

# TABLE OF CONTENTS – Spontaneous Pathology of the Laboratory Non-human Primate

- Cover image
- Title page
- Table of Contents
- Copyright
- Contributors
- Introduction
  
- **Chapter 1. Choice of the non-human primate for biomedical research**
  - 1. Introduction
  - 2. Non-human primates as disease models
  - 3. Non-human primates as models of aging and reproduction
  - 4. Non-human primates in drug and biopharmaceutical discovery and development
  - 5. Challenges for the use of non-human primates in research
  - 6. The future of non-human primates in biomedical research
  - 7. Conclusion
  
- **Chapter 2. Regulations and ethics concerning the use of non-human primates in research**
  - 1. Introduction
  - 2. Regulatory considerations for the use of non-human primates in research
  - 3. Ethical considerations for the use of non-human primates in research
  - 4. Conclusion
- **Chapter 3. Infectious diseases of non-human primates**
  - 1. Introduction
  - 2. Viruses
  - 3. Bacteria
  - 4. Parasites
  - 5. Opportunistic fungal infections
  - 6. Microsporidians
  - 7. Other pathogens of non-human primates—Pentastomida
  - 8. Conclusion
  
- **Chapter 4. Clinical examination of the non-human primate**
  - 1. Introduction
  - 2. The clinical exam of the non-human primate
  - 3. Prophylactic therapy
  - 4. Conclusion.
  
- **Chapter 5. Routes of administration for the non-human primate**
  - 1. Introduction
  - 2. Selecting the right dose route
  - 3. Commonly used routes of administration in NHP research

- 4. Other routes of administration
- 5. Conclusion
  
- **Chapter 6. The alimentary system of the non-human primate**
- 1. Introduction
- 2. Anatomy and histology of the alimentary system
- 3. Embryology of the non-human primate alimentary tract
- 4. Congenital lesions of the alimentary tract
- 5. Degenerative lesions of the alimentary tract
- 6. Inflammatory lesions of the alimentary tract
- 7. Hyperplastic lesions of the alimentary tract
- 8. Neoplastic lesions of the alimentary tract
- 9. Toxicologic lesions of the alimentary tract
- 10. Miscellaneous conditions of the alimentary tract
- 11. Non-human primate models of disease of the alimentary tract
- 12. Conclusion
  
- **Chapter 7. The hepatobiliary system of the non-human primate**
- 1. Introduction
- 2. Anatomy, microanatomy, and function of the liver and gallbladder
- 3. Effects of age on liver structure and function
- 4. Congenital lesions of the hepatobiliary system
- 5. Degenerative lesions of the hepatobiliary system
- 6. Inflammatory lesions of the hepatobiliary system
- 7. Hypertrophic and hyperplastic lesions of the hepatobiliary system
- 8. Neoplastic lesions
- 9. Miscellaneous conditions in non-human primates
- 10. Metabolic and nutritional conditions affecting the hepatobiliary system
- 11. Non-human primate models of liver disease
- 12. Toxicologic lesions of the hepatobiliary system
- 13. Conclusion
- 
- **Chapter 8. The exocrine pancreas of the non-human primate**
- 1. Introduction
- 2. Normal anatomy, histology, and physiology
- 3. Congenital lesions of the exocrine pancreas
- 4. Degenerative and regenerative lesions of the exocrine pancreas
- 5. Inflammatory lesions of the exocrine pancreas
- 6. Hyperplastic lesions of the exocrine pancreas
- 7. Neoplastic lesions of the exocrine pancreas
- 8. Miscellaneous lesions of the exocrine pancreas
- 9. Toxicologic lesions
- 10. Conclusion
- 
- **Chapter 9. The urinary system of the non-human primate**
- 1. Introduction
- 2. Embryology and fetal development of the urinary system
- 3. Structure and function of the urinary system
- 4. Congenital lesions of the urinary system
- 5. Degenerative lesions of the urinary system

- 6. Inflammatory and vascular lesions of the urinary system
- 7. Hyperplastic and metaplastic lesions of urinary system
- 8. Neoplastic lesions of the urinary system
- 9. Miscellaneous lesions of the urinary system
- 10. Toxicologic lesions of the urinary system
- 11. Conclusion
  
- **Chapter 10. The nervous system of the non-human primate**
- 1. Introduction
- 2. Anatomy and histology of the nervous system
- 3. Congenital lesions of the nervous system
- 4. Degenerative lesions of the nervous system
- 5. Inflammatory and vascular lesions of the nervous system
- 6. Neoplastic lesions of the nervous system
- 7. Miscellaneous spontaneous and artifactual findings of the nervous system
- 8. Toxicological findings of the nervous system
- 9. Conclusion
  
