List of Contributors xvii

Preface xix

Acknowledgements xxi

## **1 Introduction and History of Endoscopy 1**

*Timothy C. McCarthy*

1.1 Introduction 1

1.2 The History of Endoscopy 1

1.3 Clinical Application in Veterinary Medicine 6

References 7

## **2 Instrumentation for Endoscopy 9**

*Timothy C. McCarthy*

2.1 Endoscopy Room Setup and Organization 9

2.2 Instrumentation for Small Animal Endoscopy 10

2.2.1 The Endoscopy Video Tower 10

2.2.2 Video Cameras 10

2.2.3 Video Monitors 11

2.2.4 Light Source 12

2.2.5 Documentation Equipment 13

2.2.6 Power Equipment 14

2.2.6.1 Radio-Frequency Instrumentation 14

2.2.6.2 Vessel Sealing Devices 14

2.2.7 Irrigation Fluid Management Systems 16

2.2.7.1 Gravity Flow 16

2.2.7.2 Pressure-Assisted Flow 17

2.2.7.3 Mechanical Fluid Pumps 17

- 2.2.8 Operating Tables 17
- 2.2.9 Rigid Telescopes 17
- 2.2.10 Flexible Endoscopes 20
- 2.2.11 Sheaths, Cannulas, and Trocars 21
- 2.2.12 Diagnostic and Operative Instruments 24

**3 Gastrointestinal Endoscopy 27**  
*Reto Neiger and Christiane Stengel*

- 3.1 Equipment 27
  - 3.1.1 Flexible Endoscopy 27
  - 3.1.2 Rigid Endoscopy 30
  - 3.1.3 Ancillary Equipment 30
    - 3.1.3.1 Biopsy Forceps 31
    - 3.1.3.2 Foreign Body Retrieval Instruments 31
    - 3.1.3.3 Others 31
- 3.2 Technique 32
  - 3.2.1 Handling the Endoscope 32
  - 3.2.2 Handling Accessory Instruments 32
  - 3.2.3 Taking Biopsies and Brush Cytology 33
  - 3.2.4 Patient Preparation 36
  - 3.2.5 Anesthesia 37
  - 3.2.6 Complications and Contraindications 37
  - 3.2.7 Endoscopic Training 38
- 3.3 Esophagoscopy 39
  - 3.3.1 Indications, Limitations 39
  - 3.3.2 Procedure 39
  - 3.3.3 Normal Findings 41

3.3.4 Abnormal Findings	41
3.4 Gastroscopy and Duodenoscopy	48
3.4.1 Indications, Limitations	48
3.4.2 Procedure	50
3.4.3 Normal Findings	55
3.4.4 Abnormal Findings	56
3.5 Colonoscopy/Ileoscopy	60
3.5.1 Indications, Limitations	60
3.5.2 Procedure	63
3.5.3 Normal Findings	68
3.5.4 Abnormal Findings	68
3.6 Therapeutic Flexible GI Endoscopy	71
3.6.1 Foreign Body Retrieval	71
3.6.1.1 Esophageal Foreign Body Removal	74
3.6.1.2 Duodenal Foreign Body Removal	77
3.6.1.3 Colonic and Rectal Foreign Body Removal	78
3.6.2 Feeding Tube Placement	78
3.6.2.1 Procedure	79
3.6.2.2 Tube Management	81
3.6.2.3 Replacement and Removal	83
3.6.3 Stricture Dilation	83
3.6.4 Stent Placement	86
3.6.5 Polyp Removal	87
3.7 Additional Techniques in GI Endoscopy	87
3.7.1 Capsule Endoscopy	87

