## **Dr. Kellon's Guide to First Aid for Horses: A Quick and Easy Reference to Conditions that Require Emergency Treatment**

- Front Cover
- Title Page
- Copyright Page
- Contents
- A Message from The Author and The publisher
- Chapter 1: Guidelines
- Chapter 2: Be prepared
  - Vital info
  - Normal values for a horse at rest — TPR (temperature, pulse, and respiration)
  - Pulse and respiration rates
  - Temperature
  - Mucous membrane color
  - Other observations
- Chapter 3: Restraint of the ill or injured horse
  - Methods of restraint
  - Summary
- Chapter 4: Wounds
  - Superficial wounds
  - Deep lacerations
  - Contusions – with skin intact
  - Puncture wounds
  - Gunshot wounds
  - Snakebite
- Chapter 5: Bleeding

- From wounds
- From nose
- From ears
- From mouth
- From other body orifices
- Chapter 6: Burns
- Superficial burns
- Deep burns
- Chapter 7: Disorders of eating/colic
- Salivation/drooling
- Poor appetite
- Refusal to eat/drink
- Food/water coming out the nose
- Coughing/choking when eating
- Colic
- Diarrhea
- Constipation/impaction
- Worms in the manure
- Chapter 8: Grain overload
- Mild overload
- Severe overload
- Chapter 9: Lameness
- Degrees of lameness
- Tendon/ligament injuries
- Founder/laminitis
- Fracture
- Chapter 10: Heat stroke
- Heat stroke
- Chapter 11: Exercise-related problems
- Exhaustion/heat prostration

- Thumps
- Tying up
- Chapter 12: Breathing problems
- Rapid respiration
- Noisy respiration
- Flared nostrils
- Cough
- Nasal discharge
- Trauma to neck/throat
- Trauma to chest
- Chapter 13: Collapse
- Loss of consciousness
- Seizures/"fits"
- Chapter 14: Disorders of balance, coordination, personality
- Chapter 15: Trauma to the head and neck
- Blows to the head
- Flipping over backward
- Chapter 16: Eyes
- Swollen eye and prominent third eyelid
- Tearing
- Inability to open eyelids
- Refusal to open eyelids
- Laceration to eyelids
- White eye or white spot on eye
- Blood in eye
- Collapsed eye
- "Bloodshot" eye
- Pus/white material at corner of eye
- Chapter 17: Frostbite and exposure
- Mild frostbite

- Moderate frostbite and exposure
- Severe frostbite and exposure
- Chapter 18: Lightning and electric shock
- Chapter 19: Disorders of urine/urination
- Straining to urinate
- Frequent urination
- Discolored urine
- "Sore kidneys"
- Chapter 20: Reproductive organs
- Dropped penis
- Trauma to penis
- Swelling of sheath (prepuce)
- Trauma to vulva
- Colic following breeding
- Chapter 21: Foaling
- Prolonged labor/failure of foal to appear
- Improper position of foal
- Failure of foal to advance
- Uterine exhaustion
- Premature rupture of cord
- Failure of membranes to rupture
- Red bag delivery (placenta previa)
- Weak mare postpartum
- Retained placenta
- Colic in mare postpartum
- Rejection of foal
- Chapter 22: Newborn emergencies
- Failure to stand
- Failure to nurse
- Failure to pass manure

- Failure to urinate
- Weak or depressed foals
- Hypothermia
- Limb weakness/deformities
- Chapter 23: Some common drug reactions
- Types of drug reactions
- Antibiotics
- Tranquilizers
- Dewormers
- B vitamins
- Phenylbutazone and other anti-inflammatory drugs
- Reproductive drugs
- Chapter 24: Reference
- Describing horse anatomy
- Signs of effective tranquilization
- Signs of shock
- Alternative therapies
- Drug category
- Drug notes
- Some commonly used drugs
- Herb/drug interactions
- Prevention and treatment of acute flare-ups
- Laminitis
- Impaction colic
- Heat-related problems
- ERU (equine recurrent uveitis, periodic ophthalmia, moon blindness)
- Lameness/arthritis
- COPD/heaves
- Chapter 25: Procedures
- Reading vital signs

- Temperature
- Pulse
- Respiration
- "Cap refill"
- Skin elasticity test for dehydration
- Check feet for heat
- Twitching the horse
- Bandaging
- Routine standing leg wrap
- Figure-of-eight leg wrap
- For the hock
- For the knee
- Administering eye medications
- Hot vs. cold first aid therapy
- Cold therapy
- Heat therapy
- Proper use of liniments
- Supportive care of the ill or injured horse
- Make an emergency rope halter
- Giving intramuscular injections
- Euthanasia under emergency conditions
- Information for emergency personnel on the scene
- Chapter 26: Emergency splinting techniques for stabilizing equine fractures
- Distal forelimb fractures
- Mid-forelimb fractures
- Mid-forearm fractures
- Proximal forelimb fractures
- Proximal limb fractures
- Distal hindlimb fractures
- Mid-hindlimb fractures

- Mid-proximal hindlimb fractures
- Mid-proximal hindlimb fractures
- Chapter 27: Trailer accidents and trapped horses
- Call for help
- Handling the horse
- After the rescue
- On the accident scene: Advice to rescue personnel
- When the horse cannot stand
- To lift a recumbent horse
- Emergency situations: Plan of action
- Horse trailer accidents
- Horse fallen through trailer floor
- Horse in swimming pool or steep-sided canal
- Horse in ditch, ravine, mud, septic tank
- Horse fallen through ice
- Horse in a barn fires
- Appendix
- Glossary
- Important emergency information for the veterinarian (form)
- In case of injury (form)
- Index
- Emergency phone number.
