

## **TABLE OF CONTENTS**

### **Biosecurity in Animal Production and Veterinary Medicine: From Principles to Practice**

- 1: Circles of Disease Transmission
- 2: General Principles of Biosecurity in Animal Production and Veterinary Medicine
- 3: Biosecurity and its Relationship with Health, Production and Antimicrobial Use
- 4: How to Motivate Farmers to Implement Biosecurity Measures
- 5: How to Measure Biosecurity and the Hygiene Status of Farms
- 6: Cleaning and Disinfection
- 7: Hygienic Aspects of Air and Decontamination of Air
- 8: Feed Hygiene
- 9: Drinking Water Hygiene and Biosecurity
- 10: Promoting Biosecurity through Insect Management at Animal Facilities
- 11: Rodent Control in Animal Production
- 12: Transmission of Pig Diseases and Biosecurity in Pig Production
- 13: Transmission of Poultry Diseases and Biosecurity in Poultry Production
- 14: Transmission of Cattle Diseases and Biosecurity in Cattle Farms
- 15: Biosecurity for Horse Facilities
- 16: Biosecurity Measures for Dog Merchants and Canine Breeding Kennels
- 17: Biosecurity in Veterinary Practices and Clinics
- 18: Biosecurity in Laboratory Animal Research Facilities
- 19: Biosecurity in Aquaculture: Practical Veterinary Approaches for Aquatic Animal Disease Prevention, Control, and Potential Eradication.
