

TABLE OF CONTENTS – Respiratory Diseases of the Horse : A Problem-Oriented Approach to Diagnosis and Management

Anatomy of the equine respiratory tract

Introduction

Extrathoracic airways

Overview; nares and rostral nasal passages; nasal septum; conchae and paranasal sinuses; guttural pouches; nasopharynx; hard and soft palate; epiglottis; larynx; cervical trachea

Intrathoracic airways and the lungs

Tracheobronchial tree; pulmonary circulation; bronchial circulation

Pulmonary function

Ventilation

Respiratory muscles; lung volumes and ventilation; regional differences in ventilation

Diffusion

Respiratory gases; laws of diffusion; diffusion limitation; transport of gases in blood

Ventilation–perfusion relationship

Mechanics of breathing

Airflow resistance; lung elasticity; pulmonary inertance

Clinical examination

General inspection

Signalment; history; breathing pattern; nasal discharge

Physical examination

Extrathoracic airways: nose to extrathoracic trachea; intrathoracic airways and chest wall: intrathoracic trachea to alveoli

Diagnostic tests and therapeutic procedures

Endoscopy

Dynamic endoscopy

Diagnostic imaging

Radiography; computed tomography; nuclear imaging; ultrasonography

Sampling of respiratory secretions

Tracheal wash; bronchoalveolar lavage; airway brushing

Airway and lung biopsy

Endobronchial biopsy; percutaneous lung biopsy; thoracoscopic lung biopsy

Thoracocentesis

Sinus trephination

Sinoscopy

Thoracoscopy

Lung function tests

Arterial blood gases; lung mechanics

Allergy tests

Aerosol therapy

Principles of aerosol therapy; aerosol delivery devices; aerolization of antimicrobials

The coughing horse

Introduction

Definition; characteristics; pathophysiology

Acute cough

Viral respiratory infections; pneumonia

Chronic cough

Heaves (recurrent airway obstruction); inflammatory airway disease; parasitic pneumonitis

The horse with nasal discharge

Introduction

Seromucoid nasal discharge

Rhinitis; viral infections

Mucopurulent nasal discharge

Sinus diseases; guttural pouch empyema; strangles

Epistaxis

Exercise-induced pulmonary hemorrhage; ethmoid hematoma; guttural pouch mycosis; miscellaneous causes of epistaxis

Milk

Cleft palate; dorsal displacement of the soft palate

The horse with increased respiratory effort

Introduction

Pleuropneumonia/pneumonia; heaves (recurrent airway obstruction); interstitial lung diseases; proximal airway obstruction

Abnormal respiratory sounds

Introduction

Stridor

Nasal diseases: atheroma; alar fold obstruction; nasal septum obstruction; nasal polyps. Pharyngeal and laryngeal diseases: dorsal displacement of the soft palate; epiglottic entrapment; epiglottic retroversion; axial deviation of the aryepiglottic folds; epiglottitis; rostral displacement of the palatopharyngeal arch; laryngeal hemiplegia; arytenoid chondritis.

Tracheal diseases: collapsing trachea; tracheal trauma; tracheal neoplasia

Abnormal lung sounds

Congenital abnormalities

Wry nose; choanal atresia; palatoschisis (cleft palate); cysts; branchial arch defects; guttural pouch tympany