3.7.2 Double Balloon Endoscopy	87
3.7.3 Confocal Endomicroscopy	88
3.7.4 Natural Orifice Transluminal Endoscopic Surgery	88
3.7.5 Endoscopic Retrograde Cholangiopancreatography	88
3.8 Care and Cleaning of GI Endoscopic Equipment	88
3.8.1 Pre-Cleaning	89
3.8.2 Manual Cleaning	90
3.8.3 Machine Cleaning	91
3.8.4 Storage	92
3.8.5 Sterilization or High-Level Disinfection	93
References	93

#### **4 Rhinoscopy 99**

*Timothy C. McCarthy*

4.1 Introduction	99
4.2 Indications	100
4.3 Instrumentation	102
4.4 Preparation of the Patient	104
4.5 Technique	105
4.5.1 Radiographic Imaging	105
4.5.2 Culture Sample Collection	108
4.5.3 Rhinoscopy	108
4.5.4 Frontal Sinoscopy	112
4.6 Normal Nasal Cavity and Frontal Sinuses	113
4.7 Nasal Pathology	120
4.7.1 Nasal Neoplasia	120
4.7.2 Mycotic Rhinitis and Sinusitis	142

4.7.2.1 Aspergillosis	142
4.7.2.2 Cryptococcosis	152
4.7.3 Allergic Rhinitis	153
4.7.4 Nasal Foreign Bodies	157
4.7.5 Rhinitis Secondary to Dental Disease	159
4.7.6 Nasal Turbinate Infarction	161
4.7.7 Traumatic Rhinitis	164
4.7.8 Nasal Disease Secondary to Otic Diseases	165
4.7.9 Parasitic Rhinitis	169
4.7.10 Canenoid and Felenoid Diseases	171
4.7.11 Nasal Hamartomas	172
4.7.12 Viral Rhinitis	173
4.7.13 Bacterial Rhinitis	173
4.7.14 Nasal Vascular Dysplasia	174
4.7.15 Epistaxis	174
4.7.16 Rhinitis of Undetermined Origin	175
4.7.17 Brachiocephalic Nasal Airway Syndrome	179
4.7.18 Nasopharyngeal Stenosis	181
4.7.19 Nasal Lymphoid Hyperplasia	185
4.7.20 Nasal Angiofibroma	187
References	192

## **5 Bronchoscopy 195**

*Brendan C. McKiernan*

5.1 Introduction 195

5.2 Equipment 195

5.2.1 Equipment Care and Cleaning 195

5.3	Indications and Contraindications of Bronchoscopy	196
5.4	Anesthesia for Bronchoscopy	196
5.4.1	Monitoring and Positioning the Patient for Bronchoscopy	198
5.5	Bronchoscopic Training	199
5.6	Bronchoscopic Procedure	199
5.7	Normal and Abnormal Bronchoscopic Findings	201
5.8	Sample Procurement and Handling	206
5.9	Summary	213
	References	214

## **6 Cystoscopy 217**

*Timothy C. McCarthy*

6.1	Introduction	217
6.2	Cystoscopy Indications	218
6.2.1	Chronic Cystitis	219
6.2.2	Hematuria	219
6.2.3	Tenesmus or Stranguria	219
6.2.4	Increased Frequency of Urination	219
6.2.5	Urinary Incontinence	219
6.2.6	Ureterocele	220
6.2.7	Alteration of the Urinary Stream	220
6.2.8	Trauma	220
6.2.9	Cystic and Urethral Calculi	221
6.3	Instrumentation for Cystoscopy	221
6.3.1	Transurethral Cystoscopy in Female Dogs and Cats	222
6.3.2	Instrumentation for Transurethral Cystoscopy in Male Dogs	226
6.3.3	Instrumentation for Transurethral Cystoscopy in Male Cats	227

