

## **TABLE OF CONTENTS – Atlas of Normal Radiographic Anatomy and Anatomic Variants in the Dog and Cat, 3rd Edition**

- Cover image
- Title page
- Table of Contents
- Copyright
- Preface
- Acknowledgments
- List of Tables
- List of Illustrations
  
- **1. Basic imaging principles and physeal closure time**
  - How to use this atlas
  - What is normal?
  - Why are computed tomography and magnetic resonance images included in this atlas?
  - Why are images from radiographic contrast procedures included in this atlas?
  - Radiographic terminology
  - Viewing images
  - Standard projections
  - Oblique projections
  - Physeal closure
  - Reference
  - Skeletal maturation data compiled from the following sources
  
- **2. The skull**
  - Overview
  - Dentition
  - Nasal cavity and sinuses
  - Temporomandibular joints and tympanic bullae
  - The mandibles and larynx
  - References
  
- **3. The spine**
  - Cervical spine
  - Thoracic spine
  - Lumbar spine
  - Sacral spine
  - Caudal spine
  - References
  
- **4. The thoracic limb**
  - The scapula and brachium
  - The elbow joint
  - Antebrachium

- Carpus
- Metacarpus and phalanges
- References
  
- **5. The pelvic limb**
- Pelvis
- Femur and stifle
- Tibia and fibula
- Pes
- References
  
- **6. The thorax**
- Left lateral view
- Right lateral view
- Dorsoventral view
- Ventrodorsal view
- Thoracic wall
- Mediastinum
- Trachea and bronchi
- Esophagus
- Heart
- Lung
- Diaphragm
- References
  
- **7. The abdomen**
- Liver
- Spleen
- Pancreas
- Kidneys and ureters
- Deep circumflex iliac vessels
- Urinary bladder
- Prostate gland
- Urethra/penis
- Stomach
- Small intestine
- Large intestine
- Miscellaneous
- References
- Index
- Color Plates.
