

TABLE OF CONTENTS

Advances in Aquaculture Hatchery Technology

Contributor contact details

Woodhead Publishing Series in Food Science, Technology and Nutrition

Foreword

Preface

Part I: Reproduction and larval rearing

Chapter 1: Aquaculture hatchery water supply and treatment systems

Chapter 2: Principles of finfish broodstock management in aquaculture: control of reproduction and genetic improvement

Chapter 3: Cryopreservation of gametes for aquaculture and alternative cell sources for genome preservation

Chapter 4: Live microalgae as feeds in aquaculture hatcheries

Chapter 5: Rotifers, Artemia and copepods as live feeds for fish larvae in aquaculture

Chapter 6: Microdiets as alternatives to live feeds for fish larvae in aquaculture: improving the efficiency of feed particle utilization

Chapter 7: Management of finfish and shellfish larval health in aquaculture hatcheries

Chapter 8: Microbial management for bacterial pathogen control in invertebrate aquaculture hatcheries

Part II: Closing the life-cycle and overcoming challenges in hatchery production for selected invertebrate species

Chapter 9: Palinurid lobster larval rearing for closed-cycle hatchery production

Chapter 10: Biosecurity measures in specific pathogen free (SPF) shrimp hatcheries

Chapter 11: Blue mussel hatchery technology in Europe

Chapter 12: Research on the production of hatchery-reared juveniles of cephalopods with special reference to the common octopus (*Octopus vulgaris*)

Chapter 13: Jellyfish as products and problems of aquaculture

Chapter 14: Sea cucumber aquaculture: hatchery production, juvenile growth and industry challenges

Part III: Closing the life-cycle and overcoming challenges in hatchery production for selected fish species

Chapter 15: Closed-cycle hatchery production of tuna

Chapter 16: Developments in hatchery technology for striped catfish (*Pangasianodon hypophthalmus*)

Chapter 17: Aquaculture production of meagre (*Argyrosomus regius*): hatchery techniques, ongrowing and market

Chapter 18: Hatchery production of yellowtail kingfish (*Seriola lalandi*)

Part IV: Aquaculture hatcheries for conservation and education

Chapter 19: Hatchery production for conservation and stock enhancement: the case of Australian freshwater fish

Chapter 20: Developing educational programs in partnership with aquaculture hatchery facilities

Index.
