- **Acknowledgments**
- **Preface**

- **Section I: Essentials**
 - **1. Surgical Instrumentation**
 - Chapter Contents
 - Introduction
 - Design of Ophthalmic Instruments
 - Adaptations for Large Animal and Special Species Ophthalmic Surgeries
 - Surgical Instruments for Ophthalmic Surgeries
 - Instruments for Vitreoretinal Surgeries
 - Ophthalmic Sutures and Needles
 - Instrument Care, Storage, and Sterilization
 - Further Reading

 - **2. The Operating Room**
 - Chapter Contents
 - Introduction
 - Magnification
 - Illumination
 - Chairs for Ophthalmic Surgery
 - Patient Preparation
 - Basic Operative Approach
 - Hemostasis
 - Electroepilation
 - Cryotherapy
 - Laser Therapy
 - Laser Safety
 - Perioperative Drugs
 - Postsurgical Consideration
 - Subpalpebral Lavage Systems
 - Further Reading

 - **3. Anesthesia for Ophthalmic Surgery**
 - Chapter Contents
 - Introduction
 - Ophthalmic Effects of General Anesthetics
 - Indications for and Effects of Sedation
 - Effects of Preanesthetic Medications

- Effects of Injectable General Anesthetics
- Effects of Inhalational Anesthetics
- Neuromuscular Blocking Agents
- Ophthalmic Drug and Anesthetic Drug Interactions
- Systemic Diseases and General Anesthesia
- Local or Regional Eyelid Injections/Nerve Blocks
- Retrobulbar Injections/Nerve Blocks in Animals
- Considerations for General Anesthesia for Selected Ophthalmic Surgical Procedures in Different Species
- Adaptations for Large Animals and Special Species
- Further Reading

- **4. Principles of Microsurgery**

- Chapter Contents
- Introduction
- Selected References

- **Section II: Small Animal (Dog & Cat) Ophthalmic**

- **5. Surgery of the Orbit**

- Chapter Contents
- Introduction
- Ancillary Diagnostic Procedures
- Surgical Anatomy
- Surgical Pathophysiology
- Perioperative Medications
- Types of Orbital Surgical Procedures
- Enucleation Procedures in Small Animals
- Evisceration with Intraocular Prosthesis in Small Animals
- Exenteration
- Orbitotomy in Small Animals
- Total and Partial Orbitectomy
- Surgical Management of Traumatic Proptosis in Small Animals
- Surgical Augmentation of Orbital Volume in Small Animals
- Postoperative Care and Management
- Postoperative Complications and Treatment
- Short- and Long-Term Results
- Further Reading

- **6. Surgery of the Eyelids**

- Chapter Contents
- Introduction
- Anatomy
- Preoperative Examination Diagnostics
- Surgical Considerations
- Surgical Instrumentation
- Surgical Preparations of the Eyelids
- Tarsorrhaphy
- Lateral Canthotomy
- Surgeries for Eyelid Agenesis

- Surgeries for Distichiasis
- Surgical Procedures for Ectopic Cilia
- Surgeries for Entropion
- Surgeries for Lateral Canthal Entropion in Large Breeds
- Surgical Procedures for Ectropion
- Surgeries for Combined Ectropion and Entropion
- Surgeries to Reduce Palpebral Fissure Size
- Surgeries to Increase Palpebral Fissure Size
- Nasal Fold Trichiasis and Resection in Dogs
- Surgical Treatment of Chalazion
- Surgical Repair of Eyelid Lacerations
- Surgeries for Minor Eyelid Neoplasms
- Reconstructive Blepharoplasty
- Further Reading

- **7. Surgery of Nasolacrimal Apparatus and Tear Systems**
- Chapter Contents
- Introduction
- Nasolacrimal Apparatus
- Surgical Anatomy
- Diagnostics for the Nasolacrimal Drainage Apparatus
- Surgical Procedures for the Nasolacrimal Apparatus
- Surgical Approaches to Dacryops
- Surgery for Keratoconjunctivitis Sicca
- Further Reading

