermediate squamous epithelial cell  
Ito cell  
Keratinized squamous epithelial cell  
Kupffer cell  
Leydig cell  
Lipoblast  
Luteal cell  
Lymphoglandular body  
Macrophage  
Mammary foam cell

Mammary gland cell  
Mast cell  
Mature non• ]nucleated keratinized squamous cell  
Megakaryoblast  
Megakaryocyte  
Melanocyte  
Melanophage  
Mesothelial cell  
Metamyelocyte  
Metarubricyte  
Microorganism• ]laden macrophage  
Monoblast  
Monocyte  
Mott cell  
Myeloblast  
Myelocyte  
Myoepithelial cell  
Neuron  
Neutrophil  
Non• ]keratinized squamous epithelial cell  
Normochromatic rubricyte  
Oligodendrocyte  
Oocyte  
Osteoblast  
Osteoclast

Parabasal squamous epithelial cell

Parathyroid chief cell

Pituicyte

Plasma cell

Plasmacytoid cell

Platelet

Pneumocyte

Polychromatic rubricyte

Polychromatophilic erythrocyte

Promegakaryocyte

Promyelocyte

Prorubricyte

Prostate cell

Renal tubular cell

Rhabdomyocyte

Rubriblast

Salivary gland cell

Sebocyte

Sertoli cell

Small lymphocyte

Smooth muscle cell

Spermatogenic cell

Spermatozoon

Splenic macrophage 1

Synoviocyte

Thymic epithelial cell

Thyroid follicular cell

Thyroid parafollicular cell

Tingible body macrophage

Urothelial cell

#### **4 Cytoarchitectures**

Introduction

Absence of cytoarchitecture (or sheets of cells)

Acinar cytoarchitecture

Honeycomb cytoarchitecture

Palisade cytoarchitectures

Papillary cytoarchitecture

Pavement cytoarchitecture

Perivascular cytoarchitecture

Solid three-dimensional cytoarchitecture

Storiform cytoarchitecture

Trabecular cytoarchitectures

Tubular cytoarchitecture

#### **5 Background**

Introduction

Absence of background

Blood background

Background composed of matrix

#### **6 Morphological alterations of cells**

Introduction

Morphological alterations related to cellular degeneration

Morphological alterations linked to cellular death

Atypical features

Index.