6.3.4 Instrumentation for Prepubic Percutaneous Cystoscopy	227
6.3.4.1 Telescopes	227
6.3.4.2 Sheaths	227
6.3.4.3 Sharp Trocars and Blunt Obturators	227
6.3.4.4 Second Puncture Cannulas	227
6.3.4.5 Operative Instrumentation	228
6.3.5 Instrumentation for Percutaneous Perineal Cystoscopy in Male Dogs	228
6.3.6 Instrumentation for Laparoscopic-Assisted Cystoscopy	228
6.3.6.1 Telescopes	228
6.3.6.2 Flexible Cystourethroscopes	228
6.3.6.3 Cannulas and Sheaths	228
6.3.6.4 Operative Instrumentation	229
6.3.7 Instrumentation for Lithotripsy	229
6.4 Techniques for Transurethral Cystoscopy	230
6.4.1 Patient Preparation	230
6.4.2 Transurethral Cystoscopy in Female Dogs and Cats	231
6.4.3 Transurethral Cystoscopy in Male Dogs	240
6.4.4 Transurethral Cystoscopy in Male Cats	244
6.4.5 Technique for Prepubic Percutaneous Cystoscopy	247
6.4.5.1 The Original Technique	247
6.4.5.2 Modified PPC Technique	250
6.4.5.3 Diagnostic Sample Collection	250
6.4.6 Technique for Laparoscopic-Assisted Cystoscopy	250
6.4.6.1 Diagnostic Sample Collection	257
6.4.7 Photodynamic Diagnostics with Cystoscopy	257

6.5 Normal Endoscopic Anatomy of the Lower Urinary Tract	257
6.5.1 Transurethral Cystoscopy in Female Dogs and Cats: Vagina	257
6.5.2 TUC in Female Dogs and Cats: Urethra and Bladder	262
6.5.3 Transurethral Cystoscopy in Male Dogs	267
6.5.4 Transurethral Cystoscopy in Male Cats	268
6.5.5 Normal Endoscopic Anatomy: LAC and PPC in the Dog and Cat	269
6.6 Diagnoses with Cystoscopy	269
6.6.1 Cystitis and Urethritis	269
6.6.1.1 Interstitial Cystitis	270
6.6.1.2 Follicular Cystitis	270
6.6.1.3 Polypoid Cystitis	273
6.6.1.4 Chronic Diffuse Cystitis	275
6.6.1.5 Urethral Strictures	280
6.6.1.6 Urethrocutaneous Fistula	282
6.6.1.7 Prostatitis	282
6.6.2 Neoplasia of the Lower Urinary Tract	284
6.6.2.1 Transitional Cell Carcinomas	284
6.6.2.2 Other Tumors of the Lower Urinary Tract	294
6.6.2.3 Vaginal Tumors and Masses	294
6.6.3 Cystic and Urethral Calculi	300
6.6.3.1 Oxalate Calculi	301
6.6.3.2 Struvite Calculi	301
6.6.3.3 Urate Calculi	302
6.6.3.4 Silica Calculi	302
6.6.4 Anatomic Abnormalities	307

6.6.4.1	Vaginal Anatomic Abnormalities	307
6.6.4.2	Ectopic Ureters and Ureteroceles	308
6.6.4.3	Ureteroceles	313
6.6.4.4	Ectopic Ureters in Male Dogs	315
6.6.4.5	Bladder Diverticula	317
6.6.4.6	Vascular Dysplasia	320
6.6.5	Urinary Tract Trauma	320
6.6.6	Renal Hematuria	325
6.7	Interventional and Operative Cystoscopy	326
6.7.1	Minimally Invasive Management of Inflammatory Disease	326
6.7.2	Minimally Invasive Management of Neoplasia	328
6.7.2.1	Transitional Cell Carcinoma Management	328
6.7.2.2	Management of Other Tumor Types	338
6.7.3	Minimally Invasive Urolithiasis Management	338
6.7.3.1	Hydropropulsion	339
6.7.3.2	Transurethral Cystoscopy	340
6.7.3.3	Laparoscopic-Assisted Cystoscopy	341
6.7.3.4	Minimally Invasive Management of Urethral Calculi in Male Dogs	343
6.7.4	Minimally Invasive Management of Anatomic Abnormalities	344
6.7.4.1	Ectopic Ureters	344
6.7.4.2	Laparoscopic-Assisted Ectopic Ureter Correction in Male Dogs	352
6.7.4.3	Minimally Invasive Vaginal Web and Septum Transection	353
6.7.4.4	Minimally Invasive Management of Urachal Diverticula	355
6.7.5	Minimally Invasive Management of Urinary Incontinence	357
	References	359

