

TABLE OF CONTENTS

- **Section I: General**

1. Concepts in veterinary toxicology
2. Toxicokinetics
3. Factors affecting chemical toxicity
4. Toxicological testing: *in vivo* and *in vitro* models
5. Epidemiology of animal poisonings in the United States
6. Epidemiology of animal poisonings in Europe
7. Epidemiology of animal poisonings in Asia
8. Chemicals of terrorism
9. Regulatory considerations in veterinary toxicology
10. Regulatory aspects for the drugs and chemicals used in food-producing animals in the European Union
11. Regulatory aspects for the drugs and chemicals used in Japan
12. Statistics in veterinary toxicology
13. Computational modeling in veterinary toxicology (New chapter)
14. Toxicology and the law

Section II: Organ Toxicity

15. Nervous system toxicity
16. Respiratory toxicity
17. Cardiovascular toxicity
18. Liver toxicity
19. Renal toxicity
20. Reproductive toxicity and endocrine disruption
21. Placental toxicity
22. Dermal toxicity
23. Blood and bone marrow toxicity
24. Immunotoxicity

Section III: Nanoparticles, Radiation and Carcinogens

25. Toxicity of nanomaterials
26. Ionizing radiation and radioactive materials in health and disease
27. Carcinogenesis: mechanisms and models

Section IV: Drugs of Use and Abuse

28. Toxicity of over-the-counter drugs
29. Toxicity of drugs of abuse

Section V: Metals and Micronutrients

30. Aluminum
31. Arsenic
32. Cadmium
33. Chromium, iodine and phosphorus
34. Copper
35. Fluoride
36. Iron
37. Lead
38. Manganese

39. Mercury
40. Molybdenum
41. Selenium
42. Sodium chloride (salt)
43. Sulfur
44. Zinc

Section VI: Insecticides and Molluscicides

45. Organophosphates and carbamates
46. Organochlorines
47. Pyrethrins and pyrethroids
48. Neonicotinoids
49. Amitraz
50. Fipronil
51. Macrocyclic lactone endectocides
52. Rotenone
53. Metaldehyde

Section VII: Herbicides and Fungicides

54. Toxicity of herbicides
55. Toxicity of fungicides

Section VIII: Rodenticides and Avicides

56. Anticoagulant rodenticides
57. Non-anticoagulant rodenticides
58. Avitrol

Section IX: Gases, Solvents and Other Industrial Toxicants

59. Toxic gases
60. Alcohols and glycols
61. Petroleum
62. Polychlorinated biphenyls, polybrominated biphenyls, polychlorinated dibenzo-p-dioxins, and polychlorinated dibenzofurans
63. Polycyclic aromatic hydrocarbons
64. Brominated flame retardants and perfluorinated chemicals

Section X: Environmental Toxicology

65. Principles of ecotoxicology
66. Avian toxicology
67. Aquatic toxicology
68. Toxicology and diversity of marine toxins

Section XI: Bacterial and Cyanobacterial Toxins

69. Botulinum neurotoxins
70. Enterotoxins
71. Cyanobacterial (blue-green algae) toxins

Section XII: Poisonous and Venomous Organisms

72. Terrestrial zootoxins
73. Mare reproductive loss syndrome

Section XIII: Estrogenic Toxicants

- 74. Chemical-induced estrogenicity
- 75. Phytoestrogens

Section XIV: Poisonous Plants

- 76. Poisonous plants of the USA
- 77. Poisonous plants of Europe
- 78. Poisonous plants of Australia and New Zealand
- 79. Cyanogenic plants
- 80. Nitrate and nitrite accumulating plants
- 81. Toxicity of yew (*Taxus* spp.) alkaloids
- 82. Oxalate-containing plants
- 83. Mushroom toxins
- 84. Datura species and related plants
- 85. Cottonseed toxicity
- 86. Fescue toxicosis

Section XV: Mycotoxins

- 87. Aflatoxins
- 88. Ergot
- 89. Fumonisin
- 90. Ochratoxin and citrinin
- 91. Slaframine
- 92. Tremorgenic mycotoxins
- 93. Trichothecenes
- 94. Zearalenone

Section XVI: Feed and Water Contaminants

- 95. Melamine and cyanuric acid
- 96. Ionophores
- 97. Nonprotein nitrogen (urea) and hyperammonemia
- 98. Water quality and contaminants

Section XVII: Diagnostic Toxicology

- 99. Basic concepts of analytical toxicology
- 100. Sample submission for toxicological analysis
- 101. Toxicoproteomics in diagnostic toxicology
- 102. Microscopic analysis of toxic substances in feeds and ingesta

Section XVIII: Prevention and Treatment

- 103. Prevention and treatment of poisoning
