How to Use This Learning Package

Part 1. Foundations of Veterinary Practice

1. Overview of Veterinary Technology

Education of Veterinary Technicians

Nomenclature Describing Veterinary Personnel

Scope of Veterinary Technician's Duties

Career Opportunities for Veterinary Technicians

Salary Ranges for Veterinary Technicians

Credentialed Veterinary Technicians: Certification, Registration, and Licensing

Veterinary Technician Specialties

The Future of Veterinary Technology

Veterinary Technician Professional Organizations and Resources

2. Ethical, Legal, and Safety Issues in Veterinary Medicine

Ethics

Law

Safety

3. Practice Management

Front Office Procedures

The Office Visit

Pet Health Insurance

AAHA and Accreditation

Practice Operations

Facility Maintenance

Marketing

Disaster Planning

4. Effective Communication in Veterinary Practice

The Communication Process

The Human-Animal Bond

Grief Counseling

Summary

5. Medical Terminology

Introduction to Word Parts

Using Word Parts to Form Words

Defining Medical Terms Using Word Analysis

Combining Forms for Body Parts and Anatomy

Suffixes for Surgical Procedures

Suffixes for Diseases or Conditions

Prefixes for Diseases or Conditions

Plural Endings

Suffixes for Instruments, Procedures, and Machines

Terms for Direction, Position, and Movement

Dental Terminology

Specific Terminology of Anatomy and Physiology

Part 2. Veterinary Diagnostics

6. Diagnostic Imaging

X-Ray Generation

Radiographic Image Quality

Radiographic Film

X-Ray Equipment

Digital X-Ray Imaging

Radiation Safety

Darkroom Techniques

Radiographic Artifacts

Radiographic Positioning and Terminology

Contrast Studies

Diagnostic Ultrasound

Endoscopy

Computed Tomography

Magnetic Resonance Imaging

Nuclear Medicine

7. Hematology and Hemostasis

Laboratory Instrumentation and Equipment

Laboratory Safety

Quality Control

Sample Collection

Formation and Functions of Blood and Blood Cells

Complete Blood Count

Differential Blood Cell Count

Evaluating the Blood Smear

Erythrocyte Morphology

Leukocyte Morphology

Platelets

Reticulocyte Counts

Erythrocyte Sedimentation Rate

Bone Marrow Examination

Hemostasis

Primary Hemostatic Tests

Secondary Hemostatic Tests

8. Clinical Chemistry and Serology

Sample Collection

Sample Type

Laboratory Selection

Laboratory Equipment

Features and Benefits of Common Analyzer Types

Hepatobiliary Function Testing

Basic Principles of Immunology

Types of Immunologic Tests

Molecular Diagnostics

Common Errors and Artifacts

Choosing a Test Kit

Test Significance

9. Microbiology, Cytology, and Urinalysis

Microbiology

Characteristics of Bacteria

Mycology

Materials Needed for the In-House Microbiology Lab

Immunologic Testing

Antimicrobial Sensitivity Testing

Quality Control Concerns

Cytology

Collection and Preparation of Samples from Tissues and Masses

Collection and Preparation of Fluid Samples

Urinalysis

Formation of Urine

The Complete Urinalysis

10. Parasitology

Parasitology

Classification of parasites

Diagnostic techniques in parasitology

Part 3. Veterinary Therapeutics

11. Pharmacology and Pharmacy

- Drug Names
- Dosage Forms
- Prescriptions and Dispensing Medication
- Calculating Drug Doses
- Storing and Handling Drugs in the Pharmacy
- Storing and Prescribing Controlled Substances
- Therapeutic Range
- Dosage Regimen
- Routes of Administration
- How Drugs Exert Their Effect
- Drugs Affecting the Gastrointestinal Tract
- Drugs Affecting the Cardiovascular System
- Drugs Affecting the Respiratory System
- Drugs Affecting the Endocrine System
- Drugs Affecting Reproduction
- Drugs Affecting the Nervous System
- Antimicrobials
- Antifungals
- Antiparasitics
- Anti-inflammatories
- Disinfectants and Antiseptics

12. Pathology, Response to Disease, and Preventive Medicine

- Pathology
- Preventive medicine

13. Management of Wounds, Fractures, and Other Injuries

- Wound Healing
- Wound Management
- Wound Closure
- Covering Wounds
- Orthopedic Bandages and Splints
- Casts
- Management of Specific Wound Types

14. Veterinary Anesthesia, Analgesia, and Anesthetic Nursing

- Introduction
- Fundamentals of Anesthesia
- Steps of Anesthesia
- Large Animal Anesthesia

15. Principles of Surgical Nursing

- General Surgical Principles
- Basic Surgical Terminology

- Preoperative and Postoperative Considerations
- Principles of Asepsis
- Care and Maintenance of Surgical Instruments and Supplies
- Preparation of the Operative Site
- Preparation of the Surgical Team
- Surgical Assisting
- Surgical Instruments
- Suture Materials
- Other Materials Used in Wound Closure
- Suture Removal