## **7 Vaginal Endoscopy in the Bitch 363**

*Cindy Maenhoudt and Natalia Ribeiro dos Santos*

7.1 Canine Vaginal Anatomy 363

7.2 Instrumentation 363

7.3 Cleaning and Sterilization of Equipment 365

7.4 Procedures in the Bitch 366

7.4.1 Transcervical Insemination (TCI) 366

7.4.1.1 Introduction of the Endoscope and Catheterization of the Cervix 366

7.4.1.2 Insemination 369

7.4.2 Observation of the Vaginal Changes Throughout the Estrous Cycle 370

7.4.2.1 Proestrus 370

7.4.2.2 Estrus 370

7.4.2.3 Diestrus and Anestrus 371

7.4.3 Diagnostic Vaginoscopy 371

7.4.3.1 Anomalies Related to the Paramesonephric Ducts 372

7.4.3.2 Vaginitis, Vaginal Mass, and Foreign Body 373

7.4.4 Other Uterine Procedures 373

7.4.4.1 Hysteroscopy 374

7.4.4.2 Endometrial Biopsy 375

7.4.4.3 Uterine Cytology and Culture 376

7.4.4.4 Uterine Lavage 376

7.4.4.5 Other Usages 377

7.4.5 Complications and Limitations 377

7.4.6 Tips and General Comments 378

7.5 Conclusion 379

References 379

## **8 Laparoscopy 383**

*Timothy C. McCarthy*

8.1 Introduction 383

8.2 Indications for Laparoscopy 385

8.2.1 Indications for Diagnostic Laparoscopy 385

8.2.2 Indications for Operative Laparoscopy 386

8.3 Instrumentation for Small Animal Laparoscopy 388

8.3.1 Insufflator 388

8.3.2 Laparoscopes 389

8.3.3 Trocar-Cannulas 391

8.3.4 Operative Instruments 392

8.3.5 Hemostasis 395

8.3.6 Single Incision Laparoscopic Surgery (SILS) Instruments 398

8.3.7 Single Incision Wound Protectors/Retractors for MIS 399

8.4 Laparoscopy Technique 399

8.4.1 Portal Placement and Insufflation 399

8.4.2 Laparoscopic-Assisted Technique 407

8.4.3 Anesthesia for Laparoscopy 407

8.5 Normal Laparoscopic Anatomy 408

8.5.1 The Abdominal Wall, Diaphragm, and Falciform Ligament 408

8.5.2 Normal Liver and Gall Bladder 414

8.5.3 Normal Kidneys 415

8.5.4 Normal Pancreas 416

8.5.5 Normal Spleen 416

8.5.6 Normal Urinary Bladder and Ureters 417

8.5.7 Normal Gastrointestinal Tract 418

8.5.8 Normal Ovaries and Uterus	422
8.5.9 Normal Adrenal Glands	424
8.5.10 Normal Blood Vessels	425
8.6 Laparoscopic Abdominal Abnormalities	426
8.6.1 Abdominal Wall Abnormalities	427
8.6.2 Diaphragmatic Abnormalities	431
8.6.3 Fat Abnormalities	432
8.6.4 Free Abdominal Foreign Bodies	433
8.6.5 Liver Abnormalities	434
8.6.6 Gall Bladder Abnormalities	444
8.6.7 Extra-Hepatic Bile Duct Abnormalities	447
8.6.8 Kidney Abnormalities	447
8.6.9 Pancreatic Abnormalities	449
8.6.10 Splenic Abnormalities	450
8.6.11 Adrenal Gland Abnormalities	454