- **8. Surgical Procedures for the Conjunctiva and the Nictitating Membrane**
- Chapter Contents
- Introduction
- Conjunctival Anatomy
- Anatomy of the Nictitans
- Bulbar/Palpebral Conjunctival Biopsy (Punch/Snip)
- Surgical Repair of Conjunctival Lacerations
- Surgical Repair of Conjunctival Defects
- Surgical Treatment for Symblepharon
- Conjunctival Grafts/Transplantation
- Conjunctiva Autografts
- Substitute Materials for Conjunctival Grafts
- Surgeries of the Nictitans
- Surgical Treatment of Everted Nictitans
- Surgical Treatment for Hyperplastic Lymphoid Follicles
- Surgical Procedures for Protrusion of the Gland of the Nictitating Membrane or “Cherry Eye”
- Surgical Procedures for Prominent/Protruded Nictitans
- Nictitating Membrane Flaps
- Partial/Complete Excision of the Nictitans
- Further Reading

- **9. Surgery of the Cornea and Sclera**
- Chapter Contents

- Introduction
- Surgical Anatomy
- Pathophysiology
- Perioperative Treatment
- Surgical Instrumentation
- Surgical Procedures for Superficial Corneal Diseases
- Surgical Procedures for Deep Corneal Ulcerations
- Corneal Adhesives
- Surgery for Corneal Lacerations
- Surgery for Corneal Foreign Bodies
- Corneal Grafts/Keratoplasty
- Thermokeratoplasty
- Surgical Treatment of Limbal and Scleral Diseases
- Further Reading

- **10. Surgical Procedures of the Anterior Chamber and Anterior Uvea**
- Chapter Contents
- Introduction
- Surgical Anatomy
- Pathophysiology
- Perioperative Considerations
- Surgery of the Anterior Chamber
- Surgical Treatment of Hypopyon, Hyphema, and Anterior Chamber Foreign Body or Parasites
- Surgical Procedures of the Anterior Uvea
- Laser Treatment of Anterior Uveal Cysts
- Laser Treatment of Anterior Uveal Neoplasms
- Further Reading

- **11. Surgical Procedures for the Glaucomas**
- Chapter Outline
- Introduction
- Diagnostic and Monitoring Techniques
- Surgical Anatomy
- Preoperative Treatment
- Surgical Procedures for the Glaucomas
- Aqueous Humor Filtering Procedures
- Anterior Chamber Shunts/Gonioimplants
- Cyclodestructive Procedures
- Pharmacological Ablation of the Ciliary Body
- Eye Removal
- Further Reading

- **12. Surgical Procedures of the Lens and Cataract**
- Chapter Contents
- Introduction
- History of Cataract Surgery in Dogs
- Development of the Intraocular Lens in Animals
- Surgical Anatomy
- Surgical Pathophysiology

- Patient Selection
- Nonsurgical Treatment of Cataracts
- Preoperative Preparation
- Surgical Procedures for Cataracts and Lens Removal
- Anterior Chamber Entry for Cataract and Lens Extraction
- Capsulorrhexis and Anterior Capsulectomies
- Phacoemulsification
- Phacoemulsification in the Dog
- Intraocular Lens Implantation
- Extracapsular Lens Extraction in Small Animals
- Intracapsular Cataract or Lens Extraction on Dogs and Cats
- Removal of the Unstable Lens in Dogs and Cats
- Postoperative Treatment and Management
- Postoperative Results and Complications
- Complications of Cataract Surgery
- Further Reading

- **13. Vitreoretinal Surgery**

- Chapter Contents
- Introduction
- Surgical Anatomy
- Surgical Pathophysiology
- Types of Retinal Detachments
- Types of Vitreoretinal Surgeries
- Clinical Evaluation of Retinal Detachments
- Instrumentation for Vitreoretinal Surgeries
- Vitreal Aspiration and Removal
- Preoperative Considerations for Retinal Detachments
- Vitreoretinal Surgeries
- Surgery of the Vitreous
- Types of Retinopexy
- Retinal Detachment Surgery
- Postoperative Results
- Further Reading

- **Section III: Other Species**

- **14. Equine Ophthalmic Surgery**

- Chapter Contents
- Introduction
- Orbital Surgery
- Surgical Anatomy
- Surgical Pathophysiology
- Globe Development on Orbit Growth
- Strabismus
- Orbital Inflammation: Acute and Chronic
- Orbital Neoplasms
- Perioperative Medications
- Types of Orbital Surgeries
- Local and Retrobulbar Nerve Blocks in the Horse

