TABLE OF CONTENTS

Cunningham's Textbook of Veterinary Physiology
6th Edition

Section I: The Cell
1. The Molecular and Cellular Bases of Physiological Regulation
2. Cancer: A Disease of Cellular Proliferation, Life Span, and Death

Section II: Neurophysiology
3. Introduction to the Nervous System
4. The Neuron
5. The Synapse
6. The Physiology of Muscle
7. The Concept of a Reflex
8. Skeletal Muscle Receptor Organs
9. The Concept of Lower and Upper Motor Neurons and Their Malfunction
10. The Central Control of Movement
11. The Vestibular System
12. The Cerebellum
13. The Autonomic Nervous System
14. The Visual System
15. Cerebrospinal Fluid and the Blood-Brain Barrier
16. The Electroencephalogram and Sensory-Evoked Potentials
17. Hearing

Section III: Cardiovascular Physiology
18. Overview of Cardiovascular Function
19. Electrical Activity of the Heart
20. The Electrocardiogram
21. The Heart as a Pump
22. The Systemic and Pulmonary Circulations
23. Capillaries and Fluid Exchange
24. Local Control of Blood Flow
25. Neural and Hormonal Control of Blood Pressure and Blood Volume
26. Integrated Cardiovascular Responses

Section IV: Physiology of the Gastrointestinal Tract
27. Regulation of the Gastrointestinal Functions
28. Motility Patterns of the Gastrointestinal Tract
29. Secretions of the Gastrointestinal Tract
30. Digestion and Absorption: The Nonfermentative Processes
31. Digestion: The Fermentative Processes
32. Postabsorptive Nutrient Utilization

Section V: Endocrinology
33. The Endocrine System
34. Endocrine Glands and Their Function

Section VI: Reproduction and Lactation
35. Control of Gonadal and Gamete Development
36. Control of Ovulation and the Corpus Luteum
37. Reproductive Cycles
38. Pregnancy and Parturition
39. The Mammary Gland
40. Reproductive Physiology of the Male

Section VII: Renal Physiology
41. Glomerular Filtration
42. Solute Reabsorption
43. Water Balance
44. Acid-Base Balance

Section VIII: Respiratory Function
45. Overview of Respiratory Function: Ventilation of the Lung
46. Pulmonary Blood Flow
47. Gas Exchange
48. Gas Transport in the Blood
49. Control of Ventilation
50. Nonrespiratory Functions of the Lung

Section IX: Homeostasis
51. Fetal and Neonatal Oxygen Transport
52. Acid-Base Homeostasis
53. Thermoregulation

Section X: The Immune System
54. Antigens and Innate Immunity
55. The Specific Immune Response: Acquired Immunity

Appendix A: Answers to Practice Questions.