8.6.12 Bladder and Ureteral Abnormalities	455
8.6.13 Abnormalities of the Gastrointestinal Tract	458
8.6.14 Ovarian Abnormalities	461
8.6.15 Abnormalities of the Uterus	463
8.6.16 Testicular Abnormalities	463
8.6.17 Blood Vessel and Lymphatic Abnormalities	464
8.6.18 Abdominal Fluid, Ascites, and Bleeding	464
8.6.19 Abdominal Masses and Cancer Staging	468
8.7 Diagnostic Laparoscopy and Biopsy Techniques	469
8.7.1 Exploratory Laparoscopy	469

- 8.7.2 Liver Biopsy 469
- 8.7.3 Cholecystocentesis 474
- 8.7.4 Pancreatic Biopsy 474
- 8.7.5 Kidney Biopsy 475
- 8.7.6 Gastrointestinal Biopsy 478
- 8.7.7 Biopsy of the Spleen 483
- 8.7.8 Biopsy Techniques for Additional Organs and Tissues 484
- 8.7.9 Cancer Staging 484
- 8.8 Minimally Invasive Abdominal Surgery 485
  - 8.8.1 Laparoscopic Ovariectomy 485
    - 8.8.1.1 Single-Port Technique 486
    - 8.8.1.2 Two-Port Techniques 492
    - 8.8.1.3 Three-Port Technique 495
  - 8.8.2 Laparoscopic Ovariohysterectomy 497
  - 8.8.3 Ovarian Remnant Removal 500
  - 8.8.4 Cryptorchid Castration 501
  - 8.8.5 Laparoscopic Vasectomy 506
  - 8.8.6 Prophylactic Gastropexy 506
    - 8.8.6.1 Laparoscopic-Assisted Gastropexy 506
    - 8.8.6.2 Laparoscopic Gastropexy 513
  - 8.8.7 Laparoscopic-Assisted Gastrotomy 514
  - 8.8.8 Laparoscopic Pyloroplasty 516
  - 8.8.9 Laparoscopic-Assisted Enterotomy and Intestinal Resection with Anastomosis 516
  - 8.8.10 Laparoscopic-Assisted Cecectomy 517
  - 8.8.11 Laparoscopic Cholecystectomy 517

8.8.12	Laparoscopic Partial Pancreatectomy	522
8.8.13	Pancreatic Cyst Ablation	525
8.8.14	Laparoscopic Nephrectomy	526
8.8.15	Laparoscopic Adrenalectomy	528
8.8.16	Laparoscopic Portosystemic Shunt Occlusion	533
8.8.17	Laparoscopic Splenectomy	535
8.8.18	Laparoscopic Herniorrhaphy	536
8.8.19	Laparoscopic Urethral Occluder Implantation	537
8.8.20	Laparoscopic-Assisted Cystoscopy	541
8.8.21	Laparoscopic-Assisted Cystopexy	545
8.8.22	Laparoscopic-Assisted Intestinal Feeding Tube Placement	546
8.8.23	Laparoscopic-Assisted Gastrostomy Feeding Tube Placement	547
8.8.24	Additional Minimally Invasive Abdominal Surgical Procedures	547
	References	547

## **9 Thoracoscopy 553**

*Timothy C. McCarthy*

9.1	Introduction	553
9.2	Indications	553
9.3	Thoracoscopy Instrumentation	555
9.3.1	Telescopes	555
9.3.2	Cannulas	557
9.3.3	Operative and Sample Collection Instruments	558
9.4	Thoracoscopy General Technique	559
9.4.1	Patient Preparation	559
9.4.2	Technique Anesthesia and Pneumothorax	559
9.4.3	Telescope Portal Placement	562

