

# TABLE OF CONTENTS

## The Mouse Nervous System

Dedication

List of Contributors

Preface

Acknowledgments

Chapter 1. Molecular Regionalization of the Developing Neural Tube

Chapter 2. Gene Targeting

Chapter 3. Genetic Neuroanatomy

Chapter 4. Neocortex

Chapter 5. Hippocampus

Chapter 6. Piriform Cortex and Amygdala

Chapter 7. Subpallial Structures

Chapter 8. Hypothalamus

Chapter 9. Diencephalon

Chapter 10. Midbrain

Chapter 11. Cerebellum

Chapter 12. Hindbrain

Chapter 13. Spinal Cord

Chapter 14. Vascular Supply

Chapter 15. Magnetic Resonance Imaging of the Mouse Brain

Chapter 16. Motor Nuclei of the Cranial Nerves

Chapter 17. Visceral Motoneurons

Chapter 18. Neurosecretory Nuclei of the Hypothalamus and Preoptic Area

Chapter 19. Motor Cortex

Chapter 20. Hypothalamic Goal-directed Behavior – Ingestive, Reproductive and Defensive

Chapter 21. The Somatosensory System

Chapter 22. Gustatory

Chapter 23. Pain

Chapter 24. Auditory System

Chapter 25. Visual System

Chapter 26. The Olfactory System

Chapter 27. Vestibular System

Chapter 28. The Basal Forebrain Cholinergic Projection System in Mice

Chapter 29. An Introduction to the Neurobiology of Emotions and Social Behavior

Chapter 30. Prefrontal Cortex

Chapter 31. Overview of Mouse Models for Psychiatric and Neurologic Disorders

Chapter 32. Mouse Models of Mental Illness and Neurological Disease

Chapter 33. The Neuroanatomy of Addictive Processes

Index.