- **Chapter 11. The eye and ocular adnexa of the non-human primate**
- 1. Introduction
- 2. Embryology
- 3. Anatomy and histology
- 4. Congenital lesions
- 5. Inflammatory lesions
- 6. Degenerative lesions
- 7. Proliferative lesions
- 8. Toxicologic lesions
- 9. Miscellaneous lesions and artifacts
- 10. Conclusion
- 
- **Chapter 12. Musculoskeletal system of the non-human primate**
- 1. Muscle
- 2. Bone
- 3. Conclusion
- 
- **Chapter 13. The integumentary system of the non-human primate**
- 1. Introduction
- 2. Integumentary anatomy and histology
- 3. Evaluation and diagnosis of dermatological disease
- 4. Congenital and developmental lesions of skin
- 5. Degenerative lesions of skin
- 6. Inflammatory and vascular lesions
- 7. Hyperplastic and neoplastic lesions of skin
- 8. Other dermatological conditions of non-human primates
- 9. Non-human primate models with dermatologic manifestations
- 10. Toxicologic lesions of the integument
- 11. Fish skin grafting for non-human primate skin lesions
- 12. Conclusion

- **Chapter 14. The mammary gland of the non-human primate**
- 1. Introduction
- 2. Anatomy, histology, and embryology of the non-human primate mammary gland
- 3. Congenital lesions of the non-human primate mammary gland
- 4. Degenerative lesions of the non-human primate mammary gland
- 5. Inflammatory and vascular lesions of the non-human primate mammary gland
- 6. Hyperplastic and neoplastic lesions of the non-human primate mammary gland
- 7. Neoplastic lesions of the non-human primate mammary gland
- 8. Miscellaneous lesions of the non-human primate mammary gland
- 9. Toxicologic lesions of the non-human primate mammary gland
- 10. Conclusion
- 
- **Chapter 15. The respiratory system of the non-human primate**
- 1. Introduction
- 2. Anatomy and histology of the respiratory system
- 3. Congenital lesions of the respiratory system
- 4. Degenerative lesions of the respiratory system
- 5. Inflammatory and vascular lesions of the respiratory system
- 6. Hyperplastic, metaplastic, and neoplastic lesions of the respiratory system
- 7. Miscellaneous lesions of the respiratory system
- 8. Toxicologic lesions of the respiratory system
- 9. Non-human primate models of respiratory disease
- 10. Conclusion
- 
- **Chapter 16. The hematolymphoid system of the non-human primate**
- 1. Introduction
- 2. Anatomy of the hematolymphoid system
- 3. Congenital lesions of the hematolymphoid system
- 4. Degenerative lesions of the hematolymphoid system of the non-human primate
- 5. Inflammatory and vascular lesions of the hematopoietic system
- 6. Hyperplastic and neoplastic lesions of the hematolymphoid system
- 7. Miscellaneous findings in the hematolymphoid system of non-human primates
- 8. Toxicologic findings of the hematolymphoid system
- 9. Conclusion
- 
- **Chapter 17. The female reproductive tract of the non-human primate**
- 1. Introduction
- 2. Normal anatomy and biology
- 3. Congenital lesions of the female reproductive system
- 4. Degenerative lesions
- 5. Vascular lesions
- 6. Inflammatory lesions
- 7. Hyperplastic and neoplastic lesions
- 8. Miscellaneous spontaneous, experimental and iatrogenic lesions of the female reproductive system

- 9. Toxicologic lesions
- 10. Conclusion
- 
- **Chapter 18. The male reproductive system of the non-human primate**
- 1. Introduction
- 2. Anatomy and histology
- 3. Physiology
- 4. Congenital lesions
- 5. Degenerative lesions
- 6. Inflammatory and vascular lesions
- 7. Hyperplastic and neoplastic lesions
- 8. Toxicologic lesions
- 9. Conclusion
  
- **Chapter 19. The cardiovascular system of the non-human primate**
- 1. Introduction
- 2. Anatomy of the cardiovascular system
- 3. Congenital lesions of the cardiovascular system
- 4. Degenerative lesions of the cardiovascular system
- 5. Inflammatory and vascular lesions of the cardiovascular system
- 6. Hyperplastic lesions of the cardiovascular system
- 7. Neoplastic lesions of the cardiovascular system
- 8. Miscellaneous findings of the cardiovascular system
- 9. Toxicologic lesions of the cardiovascular system
- 10. Conclusion
  
- **Chapter 20. The endocrine system of the non-human primate**
- 1. Introduction
- 2. Anatomy, histology, and embryology of the endocrine system
- 3. The hypothalamic endocrine axes
- 4. Congenital lesions of the endocrine system
- 5. Degenerative lesions of the endocrine system
- 6. Inflammatory and vascular lesions of the endocrine system
- 7. Hyperplastic lesions of the endocrine system
- 8. Neoplastic lesions of the endocrine system
- 9. Other findings in endocrine organs of non-human primates
- 10. Toxicologically induced lesions of the endocrine system
- 11. Conclusion
  
- **Chapter 21. Clinical pathology of the non-human primate**
- 1. Introduction
- 2. Challenges and rationale for clinical pathology evaluations of non-human primates in biomedical research
- 3. Clinical pathology sample collection and analysis
- 4. Hematology
- 5. Hemostasis: factors, tests, and interpretation
- 6. Clinical chemistry: collection, analysis, and interpretation
- 7. Urinalysis: general overview and interpretation
- 8. Bone marrow smear evaluation
- 9. Conclusion

- **Chapter 22. Immunohistochemistry for the non-human primate**
- 1. Introduction
- 2. Why use immunohistochemistry
- 3. Methodology
- 4. Slide evaluation
- 5. Potentially useful immunohistochemical stains
- 6. Conclusion
- Index.