16. Fluid Therapy and Blood Transfusion

- Fluid Therapy
- Clinical Aspects of Fluid Therapy
- Fluid Choices
- Indications for Fluid Therapy
- Routes of Fluid Administration
- Intravenous Catheter Selection
- Intravenous Catheter Placement and Maintenance
- Fluid Administration
- Total Parenteral Nutrition
- Transfusion Medicine
- Clinical Evaluation of Bleeding
- Whole Blood and Blood Components
- Blood Types
- Sources of Donor Blood
- Blood Collection
- Blood Storage
- Blood Administration
- Transfusion Reactions

17. Emergency and Critical Care

- Emergency Readiness and Preparation
- Hospital Care
- Emergencies
- Emergency Procedures
- Oxygen Therapy
- Critical Care
- Summary

18. Small Animal Dentistry

- Oral Anatomy
- Dental Instruments
- Preparation for Dental Procedures
- Periodontal Disease
- Prophylaxis or Dental Cleaning
- Dental Records

Oral Radiology

Home Dental Care

19. Physical Therapy, Rehabilitation, and Complementary Medicine

Hands-On Therapy

Alternative and Complementary Medicine

Part 4. Animal Care and Husbandry

20. Animal Behavior

What Is Behavior and Where Does It Come From?

Preventing Behavior Problems in Companion Animals

Preventing Destructive Behavior by Cats

Preventing Destructive Behavior by Dogs

Preventing Aggressive Behavior Problems

Behavior in the Clinic

Providing Problem Prevention Services

Providing Problem Resolution Services

Referring Cases to Behavior Specialists

Behavior Problems in Exotic and Farm Animals

21. Physical Restraint

Basic Animal Behavior

Fear Free Practice and Low Stress Handling

Restraint and Handling of Dogs

Restraint and Handling of Cats

Restraint and Handling of Small Mammals

Restraint and Handling of Birds

Restraint and Handling of Horses

Restraint and Handling of Cattle

Restraint and Handling of Goats

Restraint and Handling of Sheep

Restraint and Handling of Pigs

22. Patient History and Physical Examination

Technician-Client Interaction

Physical Examination

Systematic Approach to Physical Examination

Physical Examination in Emergencies

23. Nutrition

Digestive System

Energy-Producing Nutrients

Non-Energy-Producing Nutrients

Feeding Considerations for Dogs

Feeding Considerations for Cats

Pet Food Considerations

Nutritional Support for Ill or Debilitated Patients

Feeding Considerations for Small Mammals
Feeding Considerations for Reptiles and Amphibians
Feeding Considerations for Laboratory Animals
Nutrition of Livestock
Feeding Management of Livestock
Livestock Clinical Nutrition

24. Nursing Care of Dogs and Cats

General Nursing Care
Administering Medications
Nursing Care in Special Circumstances
Nursing Care for Recumbent Patients
Care of Neonatal Puppies and Kittens
Care of Geriatric Patients

25. Nursing Care of Horses

General Care for Horses
Monitoring Patients
Care of Recumbent Horses
Bandaging
Administration of Medication
Diagnostic Imaging
Equine Dentistry
Common Diseases

26. Nursing Care of Production Animals, Camelids, and Ratites

Introduction
Care of Cattle (Bovine)
Care of Sheep (Ovine)
Care of Goats (Caprine)
Care of Swine (Porcine)
Diagnostic and Therapeutic Techniques
Care of Camelids
Care of Ratites
Common Diseases

27. Nursing Care of Companion Birds, Reptiles, and Amphibians

Birds
Avian Surgical Techniques
Reptiles
Hospitalization and Nursing Care
Amphibians

28. Nursing Care of Orphaned and Injured Wild Animals

Preparing Your Clinic for Wildlife Triage and Care
Capturing and Transporting Wildlife
Intake Procedures and History

Capture and Restraint of Wildlife
Physical Examination of Wildlife
Sample Collection and Diagnostic Testing
Routes of Administration of Medications and Fluids
Supportive Care of Wild Animals in the Hospital
Long-Term Rehabilitation
Ethical Treatment and Releasability of Wild Animals
Common Diseases and Injuries of Wild Animals
Wildlife Commonly Seen in the Clinic
Zoonotic and Infectious Diseases in Common Wild Animal Species
Isolation Caging Area—Preventing the Spread of Disease in the Clinic

29. Nursing Care of Laboratory Animals

The Use of Animals to Advance Medical Knowledge: The Pros, the Cons, and the Laws
The Role of the Veterinary Technician in Biomedical Research
Animals Used in Biomedical Research
Animal Models
Small Mammals Kept as Pets and Used in Research
Housing
Sanitation
Diet
Rodents
Rabbits
Ferrets
General Nursing Care
Diagnostic and Treatment Techniques
Venipuncture
Identification Methods Used in Research Animals
Anesthesia

Glossary

Index