- Surgical Techniques
- Removal of Prolapsed Retrobulbar Fat
- Orbitotomies
- Orbital Fractures
- Traumatic Proptosis in Horses/Avulsion/Luxation of the Globe
- Augmentation of Orbital Volume
- Postoperative Care and Management
- Surgeries of the Eyelids
- Anatomy
- Surgical Considerations of the Eyelids
- Surgical Instrumentation
- Surgical Preparations of the Eyelids
- Tarsorrhaphies
- Lateral Canthotomy
- Entropion
- Surgeries for Entropion
- Surgeries for Ectropion
- Eyelid Trauma
- Surgeries for Eyelid Neoplasia
- Blepharoplastic Procedures
- Lacrimal and Nasolacrimal Surgeries
- Surgeries for the Nasolacrimal Apparatus
- Surgery for Keratoconjunctivitis Sicca
- Surgeries of the Conjunctiva and Nictitans
- Conjunctival Anatomy
- Anatomy of the Nictitans
- Bulbar/Palpebral Conjunctival Biopsy (Punch/Snip)
- Surgical Repair of Conjunctival Lacerations and Defects
- Conjunctival Grafts and Transplantation
- Surgeries of the Nictitans
- Nictitating Membrane Flaps
- Partial/Complete Excision of the Nictitans
- Surgeries of the Cornea and Sclera
- Surgical Anatomy
- Corneal Diseases
- Perioperative Considerations
- Surgical Instrumentation for Corneal and Scleral Surgeries
- Surgical Procedures for Superficial Corneal Diseases
- Surgical Procedures for Deep Corneal Ulcerations
- Biomaterial Substitutes
- Surgery for Corneal Lacerations
- Surgery for Corneal Foreign Bodies
- Corneal Adhesives
- Surgeries for Corneal Abscesses
- Split-Thickness Penetrating Keratoplasties
- Posterior Lamellar Keratoplasty
- Thermokeratoplasty
- Surgeries for Immune-Mediated Keratitis
- Surgeries for Limbal and Scleral Diseases
- Surgeries of the Anterior Chamber and Anterior Uvea

- Surgical Anatomy
- Pathophysiology
- Perioperative Considerations
- Surgeries of the Anterior Chamber
- Surgery for Hyphema
- Enzymatic Therapy for Hyphema
- Anterior Chamber Foreign Bodies and Parasites
- Postoperative Management and Complications
- Surgeries of the Anterior Uvea
- Cyclosporine Implants for Treatment of Equine Recurrent Uveitis
- Surgeries for the Glaucomas
- Diagnostic and Monitoring Techniques
- Surgical Anatomy
- Preoperative Treatment
- Transscleral Cyclophotocoagulation
- Treatment of Blind and Painful Glaucomatous Eyes
- Pharmacological Ablation of the Ciliary Body
- Surgeries of the Lens and Cataracts
- Cataract Classification in Horses
- History of Cataract Surgery in Horses
- Development of the Intraocular Lens for the Horse
- Patient Selection
- Preoperative Preparation
- Surgeries for Cataracts and Lens Removal
- Phacoemulsification in the Horse
- Intracapsular Lens or Cataract Extraction
- Postoperative Results and Complications
- Vitreal Anatomy
- Surgical Pathophysiology
- Surgery of the Vitreous
- Pars Plana (Anterior) Vitrectomy for Equine Recurrent Uveitis
- Retinal Detachments in Horses
- Further Reading

- **15. Ophthalmic Surgeries in Production Animals**

- Chapter Contents
- Introduction
- Bovine Orbit
- Perioperative Medications
- Types of Orbital Surgical Procedures
- Eyelid Surgeries
- Preoperative Examination Procedures
- Surgical Instrumentation
- Surgical Preparations of the Eyelids
- Bovine Eyelid Surgeries
- Conjunctiva and Nictitans
- Conjunctival and Nictitans Anatomy
- Surgeries of the Nictitans
- Nictitating Membrane Flaps
- Partial/Complete Excision of the Nictitans

- Conjunctival Grafts
- Surgery of the Cornea and Sclera
- Surgical Pathophysiology
- Perioperative Treatment Considerations
- Indications for Surgery
- Other Species
- Further Reading

- **16. Ophthalmic Surgeries in Exotic and Zoo Species**
- Chapter Contents
- Introduction
- Orbit and Globe
- Enucleation in Birds
- Eyelid Surgeries
- Eyelid Surgery in Big Cats with Lid Agenesis
- Nasolacrimal Disease
- Conjunctiva and Nictitans
- Conjunctival Grafts
- Glaucomas
- Lens and Cataract Surgeries
- Further Reading
- **Index.**
