

Table of contents

Preface xv

About the Companion Website xvii

1 Animal Associations and the Importance of Parasites 1

1.1 Introduction 1

1.2 Animal Associations 1

1.3 Parasite Hosts 10

1.4 Zoonotic Infections 13

1.5 The Co-evolution of Parasites and Their Hosts 13

1.6 Parasitism as a 'Lifestyle': Advantages and Limitations 17

1.7 The Economic Cost of Parasitic Diseases 18

1.8 Why Parasitic Diseases Remain a Problem 22

2 Taxonomy 27

2.1 Introduction 27

2.2 Viruses: A Special (Unresolved) Case 28

2.3 Taxonomic Hierarchy 28

2.4 Kingdom Protista 30

2.5 Kingdom Animalia 31

3 Parasitic Protozoa Part A: Phyla Rhizopoda, Metamonada, Apicomplexa 33

3.1 Introduction 33

3.2 Phylum Rhizopoda 34

3.3 Phylum Metamonada 42

3.4 Phylum Apicomplexa 49

3.5 Subclass Coccidiasina 60

4 Parasitic Protozoa Part B: Phylum Kinetoplastida; Parasitic Algae and Fungi 74

4.1	Introduction	74
4.2	Phylum Kinetoplastida	74
4.3	Phylum Chlorophyta	96
4.4	Kingdom Fungi	97
5	Platyhelminth and Acanthocephalan Parasites	101
5.1	Introduction	101
5.2	Phylum Platyhelminthes	101
5.3	Class Cestoda	125
5.4	Phylum Acanthocephala	145
6	Nematode Parasites	148
6.1	Introduction	148
6.2	Class Enoplea	150
6.3	Class Rhabdita	156
7	Arthropod Parasites	182
7.1	Introduction	182
7.2	Phylum Chelicerata	183
7.3	Phylum Crustacea	194
7.4	Subphylum Hexapoda	200
8	Parasite Transmission	229
8.1	Introduction	229
8.2	Contaminative Transmission	230
8.3	Transmission Associated with Reproduction	234
8.4	Autoinfection	239
8.5	Nosocomial Transmission	239
8.6	Active Parasite Transmission	240

8.7 Hosts and Vectors 241

8.8 Host Factors 246

8.9 Co-Transmission and Interactions Between Pathogens 254

8.10 Environmental Factors 256

9 Immune Reactions to Parasitic Infections 261

9.1 Introduction 261

9.2 Invertebrate Immunity 262

9.3 Vertebrate Immunity 265

9.4 Innate Immunity to Parasites 272

9.5 Adaptive Immune Reactions to Parasites 275

9.6 Microbiomes and Host Immune Reactions to Parasites 277

9.7 Avoiding the Host Immune Response 278

9.8 Immunity to Malaria 284

9.9 Schistosoma spp. and Hepatitis C Virus Interactions 289

9.10 HIV-AIDS and Parasitic Infections 289

10 Pathology Part A: Factors Influencing Pathogenesis, How Parasites Cause Pathology, Types of Pathology 295

10.1 Introduction 296

10.2 Factors Influencing Pathogenesis 296

10.3 Mechanisms By Which Parasites Cause Pathology 298

10.4 Types of Pathology 300

11 Pathology Part B: Damage to Specific Organs; Co-Infections and Pathogenesis 322

11.1 Introduction 322

11.2 Damage to Specific Organs 322

11.3 Co-Infections and Pathogenesis 344

12 The Useful Parasite 347

12.1 Introduction: The Goodness of Parasites?	347
12.2 The Importance of Parasites for the Maintenance of a Healthy Immune System	348
12.3 The Use of Parasites to Treat Medical Conditions	355
12.4 Parasites as Sources of Novel Pharmaceutically Active Substances	366
12.5 Parasites as Biological Control Agents	369
12.6 Parasites as Forensic Indicators	372
13 The Identification of Protozoan and Helminth Parasites	375
13.1 Laboratory Testing for Parasitic Infections: Introduction	375
13.2 Importance of Correct Identification	376
13.3 Properties of an Ideal Diagnostic Test	377
13.4 Isolation of Parasites	379
13.5 Identification from Gross Morphology	382
13.6 Biochemical Techniques for Identification	386
13.7 Immunological Techniques for Identification	387
13.8 Molecular Techniques for Identification	389
13.9 Diagnostic Testing of Parasitic Infections Outside the Laboratory: Introduction	393
14 Parasite Treatment	403
14.1 Introduction	403
14.2 The Ideal Antiparasitic Drug	403
14.3 Pharmaceutical Drugs	409
14.4 DNA/RNA Technology	411
14.5 Molecular Chaperones (Heat Shock Proteins)	414
14.6 Nanotechnology	415
14.7 Quantum Dots	417
14.8 Natural Remedies	417

14.9 Homeopathy 421

15 Parasite Vaccines 422

15.1 Introduction 422

15.2 The Design and Use of Vaccines 423

15.3 Herd Immunity 423

15.4 Factors Limiting the Production of Commercial Antiparasitic Vaccines 424

15.5 Properties of an Ideal Vaccine 424

15.6 Types of Vaccine 426

15.7 Identification of Antigens for Use in Anti-parasite Vaccines 432

15.8 Vaccine Delivery 433

15.9 Vaccines Against Malaria 434

15.10 Nanobodies (Single Domain Antibodies) 435

15.11 Problems with Vaccination Strategies 435

16 Parasite Control 437

16.1 Introduction 437

16.2 Eradication, Elimination, and Control 439

16.3 Education 441

16.4 Environmental Modification and Cultural Control 442

16.5 Remote Sensing and GIS Technology 444

16.6 Whether to Treat the Individual or the Population 445

16.7 Piggy-Backing Control Programmes 447

16.8 Disruptions to Control Programmes 447

16.9 Role of Governments, Foundations, and Aid Organisations 449