9.4.3.1 Paraxiphoid Telescope Portal	562
9.4.3.2 Lateral Telescope Portal Placement	563
9.4.4 Operative Portal Placement	566
9.4.5 Portal Closure and Pleural Space Management	566
9.4.6 Postoperative Recovery	569
9.5 Thoracoscopy: Normal Thoracic Anatomy	569
9.6 Thoracic Pathology	572
9.6.1 Pleural and Pericardial Fluid	573
9.6.2 Chest Wall Abnormalities	575
9.6.3 Abnormalities of the Diaphragm	577
9.6.4 Mediastinal Abnormalities	580
9.6.5 Thoracic Foreign Bodies	581
9.6.6 Lung Pathology	583
9.6.6.1 Neoplasia	584
9.6.6.2 Pneumothorax	585
9.6.6.3 Spontaneous Pneumothorax	585
9.6.6.4 Primary Pulmonary Disease	589
9.6.6.5 Lung Lobe Torsion	591
9.6.7 Pleural Effusion	592
9.6.8 Chylothorax	593
9.6.9 Pericardial Effusion	595
9.7 Diagnostic Thoracoscopy Procedures	601
9.7.1 Pleural, Hilar Lymph Node, Mediastinal, Pericardial, and Chest Wall Mass Biopsy	602
9.7.2 Lung Biopsy	603
9.8 Thoracic Operative Procedures	606

9.8.1 Pericardial Window	606
9.8.2 Right Atrial Mass Resection	609
9.8.3 Subtotal Pericardiectomy	612
9.8.4 Partial Lung Lobectomy	615
9.8.5 Lung Lobectomy	617
9.8.6 Thoracic Duct Occlusion	622
9.8.7 Patent Ductus Arteriosus Occlusion	624
9.8.8 PRAA Correction	624
9.8.9 Mediastinal Mass Removal	626
9.8.10 Thoracic Foreign Body Removal	627
9.9 Contraindications for Thoracoscopy	628
9.10 Complications of Thoracoscopy	630
9.11 Conclusions	630
References	631

## **10 Video Otoscopy 637**

*Rod Rosychuk*

10.1 Normal Anatomy of the Ear as Seen Through the Video Otoscope	637
10.2 Pathophysiology of the Ear as Seen Through the Video Otoscope	643
10.3 Video Oscopes	645
10.4 Video Otoscope Instrumentation	648
10.5 Video Otoscopy as a Diagnostic Aid – “In Examination Room” Use	649
10.6 Video Otoscopy Procedures	650
10.6.1 Deep Ear Cleaning of the Ear Canals	652
10.6.2 Deep Ear Cleaning of the Middle Ear	653
10.6.3 Intralesional Glucocorticoid Injections	654
10.6.4 Laser Surgery	655

10.6.5 Myringotomy 655

10.6.6 Management of Primary Secretory Otitis Media 656

10.6.7 Biopsies and Mass Removals 656

10.6.8 Feline Aural Polyp Removal 657

10.6.9 Visualization of the Tympanic Cavity and Bulla 658

Suggested Reading 659

## **11 Otheroscopies 661**

*Timothy C. McCarthy*

11.1 Introduction 661

11.2 Instrumentation for Otheroscopy in Small Animals 661

11.3 Transabdominal Nephroscopy and Ureteroscopy 661

11.4 Transabdominal Cholecystodocopy 665

11.5 Transabdominal Gastrointestinal Endoscopy 668

11.6 Prepuceoscopy 671

11.7 Laceroscopy 673

11.8 Drain Retrieval 675

11.9 Fistuloscopy 677

11.10 Oculoscopy 677

11.11 Oncoscopy 679

11.12 Oraloscopy 680

11.12.1 Dentaloscopy 680

11.12.2 Tonsiloscopy 680

11.12.3 Pharyngoscopy 681

11.13 Laryngoscopy 684

11.14 Dermoscopy 691

11.15 Analsacoscopy 693

References 693
