How to Read and Use this Book	xvi
Foreword	xviii
Preface	xx
Acknowledgements	xxii
Abbreviations	xxiv

1	Renal Anatomy, Physiology, and Evaluation of Function	1
----------	--	----------

General Functions of the Kidney	1
Anatomy of the Kidney	1
Renal Blood Supply	2
Anatomy of the Nephron	2
Urine	5
Urine Formation	5
Urinary Concentration and Dilution	7
Urine Concentration	7
Urine Dilution	11
The Role of Urea	11
The Role of Aquaporins	12
Renal Function Assessment	12
Fractional Clearance of Electrolytes	12
Glomerular Filtration	14
Approximation of Glomerular Filtration Rate	15
Renal Clearance	16
Blood Urea Nitrogen/Serum Urea Nitrogen	16
Serum Creatinine	18
Symmetric Dimethylarginine	20
Cystatin C	22
Interpretation of Renal Function Tests	23
Interpretation of Renal Function Tests in Renal Disease	23
Thyroid Status and Renal Function Evaluation	25
Interpretation of Renal Function Tests in Nonrenal Diseases	27
Gastrointestinal Disorders	27
Cardiac Conditions	27
Portosystemic Shunt	28
Periodontal Disease	28
Primary Hyperparathyroidism	28
Exercise	28
Immune-mediated Thrombocytopenia	28
Infectious and Parasitic Diseases	28
Uroperitoneum (Uroabdomen)	29

2 Introduction to Urinalysis**37**

- Introduction 37
- When to Perform Urinalysis 37
- Performing a Urinalysis 38

3 Urine Sample Collection and Handling**42**

- Introduction 42
- Collection of Voided And Post-Void Urine Samples 44
 - Urine Collected by Voiding 44
 - Manual Expression of Urine by Digital Palpation and Compression of the Bladder 46
 - Collection of Post-Voiding Urine Samples 47
- Urine Collected by Urinary Catheterization 49
 - Catheter Types 50
 - Specula Types 50
 - Chemical Restraint 51
 - Preparation and Positioning 51
 - Male Dogs 51
 - Female Dogs 52
 - Cats 52
 - Catheterization 52
 - Male Dogs 52
 - Female Dogs 53
 - Male Cats 54
 - Female Cats 54
 - Complications of Urethral Catheterization 54
 - Traumatic Urinary Catheterization 55
- Urine Collected by Cystocentesis 55
 - Preparation of the Cystocentesis Site 56
 - Bladder Palpation and Immobilization for Cystocentesis 56
 - Cystocentesis Technique 57
 - Blind Cystocentesis 59
 - Ultrasound Guidance for Cystocentesis 59
 - Contraindications/Complications of Cystocentesis 59

4 Physical Properties of Urine**64**

- Introduction 64
- Urine Color 64
 - Pink, Red, or Brown Urine 66
 - Very Dark Brown or Black Urine 68
 - Deep Amber (Yellow–Brown or Green–Brown) Urine 69
 - Yellow–Orange Urine 69

Yellow-Green Urine	69
Blue, Blue-Green, and Green Urine	69
Bright Yellow Urine	69
Pale to Colorless Urine	69
White Urine	70
Purple Urine	71
Clarity (Transparency and Turbidity)	71
Odor	72
Urine Concentration	74
General Concepts	74
Urine Specific Gravity	76
General Principles of Measurement of USG by Refractometry	76
Analyzer Types Used for Refractometry in Animals	77
How to Measure USG by Refractometry	79
Analytical Errors in USG Determination	80
Expected Urine Concentration: USG by Refractometry	81
Urine Osmolality	85
Expected Urine Concentration (U_{osm}) in Dogs and Puppies	85
U_{osm}/P_{osm} Ratio in Dogs	86
Expected Urine Concentration (U_{osm}) in Cats and Kittens	86
Polyuria/Polydipsia	86
History and Physical Examination	92
Diagnostic Testing	92
Mechanisms of PU/PD	97
Conditions Associated with Normal to High Circulating ADH	100
Endocrine Disorders	102
Adrenal Gland Dysfunction	102
Hypercalcemia	105
Liver Disease	110
Endotoxemia	110
Syndrome of Inappropriate Antidiuretic Hormone (SIADH)	112
Catecholamines	113
Iatrogenic	114
Categorization and Interpretation of the Degree of Urine Concentration	114

5 Chemical Properties of Urine

125

Introduction	125
Using the Dipstrip	126
Reading the Dipstrip	127
Automated Urinary Dipstrip Readers	130
Dipstrip Reagent Pad Color Reactions	131
Urine pH	132
Urine pH Measurement by Dipstrip	133
Urine pH Measurement by a pH Meter	133

Comparisons of Dipstrip and pH Meter Methodology	134
Expected Urine pH in Health and Disease	134
Urinary Protein	135
Methodology	135
Interferences	136
Interpretation	136
Urinary Glucose	137
Glucose Measurement by Dipstrip	138
Interferences	139
Interpretation of Glucosuria	140
Ketones	143
Methodology	143
Interferences	144
Interpretation	144
Occult Blood	145
Interferences	146
Interpretation	146
Bilirubin	148
Metabolism and Excretion	149
Methodology	149
Interferences	149
Interpretation	150
Urobilinogen	151
Metabolism of Bilirubin and Urobilinogen	151
Methodology	152
Interpretation	152
Leukocyte Esterase	153
Nitrite	153
Urine Specific Gravity by Dipstrip	154
Ascorbic Acid	155

