Preface xiii

Acknowledgments xv

Chapter 1 Oocyte Development before and during Folliculogenesis 1

Melissa Pepling

1.1 Introduction 1

1.2 Germ Cell Cyst and Ovigerous Cord Formation 1

1.3 Meiotic Entry and Progression 4

1.4 Follicle Formation 6

1.5 Follicle Development 9

1.6 Steroid Hormone Signaling in Oocyte Development 13

1.7 Summary 14

References 14

Chapter 2 The *In Vitro* Culture of Ovarian Follicles: A Brief History and Current Considerations 21

Bahar Uslu and Joshua Johnson

2.1 Introduction 21

2.2 A Brief Historical Review of *In Vitro* Follicle Culture 23

2.3 State-of-the-Art *In Vitro* Follicle Culture 24

2.4 The Future of Ovarian Follicle Culture 28

Acknowledgments 29

References 29

Chapter 3 Regulation of Oocyte Meiotic Resumption by Somatic Cells 35

Masayuki Shimada

3.1 Meiotic Resumption Is Negatively Regulated in a cAMP-Dependent Manner 35

3.2 The Regulation of cAMP Level in Mouse Oocytes 37

3.3 The Expression and Roles of PDEs in both Cumulus Cells and Oocytes in Domestic Animals 38

3.4 Closure of Gap Junctional Communication 39

3.5 How to Activate the ERK1/2 Pathway in Cumulus Cells of COC 43

3.6 ERK1/2 in Cumulus Cells Is Required for Meiotic Resumption 45

3.7 Dynamic Changes of Kinase Activities within Oocytes 47

3.8 Conclusion 49

References 49

Chapter 4 Oocyte-Secreted Factors in Domestic Animals 55

Jeremy G. Thompson, David G. Mottershead, and Robert B. Gilchrist

4.1 Introduction 55

4.2 Historical Background 56

4.3 Localization and Specificity 57

4.4 Structure and Genetic Diversity of Gdf9 and Bmp15 58

4.5 Signalling Mechanisms of Gdf9 and Bmp15 60

4.6 Roles of Oocyte-Secreted Factors 61

4.7 Manipulation and Use in Reproductive Technologies 64

4.8 Concluding Remarks 65

References 66

Chapter 5 MicroRNAs in Oocyte Physiology and Development 71

Dawit Tesfaye, Md M. Hossain, and Karl Schellander

5.1 Introduction 71

5.2 Biogenesis of miRNA	71
5.3 Recognition and Post-Transcriptional Regulation of Target mRNA by miRNA	73
5.4 miRNA in Germ Cell Differentiation and Oogenesis	74
5.5 Expression and Regulation of miRNA in Oocyte Development	75
5.6 miRNAs in Oocyte Maturation and Competence	77
5.7 miRNAs as Temporal Regulatory Cascades of Maternal mRNA Translation	78
5.8 miRNAs in Oocyte Development in Relation to Endocrine Control	79
5.9 miRNA Regulation of Epigenetic Mechanisms in the Oocyte	79
5.10 Strategic Approaches and Challenges to Study the Role of miRNAs in Oocytes	80
5.11 Concluding Remarks	81

References 81

Chapter 6 Bovine Oocyte Gene Expression: Identification of Functional Regulators of Early Embryogenesis 85

Swamy K. Tripurani, Jianbo Yao, and George W. Smith

6.1 Introduction	85
6.2 Potential Contribution of Oocyte-Specific Transcriptional and Post-Transcriptional Regulators to Bovine Oocyte Competence: Available Evidence and Gaps in Knowledge	87
6.3 Maternal Oocyte-Derived Factors Required Specifically for Early Embryogenesis	94
6.4 Functional Genomics Studies of Bovine Oocyte Competence and Early Embryogenesis: Identification of Novel Mediators	99
6.5 Conclusions	104

References 105

Chapter 7 Epigenetic Modifications during Mammalian Oocyte Growth and Meiotic Progression 111

Claudia Baumann, Maria M. Viveiros, and Rabindranath De La Fuente

7.1 Introduction 111

7.2 Establishment of Epigenetic Modifications during Postnatal Oocyte Growth 112

7.3 Establishment and Maintenance of DNA Methylation during Oocyte Growth 114

7.4 Large-Scale Chromatin Remodeling during Meiotic Division 117

7.5 Environmental Effects Adversely Influencing the Female Gamete 127

7.6 Chromosome-microtubule Interactions in the Mammalian Oocyte 130

7.7 Conclusion 133

References 134

Chapter 8 Oocyte Calcium Homeostasis 145

Zoltan Machaty

8.1 Significance of Ca^{2+} 145

8.2 Signaling by Ca^{2+} 146

8.3 Ca^{2+} Signaling in Oocytes 150

8.4 Summary 159

References 159

Chapter 9 Oocyte Metabolism and Its Relationship to Developmental Competence 165

Rebecca L. Krisher and Jason R. Herrick

9.1 Introduction 165

9.2 Energy Substrates, *In Vivo* and *In Vitro* 167

9.3 Limitations of Oocyte Metabolism Assessment 169

9.4 Mitochondrial Function in the Oocyte	170
9.5 Cattle Oocyte Metabolism	171
9.6 Pig Oocyte Metabolism	173
9.7 Mouse Oocyte Metabolism	173
9.8 Oocyte Metabolism in Other Species	174
9.9 Oocyte Metabolism of Fatty Acids	174
9.10 Oocyte Metabolism Controls Meiosis: A View across Species	176
9.11 Oocyte Metabolism and Redox Balance	178
9.12 The Relationship between Oocyte Metabolism and Oocyte Quality	179
9.13 Maternal Diet and Disease Can Alter Oocyte Metabolism	180
9.14 Oocytes and the Warburg Effect	181
9.15 Conclusions	181
References	182

Chapter 10 Screening for Oocyte Competence 191

Marc-Andre Sirard and Mourad Assidi

10.1 Introduction	191
10.2 Concept of Oocyte Competence	191
10.3 Influence of Follicular Parameters on Oocyte Competence	194
10.4 Morphological Changes of the COC Associated with Competence	196
10.5 Biochemical Changes within the COC Associated with Competence	196
10.6 The Use of Coasting to Induce Competence in Large Mammals	197
10.7 The Use of Genomic/Gene Expression in Follicular Cells to Assess Oocyte Competence	198
10.8 The Use of Genomic/Gene Expression in Cumulus Cells to Assess Oocyte Competence	199

10.9 Signaling Pathways Involved in Competence Stimulation 201

10.10 Conclusion 201

References 202

Chapter 11 *In Vitro* Maturation Environment Affects Developmental Outcome 207

Pat Lonergan

11.1 Introduction 207

11.2 Oocyte Maturation in Vivo 208

11.3 *In Vitro* Embryo Production 209

11.4 Improving Oocyte Competence *before* Removal from the Follicle 211

11.5 Improving Oocyte Competence *after* Removal from the Follicle 212

11.6 Effect of Oocyte Environment on Embryo Gene Expression 213

11.7 Use of IVM in Practice in Cattle 214

11.8 Long-Term Consequences of *in Vitro* Maturation 215

11.9 Concluding Comments 216
