

TABLE OF CONTENTS – Poultry and Pig Nutrition : Challenges of the 21st Century

Front Matter

1: Challenges in the 21st century in pig and poultry nutrition and the future of animal nutrition

2: New facets to an understanding of dietary nutrient utilisation

3: Feed intake and regulation

4: Gut nutrition and health in pigs and poultry

5: Animal nutrition and immunity in pigs and poultry

6: Nutritional modulation to improve health and welfare

7: Nutrigenomics and its perspective in nutrition

8: The adverse effects of heat stress on the antioxidant status and performance of pigs and poultry

9: Using non-invasive synchrotronbased analytical techniques in animal nutrition

10: Biotechnology in the feed industry and animal nutrition: harnessing microbes

11: Co-products in swine nutrition and feed formulation

12: Mycotoxins in the feed and animal products

13: Novel protein sources in animal nutrition: considerations and examples

14: Future of animal nutrition: the role of life cycle assessment

15: Nutrition and environmental sustainability

16: The role of nutrient utilisation models in precision animal management

17: Future technologies in pigs & poultry nutrition

18: Precision livestock feeding, principle and practice

Back Matter.