6 Examination of Urinary Sediment

161

Introduction	161
Methodology	162
Preparing Urine Sediment for Examination	162
Storage and Preservation	162
Centrifugation	164
Examination of Urinary Sediment	166
Staining	167
Standardization of Enumeration During Urinary Microscopy	169
Unidentified Elements in Sediment – What to Do?	171
Automated Microscopy	172
Elements in Urine Sediment	177

Cellular Elements	177
Red Blood Cells	177
White Blood Cells	181
Organisms	185
Epithelial Cells	188
Casts	198
Formation of Casts	200
Hyaline Casts	203
Granular Casts	204
Waxy Casts	206
Cellular Casts	207
Crystals	211
Struvite Crystals	213
Calcium Oxalate Crystals	214
Calcium Phosphate	216
Ammonium Urate (Biurate), Amorphous Urates, and Uric Acid	217
Xanthine	218
Bilirubin	218
Cystine	218
Unusual or Rare Crystals	219
Miscellaneous Elements and Artifacts	222

7 Proteinuria

236

Introduction	237
Glomerular and Tubular Handling of Protein in Health	237
Localization and Classification of Proteinuria	241
Prerenal Proteinuria	242
Postrenal Proteinuria	242
Renal Proteinuria	243
Development of Renal Proteinuria	245
Measurement of Proteinuria	246
Dipstrips	246
Precipitation Testing for Urinary Proteins	248
Urinary Protein-to-Creatinine Ratio	250
Microalbuminuria	253
Urinary Protein Electrophoresis	255
Interpretation and Monitoring of Renal Proteinuria	255
Disorders Characterized by Renal Proteinuria	257
Genetic Disorders	257
Hereditary Nephropathy	257
Podocytopathy	258
Immune Complexes, Glomerular Disease, and Renal Proteinuria	261
Acute Kidney Injury	262
Other Familial Glomerulopathies	264

Renal Dysplasia	265
Renal Amyloidosis	266
Consequences and Progression of Glomerular Proteinuria	267
Fibrosis	269
Specific Disease Syndromes and Proteinuria	270
Systemic Hypertension	270
Congestive Heart Failure (CHF)	271
Critical Care	271
Neoplasia	272
Exercise	272
Hyperthermia and Hypothermia	272
Endocrine Disorders	273
Hyperadrenocorticism	273
Exogenous Glucocorticosteroids	273
Diabetes Mellitus	274
Hyperthyroidism	274
Acromegaly	274
Idiopathic Hypertriglyceridemia	275
Systemic Lupus Erythematosus (SLE)	275
Cyclic Hematopoiesis (Gray Collie Syndrome)	275
Pyometra	275
Infectious Causes	276
Heartworm Disease	277
Histoplasmosis	278
Leishmaniasis	278
Canine Adenovirus 1 (CAV-1)	279
Feline Leukemia Virus (FeLV)	279
Feline Immunodeficiency Virus	279
Feline Infectious Peritonitis (FIP)	280
Feline Morbillivirus (FeMV)	280
Nephrotic Syndrome	280
Treatment of Renal Proteinuria	281
Introduction and Goals	281
Dietary Therapy	281
Experimental CKD in Dogs	284
Experimental CKD in Cats	285
Clinical CKD in Humans	285
Clinical CKD in Dogs and Cats	286
Treatment with Dietary Polyunsaturated Fatty Acids	286
Role of Vitamin D	287
Pharmaceutical Therapy	287
Overview	287
ACE-I and ARB Treatment	290
Mineralocorticoid Receptor Blockers	293

RAAS-I Treatment Contraindications and Side Effects	294
Calcium Channel Blockers	295
Sodium-Glucose Cotransporter 2 (SGLT2) Inhibitors	295
Calcimimetics	295
Residual Proteinuria	296
Treatment of Complicated Cases	296
Immunosuppressive Therapy	297
Conclusion	298

8 Atlas

317

Cellular Elements	317
Red Blood Cells	317
White Blood Cells	319
Organisms (Including Parasites)	325
Epithelial Cells	330
Casts	338
Hyaline	338
Granular Casts – Degenerating Cellular, Coarse, Fine	341
Waxy Casts	351
Cellular Casts	354
Crystals	360
Struvite Crystals	360
Calcium Oxalate Crystals	367
Urate Crystals	370
Unusual or Rare Crystals	373
Artifacts and Miscellaneous Elements	381

9 Frequently Asked Questions (FAQ)

383

Chapter 1 – Renal Anatomy and Renal Functions	383
Chapter 2 – Introduction to UA	386
Chapter 3 – Collection and Handling	387
Chapter 4 – Physical Properties	389
Chapter 5 – Chemical Properties	392
Chapter 6 – Urinary Sediment/Microscopy	394
Chapter 7 – Proteinuria	402

10 Case Studies

406

Glossary	500
Index	514
