

TABLE OF CONTENTS

Toxicology of Fishes 2nd Edition

- 1 Introduction.
- 2 Toxicokinetics in Fishes.
- 3 Biotransformation in Fishes.
- 4 Reactive Oxygen Species and Oxidative Stress.
- 5 Toxic Responses of the Fish Nervous System.
- 6 The Immune System of Fish: A Target Organ of Toxicity.
- 7 Toxicity Resistance: Physiological Acclimations and Evolutionary Adaptations to Chemical Stress.
- 8 Endocrine Disruption in Teleosts: Mechanisms of Endocrine Toxicity and Experimental Approaches.
- 9 Multi- and Transgenerational Health Effects of Exposure to Toxicants in Fish.
- 10 Epigenetics.
- 11 Proteomics and Metabolomics.
- 12 Adverse Outcome Pathways.
- 13 The Potential for Toxicity to Fishes from Micro and Nanoplastics, and their Additives.
- 14 Effects of Pharmaceuticals.
- 15 Oil Spills.
