

# TABLE OF CONTENTS

## A Practical Guide to Seizure Disorders in Dogs and Cats

Terminology

Phases associated with a seizure

Disorders that can mimic seizures and discriminators

Systematic diagnostic approach to the patient with seizure disorders

02 Canine Idiopathic Epilepsy

Andrea Fischer

Types of epileptic seizures

Diagnostic approach

Breed-related differences

and lifespan in canine idiopathic epilepsy

03 Quality of Life Issues in Canine Epilepsy

Rowena MA Packer

What is quality of life?

Impact of epilepsy on canine QoL

Impact of epilepsy on caregiver quality of life

04 Genetics of Epilepsy in Dogs and Cats

Edward (Ned) E. Patterson

Genetic or suspected genetic idiopathic epilepsy in dogs

Structural epilepsies in dogs

L-2-Hydroxyglutaric aciduria

Genetic counseling for breeding dogs with epilepsy

Feline epilepsy genetics

05 Feline Epilepsy

Akos Pakozdy, Borbala A. Lörincz

Prevalence of seizure disorders in cats

Terminology

Diagnostic approach to seizure disorders in cats

Antiseizure treatment of feline epilepsy

Outcome of feline epilepsy.

06 Advanced Diagnostic Imaging in Epilepsy

Daisuke Hasegawa

Conventional MRI

Structural MRI for diagnosis of epilepsy

Advanced and functional imaging

Imaging findings of structural epilepsies

Degenerative diseases

07 Electroencephalography

Fiona M.K. James

How does EEG work?

How to record EEG?

How to interpret EEG?

How to report EEG?

Where to learn more on EEG?

08 Fundamental Principles of Pharmacokinetics for Antiseizure Medications

Mark G. Papich

Important definitions

Principles of drug disposition in animals

Drug elimination (elimination half-life,  $t_{1/2}$ )

Drug distribution (volume of distribution)

Drug clearance

Drug absorption

09 Principles of Antiseizure Drug Use

Karen R. Muñana, Luisa De Risio

Initiating therapy

Choosing an appropriate antiseizure drug

Devising a rational treatment plan

Drug resistance

Epilepsy remission

10 Phenobarbital

Fabio Stabile, Luisa De Risio

Mechanism of action

Pharmacokinetics

Efficacy

Clinical use

Adverse effects and drug interactions

11 Potassium Bromide

Michael Podell

Mechanism of action

Pharmacokinetics

Efficacy

Clinical use

Adverse effects and drug interactions

12 Levetiracetam

Karen R. Muñana

Mechanism of action

Pharmacokinetics

Efficacy

Clinical use

13 Imepitoin

Andrea Tipold

Mechanism of action

Pharmacokinetics

Efficacy

Clinical use

Adverse effects and drug interactions

## 14 Zonisamide

Daisuke Hasegawa, Miyoko Saito

Mechanism of action

Pharmacokinetics

Clinical use

Adverse effects and drug interactions

## 15 Other Antiseizure Drugs

Kari Foss, Devon Hague

Clorazepate and Clonazepam

Felbamate

Gabapentin

Topiramate

Pregabalin

Rufinamide

Lacosamide

Brivaracetam

## 16 Cannabidiol in Canine Epilepsy

Stephanie McGrath

Mechanism of Action

Pharmacokinetics

Efficacy

Clinical use

Adverse effects and drug interactions

## 17 Dietary Management of Canine Epilepsy

Elliott S. Neal, Weizhi Xu, Karin Borges

Pathophysiology and mechanism of action.

“Pharmacology and pharmacokinetics” of ketogenic diets and medium chain triglycerides Efficacy

Manipulations of macronutrients – practical considerations for the treatment of dogs with epilepsy

## 18 Neurostimulation for Canine Epilepsy

Sofie F.M. Bhatti Contributors: Marios Charalambous, Luc Van Ham

Vagus nerve stimulation

Transcranial magnetic stimulation

Conclusions

19 Management of Status Epilepticus and Cluster Seizures in Dogs and Cats

Marios Charalambous Contributor: Sofie F.M. Bhatti

Status epilepticus

Cluster seizures.
