

TABLE OF CONTENTS – Otitis Externa

The Normal Ear

- Introduction
- Pinna
- External auditory meatus
- Middle ear
- Microscopic structure of the external ear canal
- Microclimate of the external ear canal
- Cerumen in normal and otitic ears

Approach to the Diagnosis of Otitis Externa

- Introduction
- Signalment
- History
- Physical examination
- Otic examination
- Otoscopic appearance of the external ear canal and tympanum
- Cytological characteristics of normal and abnormal ears
- Biopsy
- Imaging

Aetiology and Pathogenesis of Otitis Externa

- Concept of primary and secondary factors, predisposing factors, and perpetuating change
- Primary causes of otitis externa
- Secondary causes of otitis externa
- Perpetuating factors

Ear Cleaning

- Introduction
- Assessing the integrity of the tympanum
- Assessing the discharge
- Assessing the canal
- Cleaning process
- Home cleaning

Medical Management of Ear Disease

- Dealing with primary triggers
- Dealing with secondary causes
- Chronic or recurrent otitis externa in dogs

Otitis Media

- Aetiology
- Clinical signs
- Major differential diagnoses

Diagnosis
Management
Treatment of nasopharyngeal polyps in cats
Prognosis

Ototoxicity and Other Side-Effects of Otic Medication

Introduction
Meatal and tympanic inflammation
Effects within the middle ear
Ototoxicity
Systemic effects of otic medication
Ototoxicity of systemic drugs
Summary

Aural Ablation and Bulla Osteotomy

Introduction
Presurgical investigations
Vertical canal ablation
Bulla osteotomy
Special problems relating to surgery of the middle ear in cats
